If I could only afford two books on modern China I would get this one. **The Cambridge History of China**, 1980 中国通史

中国, 1989 **Modern Chinese Literature in the May Fourth Era** Merle Goldman, 1977 One of the most creative and brilliant episodes in modern Chinese history the cultural and literary flowering that takes the name of the May Fourth Movement is the subject of this comprehensive and insightful book. This is the first study of modern Chinese literature that shows how China's Confucian traditions were combined with Western influences to create a literature of new values and consciousness for the Chinese people. Confucianism in Contemporary Chinese Politics Shanruo Ning Zhang, 2016-03-29 This book examines the ways in which Confucian political culture operates in contemporary Chinese politics and influences its development. The author argues that the authoritarian political culture performs functions similar to the democratic political culture drawing on a wide range of data surveys interviews archives Public Hearing Meeting records and the Party Congress Reports of the Chinese Communist Party to substantiate and illustrate these arguments. In an authoritarian political system the legitimating values of the authoritarian political culture persuade the public of their government's legitimacy and the engaging values equip individuals with a set of cultural dispositions resources and skills to acquire political resources and services from the state. In the context of Chinese politics personal connections infused with affection and trust the Social Capital in the Confucian culture facilitate political engagement. Despite the country's continuous advocacy for the rule of law state and public perceptions of legal professionals and legal practices such as mediation and lawyer judge relations are fundamentally moralized. A new people ideology which originated in the Confucian political culture has been reappropriated to legitimate the Party's hegemonic governing position and policies. Key Concepts in Practice Paul R. Katz, Stefania Travagnin, 2019-05-20 In recent years the

study of modern Chinese religions has developed into a highly innovative yet challenging field. One of the main reasons for

this involves an ongoing and largely unresolved debate regarding what methods and theories are appropriate for analyzing the wide range of beliefs and practices we encounter This series of three volumes is based on the conviction that in this critical period of research on modern Chinese religions it is time for scholars to review the development of our field reconsider its present state of theories and analytical models and open a new chapter in the understanding of methodologies we employ Our research is grounded on the need to re evaluate concepts and practices that inform both the religious sphere and contemporary scholarship including endogenous Chinese concepts and exogenous ideas from the West and Japan that have been foundational in shaping our knowledge of the Chinese religious landscape In this third volume of our series we examine a variety of key concepts through their praxis in modern Chinese lived religions **Senegal Business**
