Whitley,2012-12-06 This volume of the Sociology of the Sciences Yearbooks stems from our experience that collaborations between non scientists and scientists often initiated by scientists seeking greater social relevance for science can be of major importance for cognitive development It seemed to us that it would be useful to explore the conditions under which such collaborations affect scientific change and the nature of the processes involved This book therefore focuses on a number of instances in which scientists and non scientists were jointly involved in the generation of scientific results at the interface of science and society Despite the considerable variety of cases reported here a number of questions are central Under what conditions do such cooperative processes occur What perceptions of social relevance and what sorts of collaborations with non scientific groups are involved How is this collaboration achieved and through what forums How can insights into its conditions and mechanisms stabilize such cooperations over a longer period of time If they are stabilized do they really affect science or do they mainly function to shield the rest of the science system against external influences These questions are pertinent both to intellectual problems in the sociology of science and to the practical concerns of modern science policies The significance of relations between knowledge producers and knowledge consumers and interest in how these relations affect science and society have changed considerably in recent decades **The Impasse Of European Communism** Carl Boggs,2019-07-11 The major Communist parties in Western Europe claim a commitment to a democratic road to socialism Often this is a genuine evolution of traditional Marxist Leninist ideology based on the assumption that political and economic power can be obtained through gradual change rather than revolution and through the utilization of democratic processes How well is this strategy working Not very well concludes the author of this book Carl Boggs bases his analysis on a theoretical assessment of the historical

and strategic development of Eurocommunism of those parties and movements notably in France Italy and Spain that seek a transition to socialism based on the democratization of existing political and economic structures the so called parliamentary road to socialism After examining the logic and premises of this conception he moves to a critique of the major Eurocommunist theoreticians e g Togliatti Berlinguer Ingrao Napolitano Carrillo Marchais Elleinstein Poulantzas and Claudin He concludes that their ideas fail to resolve the historic Marxist conflict between democratization and rationalization understood here in terms of the drive toward statism bureaucratization and further refinement of the social division of labor under capitalism In fact says Dr Boggs Eurocommunism will probably represent a sort of historical resolution of legitimation and production crises within Mediterranean capitalism that extends rather than overturns hierarchical social and authority relations the capitalist state and the social division of labor Such a resolution might broadly parallel the function of social democracy in Northern Europe in a previous phase of capitalist development

**Workers' Participation in Post-liberation France** Adam Steinhouse, 2001-01-01 Workers Participation in Post Liberation France is a vivid portrait of French labor's failure to achieve greater industrial democracy Drawing on original archival research Adam Steinhouse recasts the traditional view of this critical period of French history demonstrating the fundamental importance of the immediate post liberation period in determining the future course of industrial relations in France He brings to life the labor disputes of the 1940s charting the interplay between industry and politicians that dealt a crushing blow to organized labor's demands for political change Steinhouse captures the rise of state intervention in the economy and plots the growth of French employers organized intransigence in the face of workers collective action which culminated in a series of actions effectively marginalizing labor's voice in the economic boom of the early 1950s Steinhouse's impressive scholarship provides an excellent case study of the French state and its efforts to balance growing worker demands for representation with the imperatives of social peace and prosperity This book makes a significant contribution to modern French political history and the development of modern industrial relations

State Capitalism and Working-class Radicalism in the French Aircraft Industry Herrick Chapman, 1991-01-01 Using the example of the aircraft industry which takes him like an arrow to the heart of many of the key conflicts in French life between 1936 and 1948 Herrick Chapman has written a penetrating and exceptionally well documented account of the way that France developed her present style of industrial relations in which the state plays such a central role No book I know so successfully integrates the history of aviation with the political and social history of France Both thorough and thoughtful it is an impressive achievement Robert Wohl University of California Los Angeles An unusual innovative book based on impressive research that throws new light in a major way on twentieth century French politics and society one of the most interesting and original monographs in modern French history in a long time

**The National Origins of Policy Ideas** John L. Campbell, Ove K. Pedersen, 2014-04-27 In politics ideas matter They provide the foundation for economic policymaking which in turn shapes what is possible in domestic and international politics Yet until now little attention has been paid to how these ideas are produced and disseminated and how this process varies between countries The National Origins of Policy Ideas provides the first comparative analysis of how knowledge regimes communities of policy research organizations like think tanks political party foundations ad hoc commissions and state research offices and the institutions that govern them generate ideas and communicate them to policymakers John Campbell and Ove Pedersen examine how knowledge regimes are organized operate and have changed over the last thirty years in the United States France Germany and Denmark They show how there are persistent national differences in how policy ideas are produced Some countries do so in contentious politically partisan ways while others are cooperative and consensus oriented They find that while knowledge regimes have adopted some common practices since the 1970s tendencies toward convergence have been limited and outcomes have been heavily shaped by national contexts Drawing on extensive interviews with top officials at leading policy research organizations this book demonstrates why knowledge regimes are as important to capitalism as the state and the firm and sheds new light on debates about the effects of globalization the rise of neoliberalism and the orientation of comparative political economy in political science and sociology

positions and aims to shed light on the broad interplay between knowledge power economics and the political elite in Fascist Italy Utilizing original archival material this research presents new evidence on Beneduce s evolution as a politician scholar and financier Employing a multidisciplinary approach it sheds new light on his pivotal role within Mussolini s inner circle making a substantial contribution to ongoing debates about technocracy and its function in authoritarian regimes This book will be of interest to researchers of Italian fascism administrative and economic history      The Developmental State

Meredith Woo-Cumings,1999 The developmental state is one in which the government intervenes in industrial affairs Critics charge that Japan s success in implementing it has not been replicated elsewhere Here a team of scholars revisits the notion to assess its continued utility and establish a vocabulary for debate      *Models of Capitalism* Evelyne Huber,2002 Latin American societies have undergone fundamental changes in the past two decades moving from capitalist economies with very wide ranging state intervention to more market driven systems After a prolonged period of recession these changes produced some successes in economic growth in the 1990s but they also exacerbated many problems especially poverty and inequality Models of Capitalism examines why some societies with market economies perform much better than others in combining growth and equity and what the less successful countries can learn from the more successful ones The contributors look at different models of capitalism in Latin America Northeast and Southeast Asia and advanced industrial countries asking which patterns of economic and social policies governments in the more successful societies pursued and which configurations of institutions made pursuing such policies possible The investigation focuses on economic policies designed to stimulate growth on labor market policies designed to promote a qualified labor force and increase productivity and wages and on social policies designed to improve general human capital and to distribute life chances in an equitable way The volume is innovative in explicitly connecting the discussion of growth policies with an analysis of labor market and social policies and in going beyond comparison of Latin American with East Asian approaches to include reference to equity oriented policies in North America and Western Europe as well This approach helps demonstrate how important policy design is in determining distributive outcomes at any given level of development The contributors are Antonio Alas Renato Baumann Ha Joon Chang Carlos H Filgueira Fernando Filgueira Robert Grosse Thomas Janoski John Myles T J Pempel Wilson Peres David Brian Robertson John Sheahan John D Stephens V ctor E Tokman and Bridget Welsh Sponsored by the Joint Committee on Latin American Studies of the Social Science Research Council and the American Council of Learned Societies      *The Politics of Eurocommunism* Carl Boggs,David Plotke,1980 The authors consider the origins of Eurocommunism in the post war politics of Mediterranean Europe and the continuing process of de Stalinization and its effects on relations between the Communist Parties and other social movements and on the policies of the Soviet Bloc the USA and the EEC
