Sir William Rooke Creswell and the Foundation of the Australian Navy Sheila Dwyer, 2014-03-26 The six Australian colonies united on 1st January 1901 to become the Commonwealth of Australia One of the reasons given for this federation was that the Commonwealth could provide a common defence William Rooke Creswell argued that as an island continent Australia could not defend itself without a navy He saw no point in having a 70 000 strong army if only one enemy battleship could destroy port cities and disrupt maritime trade and sea communications Creswell was not alone in his campaign to establish a navy for Australia but he was the one constant advocate throughout the years from his first proposals on a navy for Australia in 1886 to when the first ships of the Australian Fleet sailed into Sydney Harbour in October 1913

National Identity and Social Cohesion in a Time of Geopolitical and Economic Tension: Australia - European Union - Slovenia Robert Walters, 2020-02-26 This book aims to enrich the thinking and discussion in relation to the importance that citizenship immigration rights and private laws play in the modern world This is in a time when social cohesion and national identity is being challenged It will explore the impact these laws have had on Australia European Union EU and Slovenia Identity and social cohesion are contested concepts and can invoke different responses The challenges states and the EU are likely to face in retaining and even strengthening their respective identities and social cohesion from continued geopolitical shocks security economic volatility and environmental degradation is likely to be formidable These alone pose some of the most complex political and policy issues facing the world The EU can be held up as a polity that has developed an identity and level of cohesion while allowing member states to retain their national identities It has to date also been successful in managing the rise of nationalism However that has come under threat in recent times Thus the very foundations of liberal democracy could be diluted from the impact of these challenges Moreover the basic foundations of rights have in part already been diluted from the rise of terrorism which is acceptable however the geopolitical differences pose a significant challenge in and of themselves

Science, Sexuality, and Race in the United States and Australia, 1780s-1890s Gregory D. Smithers, 2013-02-01 This book combines transnational history with the comparative analysis of racial formation and reproductive sexuality in the settler colonial spaces of the United States and British Australia Specifically the book places whiteness and the changing definition of what it meant to be white in nineteenth century America and Australia at the center of our historical understanding of racial and sexual identities In both the United States and Australia whiteness was defined in opposition to the imagined cultural and biological inferiority of the Indian Negro and Aboriginal savage Moreover Euro Americans and Euro Australians shared a common belief that whiteness was synonymous with the extension of settler colonial civilization Despite this two very different understandings of whiteness emerged in the nineteenth century The book therefore asks why these different racial understandings of whiteness and the quest to create culturally and racially homogeneous settler civilizations developed in the United States and Australia

Fears and Fantasies Kate Murphy, 2010 *Fears and Fantasies* Modernity Gender and the Rural Urban Divide explores the ways in which fantasies about returning to or revitalising rural life helped to define Western modernity in the early twentieth century Scholarship addressing responses to modernity has focused on urban space and fears about the effects of city life few studies have considered the rural to be as critical as the urban in understanding modernity This book argues that the rural is just as significant a reference point as the urban in discourses about modernity Using a rich Australian case study to illuminate broader international themes it focuses on the role of gender in ideas about the rural urban divide showing how the country was held up against the unnatural city as a space in which men were more masculine and women more feminine *Fears and Fantasies* is an innovative and important contribution to scholarship in the fields of history and gender studies

Breaking Point Peter Seamer, 2019-02-05 The way we plan and build cities in Australia needs to change Australia's population is growing between 2017 and 2046 it is projected to increase by 11.8 million the equivalent of adding a city the size of Canberra each year for thirty years Most of this growth will occur in the major cities and already its effects are being felt inner city property prices are skyrocketing and the more affordable middle and outer suburbs lack essential services and infrastructure The result is inequality while wealthy inner city dwellers enjoy access to government subsidised services public transport cultural and sporting facilities new home buyers pushed further out pay the lion's share of the costs So how can we create affordable housing for everyone and still get them to work in the morning What does sustainable urban development look like In this timely critique of our nation's urban development and planning culture Peter Seamer argues that vested interests often distort rational thinking on our cities Looking to the future he sets out cogent new strategies to resolve congestion transport and expenditure problems offering a blueprint for multi-centred Australian cities that are more localised urban and equitable in nature

The Holocaust and Australia Paul R. Bartrop, 2022-07-28 Paul R Bartrop examines the formation and execution of Australian government policy towards European Jews during the Holocaust period revealing that Australia did not have an established refugee policy as opposed to an immigration policy until late 1938 He shows that following the Evian Conference of July 1938 Interior Minister John McEwen pledged a new policy of accepting 15 000 refugees not specifically Jewish but the bureaucracy cynically sought to restrict Jewish entry despite McEwen's lofty ambitions Moreover the book considers the largely negative popular attitudes toward Jewish immigrants in Australia looking at how these views were manifested in the press and in letters to the Department of the Interior The Holocaust and Australia grapples with how when the Second World War broke out questions of security were exploited as the means to further exclude Jewish refugees a policy incongruous alongside government pronouncements condemning Nazi atrocities The book also reflects on the double standard applied towards refugees who were Jewish and those who were not as shown through the refusal of the government to accept 90% of Jewish applications before the war During the war years this double standard

continued as Australia said it was not accepting foreign immigrants while taking in those it deemed to be acceptable for the war effort Incorporating the voices of the Holocaust refugees themselves and placing the country's response in the wider contexts of both national and international history in the decades that have followed Paul R Bartrop provides a peerless Australian perspective on one of the most catastrophic episodes in world history **International Bibliography of Historical Sciences** ,1979 Verzeichnis der exzerpierten Zeitschriften 1926 p XXXI XVII
