Christopher W. Boerl, Katie Donbavand

Modern Ark Saving Endangered Species:

The Modern Ark Daniel Cohen, 1995 Tells about work being done by zoos in the U S to breed endangered species in captivity in hopes of restoring them to the wild **The Modern Ark** Vicki Croke, 2014-09-09 An in depth look at the radical changes occurring in our nation s zoos from cement paved mazes to simulated rain forests to completely natural landscapes as well as the history behind the actual idea of the zoo Following the lead of private menageries in Europe public zoos began to proliferate throughout America What once started as symbols of prestige and power are now educational centers developing advanced technologies in the race to conserve all that remains of the natural world With DNA fingerprinting artificial insemination embryo transfers and egg harvesting zoos play a critical role in the fight to save endangered species

The Modern Ark Daniel Cohen, 1995 Rare creatures from North and South America Asia and Africa including the cheetah and the giant panda are bred in captivity in hopes of reintroducing them to their natural habitat in a program called Species Survival Plan Cohen has written a well researched account of the problems faced by endangered species and of our solutions to protect their future Photos *The Modern Ark* Shannon Petersen, 2000 **Habitats Gr. 4-6 , Endangered Species** Sonia Benson, Rob Nagel, 2004 Endangered Species 2nd Edition presents information on endangered and threatened mammals birds reptiles amphibians fish mollusks insects arachnids crustaceans and plants Its 240 entries including 40 new species added to the 2nd Edition were chosen to give a glimpse of the broad range of species currently facing endangerment While well publicized examples such as the American bison northern spotted owl and gray wolf are examined so too are less conspicuous yet no less threatened species such as the Australian ant Cape vulture and Peebles Navajo cactus The entries are spread across three volumes and are divided into sections by classes Within each class species are arranged alphabetically by common name Color locator maps outlining the range of a particular species are included in each entry to help users find unfamiliar countries or locations More than 200 color photographs provide a more concrete vision of the species Sidebar boxes containing interesting and related information are also included in some entries **The Codex of the Endangered Species Act** Lowell E. Baier, 2023-07-25 The Endangered Species Act of 1973 ESA is one of the most cherished and reviled laws ever passed It mandates protection and preservation of all the nation s species and biodiversity whatever the cost It has been a lightning rod for controversy and conflicts between industry business and environmentalists The year 2023 marks the 50th anniversary of this law and provides an opportunity for a measured and thorough evaluation thereof We cannot know today s challenges and opportunities without understanding their histories This book is the most comprehensive history of the ESA ever published and the first to consider the entire history of the law from all angles in a single volume The history of the ESA has been one of increasing impact complexity and controversy In 1978 the Supreme Court declared that Congress intended for the U S government to save all species at any cost and thereafter application of the ESA became steadily more controversial as seen in the example of the northern spotted owl and the timber wars in the Pacific Northwest

in the late 1980s and early 90s and then everywhere as the ESA became a political football in the highly partisan environment of the late 1990s and amendments to the law ceased. This book is not only a history but a call to action. It will take more conservation, more funding and more innovative solutions if we are to save our wildlife and biodiversity. It will take the engagement to every American to muster the collective will to meet this challenge. The hope of this book is that we will be able to look back and say that we accomplished more in the second 50 years of the ESA than we did in the first. *The End of Captivity?* Tripp York, 2015-07-30. In *The End of Captivity* Tripp York addresses how we talk about the good of other animals in light of a stark impossibility: their freedom from us. While all of us in the animal and plant kingdom are interdependent upon one another, humans are unique in that we are the only animals who keep other animals captive. We keep animals in zoos, sanctuaries, circuses, conservatories, aquariums, research facilities, slaughterhouses and on our farms and in our homes. York asks what such forms of captivity say about us and how animal captivity shapes what we imagine to be the purpose of other animals. What does the fact that elephants, tigers and horses perform in circuses say about how we see the world? What does the reality of zoological parks say about the people who create, support, decry, protest and patronize them? How important is wildlife conservation for the good of the earth? What does what we put on our plate say about how we understand the theological role of other animals? These are just a few questions York tackles as he weaves through the convoluted politics surrounding the captive animals in our midst. **How to Get Your Child to Love Reading** Esmé Raji Codell, 2003-01-01. Offers advice and guidelines on how to expand a child's world through books and reading, introducing three thousand teacher recommended book titles, craft ideas, projects, recipes and reading club tips. *Between God & Green* Katharine K. Wilkinson, 2012-06-08. Despite three decades of scientists' warnings and environmentalists' best efforts, the political will and public engagement necessary to fuel robust action on global climate change remain in short supply. Katharine K. Wilkinson shows that contrary to popular expectations, faith-based efforts are emerging and strengthening to address this problem. In the US, perhaps none is more significant than evangelical climate care. Drawing on extensive focus group and textual research and interviews, *Between God & Green* explores the phenomenon of climate care from its historical roots and theological grounding to its visionary leaders and advocacy initiatives. Wilkinson examines the movement's reception within the broader evangelical community from pew to pulpit. She shows that by engaging with climate change as a matter of private faith and public life, leaders of the movement challenge traditional boundaries of the evangelical agenda, partisan politics and established alliances and hostilities. These leaders view sea level rise as a moral calamity, lobby for legislation, written on both sides of the aisle and partner with atheist scientists. Wilkinson reveals how evangelical environmentalists are reshaping not only the landscape of American climate action but the contours of their own religious community. Though the movement faces complex challenges, climate care leaders continue to leverage evangelicalism's size, dominance, cultural position, ethical resources and mechanisms of communication to further their cause to bridge God and

Museums in Motion was hailed as a much needed addition to the museum literature. In combining the history of museums since the eighteenth century with a detailed examination of the function of museums and museum workers in modern society, it served as an essential resource for those seeking to enter the museum profession and for established professionals looking for an expanded understanding of their own discipline. Now Mary Alexander has produced a newly revised edition of the classic text, bringing it to the twenty-first century with coverage of emerging trends, resources, and challenges. New material also includes a discussion of the children's museum as a distinct type of institution and an exploration of the role computers play in both outreach and traditional in-person visits.

Cat Tale Craig Pittman, 2020-01-21. A Garden of Eatin' Best Book of 2020. Witty and passionate. Lauren Groff. Craig Pittman has a remarkable talent for telling stories set in the Sunshine State that never fail to fascinate and entertain. Gilbert King. The definitive book on one of America's least understood apex predators. The story of how Florida's panthers were saved from extinction is one that both deserves and needs to be told. Dane Huckelbridge. The captivating tale of the Florida panther, its survival and rescue from extinction. With novelistic detail and an eye for the absurd, Craig Pittman recounts the extraordinary story of the people who brought the panther back from the brink of extinction, the ones who nearly pushed the species over the edge, and the cats that were caught in the middle. This being Florida, there's more than a little weirdness, too. An engrossing narrative of wry humor, sharp writing, and exhaustive reportage. **Cat Tale** shows what it takes to bring one species back and what unexpected costs such a decision brings.

A God More Powerful Than Yours Christopher W. Boerl, Katie Donbavand, 2015-09-18. Throughout American history, religious movements have repeatedly proved themselves to be powerful forces capable of masterfully manipulating the social and political landscape of the nation. Key to the influence religious organizations have historically held in the United States is their use of communication technologies. In this vivid account, Christopher Boerl and Katie Donbavand adroitly weave a rich narrative illuminating the effects various historical phenomena have had and the reactionary religious response which followed. Through shifting social norms and political realities, the authors also show the role media has played in nurturing religious movements and fanaticism. Broadcast media, in particular, is identified as a unique conduit through which the now dominant conservative articulation of Christianity both took root in the United States and flourished as an imposing cultural standard. More recently, new communication technologies such as the Internet and social media have usurped the reign of broadcast media. In so doing, these technologies are serving as a form of religious pluralization and theological fragmentation. In short, new communications technologies are fragmenting a once homogenous religious body and, in so doing, proving that some gods are more powerful than others.

Ethics on the Ark Bryan G. Norton, Michael Hutchins, Terry Maple, Elizabeth

Stevens,2012-01-11 Ethics on the Ark presents a passionate multivocal discussion among zoo professionals activists conservation biologists and philosophers about the future of zoos and aquariums the treatment of animals in captivity and the question of whether the individual the species or the ecosystem is the most important focus in conservation efforts Contributors represent all sides of the issues Moving from the fundamental to the practical from biodiversity to population regulation from animal research to captive breeding Ethics on the Ark represents an important gathering of the many fervent and contentious viewpoints shaping the wildlife conservation debate

Federalism, Preemption, and the Nationalization of American Wildlife Management Lowell E. Baier,2022-03-30 Environmental law expert Lowell E Baier reveals how over centuries the federal government preempted the states authority over managing their resident wildlife He shows the precedents that led to the current state of wildlife management and how to foster a constructive environment at all levels of government to improve wildlife and biodiversity

The Ark and Beyond Ben A. Minteer,Jane Maienschein,James P. Collins,2018-02-23 Scores of wild species and ecosystems around the world face a variety of human caused threats from habitat destruction and fragmentation to rapid climate change But there is hope and it too comes in a most human form zoos and aquariums Gathering a diverse multi institutional collection of leading zoo and aquarium scientists as well as historians philosophers biologists and social scientists The Ark and Beyond traces the history and underscores the present role of these organizations as essential conservation actors It also offers a framework for their future course reaffirming that if zoos and aquariums make biodiversity conservation a top priority these institutions can play a vital role in tackling conservation challenges of global magnitude While early menageries were anything but the centers of conservation that many zoos are today a concern with wildlife preservation has been an integral component of the modern professionally run zoo since the nineteenth century From captive breeding initiatives to rewilding programs zoos and aquariums have long been at the cutting edge of research and conservation science sites of impressive new genetic and reproductive techniques Today their efforts reach even further beyond recreation with educational programs community based conservation initiatives and international collaborative programs designed to combat species extinction and protect habitats at a range of scales Addressing related topics as diverse as zoo animal welfare species reintroductions amphibian extinctions and whether zoos can truly be wild this book explores the whole range of research and conservation practices that spring from zoos and aquariums while emphasizing the historical scientific and ethical traditions that shape these efforts Also featuring an inspiring foreword by the late George Rabb president emeritus of the Chicago Zoological Society Brookfield Zoo The Ark and Beyond illuminates these institutions growing significance to the preservation of global biodiversity in this century
