History Of Chemistry in Ancient Turks (Yeditepe Yayınevi) Hakan Ertuğral, 2020-12-01 Generally outside of the academic word nomads are not considered as the part of the civilization process Most of the times due to the Eurocentric thoughts that were developed in the 19th century scientific and technological improvements of the humanity were considered unique to Europe Therefore other people that were conquered by European armies were thought that they were completely out of the civilization process and lived as barbarians because they did not live or think like Europeans According to this view if they will civilize or they can be considered as developed nation they had to live like Europeans at least they had to have same cultural attitudes or they must mimic This bias made hard to understand how other cultures lived and what they developed in their material culture However during the 20th century this linear and positivist understanding of history have been changed In this book first of all intellectual process on scientific progress was evaluated and then the place where the Turks could be placed in this progress was examined
