## **Modern Constituency Electioneering Local Campaigning In The 1992 General Election:**

**Modern Constituency Electioneering** David Denver, Gordon Hands, 2013-10-23 In this study of grass roots election campaigning the authors survey the evolution of campaigning over the past century and describe how the parties organized their constituency campaigns in the 1992 election They examine and evaluate the campaign techniques used British Elections and Parties Review Philip Cowley, David Denver, Justin Fisher, Charles Pattie, 2013-01-11 After the Labour Party's landslide victory in 1997 the results were analyzed Issues at the top of the agenda included party leader image campaign strategy the sleaze factor the effect of the media and changes in the electoral geography of Britain This volume records the discussion

**Seats, Votes, and the Spatial Organisation of Elections** Graham Gudgin, Peter Taylor, 2024-10-31 In many elections especially those using single member constituency systems the allocation of seats is incommensurate with each party's share of the votes cast Seats Votes and the Spatial Organisation of Elections provides a convincing rigorous analysis of this disproportionality which has not been improved on since its publication over 30 years ago Its formal analysis illustrated by empirical examples from a range of countries stresses the importance of three geographies as key influences on how votes are translated into seats the geography of partisan support where people with different political persuasions cluster the homogeneity of those clusters and their relative size Its re-publication makes this classic piece of spatial political science available to contemporary audiences for whom it is as relevant as when the book first appeared in 1979 Ron Johnston's introductory essay sets the work in context and identifies its importance as the foundation for three decades of subsequent work into this key feature of electoral system operation

**Communicating and Strategising Leadership in British Elections** Alia Middleton, 2021-03-17 This book concentrates on the leaders of the Conservatives Labour and Liberal Democrats in British general election campaigns between 2010 and 2019 by exploring where they visit during the campaign and why the impact they have and how leadership is represented in the Press It establishes the key strategic underpinnings for their visits and the types of activities they undertake in a uniquely British context The degree to which leaders and their visits form an important dimension of voter behaviour is also considered Moreover the book explores how the Press delve into the personal lives of lesser known opposition leaders and scrutinise the policies of Prime Ministers The types of visits by leaders that become newsworthy are identified alongside their importance as a framing tool in election reporting Beyond the leaders themselves press reporting on their personal relationships is scrutinised showing an increased acceptance of active partnership

Money and Electoral Politics Johnston, Ron, Pattie, Charles, 2014-05-07 Political parties are crucial to British democracy providing the foundations for mobilising voters Their constituency branches are key links between voters and Parliamentary candidates and their activities require two vital resources people and money Much has been written on the decline of party membership but far less on money In this much needed new book Ron Johnston and Charles Pattie use the latest research and hitherto unpublished material to explore financial differences across the UK's three main parties in the

four years leading up to the 2010 General Election They look at how much local parties raise for election campaigns and find that the more money candidates spend then the better their performance Analyses of their annual accounts however show that many local parties are unable to raise all of the money that they are entitled to spend on such campaigns This reveals an unhealthy picture of grassroots party organisation in which the capacity to engage effectively with many voters is concentrated in a relatively small number of constituencies and is likely to remain so This timely and essential book will make a major contribution to the literature on British elections and parties especially to continuing debates regarding party funding It will make important reading for academics students politicians civil servants and others interested in this topic

**Electing Our Masters** Jon Lawrence, 2009-03-26 In this engagingly written history of electioneering in Britain from the eighteenth century to the present Jon Lawrence explores the changing relationship between politicians and public Throughout this period he argues British politics has been characterized by bruising public rituals intended to bestow legitimacy on politicians by obliging them to face an often irreverent public on broadly equal terms Face to face interaction was central both to the disorderly civic rituals of eighteenth century politics and to the Victorian and Edwardian election meeting Perhaps surprisingly it also survived in pretty rude health between the wars despite the emergence of the new mass communication media of radio and cinema But the same cannot be said of the post war era and the rise of television Today most politicians are content merely to offer the semblance of meaningful engagement walkabouts canvassing and meetings are all designed to ensure that most senior politicians come into contact only with the smiling faces of that dwindling band the party faithful Lloyd George and Churchill might have relished the rough and tumble of a tumultuous public meeting but their modern counterparts tend to be more risk averse and not without reason given that the cameras are always present to capture their mishaps But this is not another nostalgic lament for a lost golden age On the contrary Electing Our Masters argues that politicians frequently still crave the kudos to be derived from bruising encounters with an irreverent public hence Tony Blair s so called masochism strategy in the 2005 election campaign with its succession of gruelling sessions before live studio audiences As Lawrence points out the vital question for today is can we persuade our broadcasters that such encounters must form a staple of modern mediated politics

**UKIP** Matthew Goodwin, Caitlin Milazzo, 2015-11-26 The UK Independence Party Ukip is the most significant new force in British politics for a generation Under the leadership of Nigel Farage the party has enjoyed a remarkable rise winning the 2014 European Parliament elections as well as two parliamentary by elections and attracting mainstream defectors to achieve major party status By the time of the 2015 general election Farage and Ukip stood on the threshold of becoming a major force at Westminster This account is a must read for anyone interested in the inside story of Ukip s quest to change British politics during one of the most unpredictable and dramatic elections in recent history Based

on unprecedented access to the party and its key players the book pulls back the curtain on one of the most intriguing campaigns in living memory It includes behind the scenes observations from the campaign trail and more than one hundred interviews with leading Ukip insiders such as Nigel Farage Douglas Carswell and Mark Reckless as well as major donors strategists and figures from across the political landscape as they grappled with Ukip's rise Matthew Goodwin and Caitlin Milazzo reveal what really happened during the 2015 election campaign and in the by elections and defections which preceded it providing detailed accounts of the critical moments that shaped both the election itself and British politics more widely The book also makes extensive use of British Election Study data from over five decades to answer important questions about the rise of Ukip and what it signifies Who voted for Ukip and why How are political loyalties in Britain changing over time What are the deeper currents that have made Ukip's rise possible and will continue to shape its future And what does the party's campaign for power reveal about the current evolution of British politics and society UKIP takes readers inside the campaign telling for the first time the exciting inside story of a new party attempting to redraw the map of British politics

Political Marketing Darren G. Lilleker, Jennifer Lees-Marshment, 2005-08-06 Political marketing has become a global phenomenon as parties try to copy the market oriented approach employed by Tony Blair to win power for New Labour in 1997 It raises fresh perspectives on the more established political marketing practices in the UK and US such as how to incorporate political leadership within the market oriented framework and the democratic implications when faced with the actual business of governing This book also highlights how the market oriented party approach has spread around the world including Europe and the new democracies of Brazil and Peru The collection also introduces the debate on whether such practices enhance or undermine democracy raising important questions on the future of political marketing

Media and the Presidentialization of Parliamentary Elections Anthony Mughan, 2000-10-10 In theory parliamentary elections are a contest between political parties whose leaders do not have a separate identity from their party in the public eye This case study of Britain shows that this theory no longer holds the dynamics of parliamentary elections have become more presidential in the sense that the leaders of the major parties now figure more prominently on both media coverage of the campaign and in the party that voters choose at the polls The implications for our understanding of parliamentary democracy are discussed

Phoenix Pippa Norris, 2002-09-02 Conventional wisdom suggests that citizens in many countries have become disengaged from the traditional channels of political participation Commentators highlight warning signs including sagging electoral turnout rising anti party sentiment and the decay of civic organizations But are these concerns justified This book compares systematic evidence for electoral turnout party membership and civic activism in countries around the world and suggests good reasons to question assumptions of decline Not only is the obituary for older forms of political activism premature but new forms of civic engagement may have emerged in modern societies to supplement traditional modes The process of societal modernization and rising levels of human capital are primarily responsible although participation is also explained by the structure of the state the role of agencies and social inequalities A Companion to Political Geography John A. Agnew, Katharyne Mitchell, Gerard Toal, 2008-04-15 A Companion to Political Geography presents students and researchers with a substantial survey of this active and vibrant field Introduces the best thinking in contemporary political geography Contributions written by scholars whose work has helped to shape the discipline Includes work at the cutting edge of the field Covers the latest theoretical developments **When the Nerds Go Marching in** Rachel Gibson, 2020 This is an open access title available under the terms of a CC BY NC ND 4.0 International license It is free to read at Oxford Scholarship Online and offered as a free PDF download from OUP and selected open access locations Digital technology has moved from the margins to the mainstream of campaign and election organization in contemporary democracies Previously considered a mere novelty item technology has become a basic necessity for any candidate or party contemplating a run for political office While it is difficult to pinpoint exactly when the first digital campaign was officially launched the general consensus is that the breakthrough moment at least in terms of public awareness came during the 1992 U S election cycle At the presidential level it was Democratic nominee Bill Clinton who laid claim to this virtual terra nova after his staff uploaded a series of basic text files with biographical information for voters to browse Since that time use of the internet in elections has expanded dramatically in the U S and elsewhere *When the Nerds Go Marching In* examines the increasing role and centrality of the internet within election campaigns across established democracies since the 1990s Combining an extensive review of existing literature and comparative data sources with original survey evidence and web content analysis of digital campaign content across four nations the UK Australia France and the U S the book maps the key shifts in the role and centrality of the internet in election campaigns over a twenty year period Specifically Gibson sets out the case for four phases of development in digital campaigns from early amateur experimentation and standardization to more strategic mobilization of activists and voters In addition to charting the way these developments changed external interactions with citizens Gibson details how this evolution is transforming the internal structure of political campaigns Despite some early signs that the internet would lead to the devolution of power to members and supporters more recent developments have seen the emergence of a new digitally literate cohort of data analysts and software engineers in campaign organizations This group exercises increasing influence

over key decision making tasks Given the resource implications of this new data driven mode of digital campaigning the book asserts that smaller political players face an even greater challenge to compete with their bigger rivals Based on her findings Gibson also speculates on the future direction for political campaigns as they increasingly rely on digital tools and artificial intelligence for direction and decision making during elections      **Voters or Consumers** Darren Lilleker, Richard

Scullion, 2009-05-05 This edited collection seeks to map current thinking and practice in order to assess the extent to which the consumer as opposed to the voter should now be elevated to a central position within our understanding of the relationship between the public and political spheres The volume will firstly offer an overview of how consumerism has been applied to our understanding of political and voter behaviour so outlining the book's key concepts The volume then follows a processual approach to developing its analysis offering essays that explore contrasting critical perspectives on the topic The group of essays focus on conceptualising political consumerism the next look at how political organisations use the tools of positioning and branding so developing an overview of consumer driven political behaviour The focus then moves to the nature of political communication both by parties and the media and how this reflects the neo liberal ontological perspective that encourages voting to be treated as part of consumer behaviour Finally the book turns to the voter consumer looking firstly at the processing of messages and how this can be analysed from a consumerist perspective and finally on voting behaviour itself exploring the extent to which rational choice and economic models of voting have been increasingly a reflection of a consumerist perspective Each chapter will approach the subject from a discrete perspective which will be outlined within its introduction However the chapters will each explore the following Whether parties or voters are approaching one another using consumerist perspectives How this can be mapped empirically through specific examples or case studies The extent to which consumer behaviour models and perspectives help us understand voter or party behaviour
