**Modern France** Edward Mead Earle, 1951      Modern France Edward Mead Earle, 1964      **Three Against the Third Republic** Michael Curtis, 2017-07-28 The Third Republic of France was characterized by weak and short term governments This book is a study of three writers Georges Sorel Maurice Barres and Charles Maurras their writings in the years between 1885 and 1914 and their reactions to the deficiencies they saw in the Third Republic and in the system of French democracy The study begins in 1885 with the appearance of certain new political factors It ends in 1914 because the three writers had by this time completed their original contributions to the thought of the country even if not their total impact on France A relative position of each of these figures in the French political spectrum is deduced from a combination of attitudes toward a number of issues These include the extent of economic and social reform centralization of the power of the state the nature of the parliamentary system the desirability of political parties the relation of Church and State the responsibility of authority the use of force or coercion and national power versus international collaboration Their views span the political spectrum Sorel Barres and Maurras are important not only because they provided the chief ideological weapons for the attack on the regime but also in a wider context because they contribute significantly to understanding of a later period of European political history In their contemporary significance all three illustrated the various attitudes of the conservative the reactionary and the moralist The names and parties may have changed but the same ideas continue to impact French politics and western ideology today This is a key book for an epoch whose importance lingers in current discourse      **Encyclopedia of Modern French Thought** Christopher John Murray, 2013-01-11 In this wide ranging guide to twentieth century French thought leading scholars offer an authoritative multi disciplinary analysis of one of the most distinctive and influential traditions in modern thought Unlike any other existing work this important work covers not only philosophy but also all the other major disciplines including literary theory sociology linguistics political thought theology and more      Affluence and the French Worker in the Fourth Republic Richard F. Hamilton, 2017-03-14 The basic concern of the author is to find the reason for the persistent leftist character of French working class politics in a period of rapid industrialization and improving living standards Reanalyzing material from surveys made by two French organizations he finds that increased affluence is correlated with changes in social structure that increase radicalism As rural and small town workers come into big cities and large plants they are influenced by political activists who provide them with a Communist frame of reference for interpreting the meaning of new affluence Originally published in 1967 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905      *The Republic in Danger*

Martin S. Alexander, 2003-11-13 The first full length study in English of the man who lost the Battle of France *New Men, New Cities, New South* Don H. Doyle, 2014-03-24 Cities were the core of a changing economy and culture that penetrated the rural hinterland and remade the South in the decades following the Civil War In *New Men New Cities New South* Don Doyle argues that if the plantation was the world the slaveholders made the urban centers of the New South formed the world made by merchants manufacturers and financiers The book s title evokes the exuberant rhetoric of New South boosterism which continually extolled the new men who dominated the city building process but Doyle also explores the key role of women in defining the urban upper class Doyle uses four cities as case studies to represent the diversity of the region and to illuminate the responses businessmen made to the challenges and opportunities of the postbellum South Two interior railroad centers Atlanta and Nashville displayed the most vibrant commercial and industrial energy of the region and both cities fostered a dynamic class of entrepreneurs These business leaders collective efforts to develop their cities and to establish formal associations that served their common interests forged them into a coherent and durable urban upper class by the late nineteenth century The rising business class also helped establish a new pattern of race relations shaped by a commitment to economic progress through the development of the South s human resources including the black labor force But the new men of the cities then used legal segregation to control competition between the races Charleston and Mobile old seaports that had served the antebellum plantation economy with great success stagnated when their status as trade centers declined after the war Although individual entrepreneurs thrived in both cities their efforts at community enterprise were unsuccessful and in many instances they remained outside the social elite As a result conservative ways became more firmly entrenched including a system of race relations based on the antebellum combination of paternalism and neglect rather than segregation Talent energy and investment capital tended to drain away to more vital cities In many respects as Doyle shows the business class of the New South failed in its quest for economic development and social reform Nevertheless its legacy of railroads factories urban growth and changes in the character of race relations shaped the world most southerners live in today Leon Blum Joel Colton, 2013-07-10 John Colton is a meticulous researcher and a fine craftsman In his political biography of Leon Blum these two qualities are beautifully blended none of the available evidence appears to have been over looked and the enormous mass of variegated material has been transmuted in a polished richly tapestried and absorbing narrative **Bibliography of European Economic and Social History** Derek Howard Aldcroft, Richard Rodger, 1993 This bibliographical guide contains 10 000 references to the economic and social history of 30 European countries during the period 1700 1939 More than 3000 periodicals have been consulted to obtain references as well as books edited collections and conference proceedings The information is listed in categories such as industry agriculture finance migration labour conditions urban communities and organizations Full publication details are included so that references may be located easily *National Negotiating Styles* Hans A. Binnendijk, 1995-02 Provides a profile of each national

negotiating style for China the Soviet Union Japan France Egypt and Mexico Reviews each nation s historical and institutional setting the characteristics of its political culture the style of the negotiators themselves and national strategies and tactics Suggests bargaining guidelines for U S negotiators      **National Negotiating Styles** Hans Binnendijk,1987

Industrial Crisis and the Open Economy G. Underhill,2016-07-27 Written in the context of contemporary theoretical debate in international political economy this book overturns a number of myths about the political economy of trade in one of the oldest areas of industry In this way the author systematically links the changing characteristics of the trade regime to structural change and adjustment in global industry He argues that state policy processes international regimes and the industrial adjustment strategies of firms must be conceptualised as integrated processes of governance cutting across levels of analysis in the global political economy      *Clermont de Lodève 1633-1789* J. K. J. Thomson,2003-09-25 Describes the economic and social manifestations of the two cycles of prosperity and decline in Clermont de Lod ve      From the Nation State to Europe Anand Menon,Vincent Wright,2001 The relationship between the European Union and its member states is complex and evolving This book explores not only the nature of this relationship but also the broader implications of European integration for the ways in which the subject of European politics is studied      Making Makers Michael P. M. Finch,2024-05-07 Making Makers presents a comprehensive history of a seminal work of scholarship which has exerted a persistent attraction for scholars of war and strategy Makers of Modern Strategy It reveals the processes by which scholars conceived and devised the book considering both successful and failed attempts to make and remake the work across the twentieth century and illuminating its impact and legacy It explains how and why these influential volumes took their particular forms unearths the broader intellectual processes that shaped them and reflects on the academic parameters of the study of war in the twentieth century In presenting a complete genesis of the Makers project in the context of intellectual trends and historical contingency this book reflects on a more complex and nuanced appraisal of the development of scholarship on war In so doing it also offers contributions to the intellectual biographies of key figures in the history of war in the twentieth century such as Edward Mead Earle Peter Paret Gordon Craig and Theodore Ropp Making Makers contributes to an intellectual history of military history and contextualises the place of history and historians in strategic and security studies It is not only a history of the book but a history of the networks of scholars involved in its creation their careers and lines of patronage crossing international boundaries from Europe to the USA to Asia and Australia It is an investigation of ideas individuals and groups of work completed and scholarship produced as well as contingency and opportunities missed

Privilege Gail Bossenga, 2002-05-09 This study analyzes the political and fiscal origins of the French Revolution by looking at the relationship between the royal government and privileged corporate bodies at local level Utilizing a neo Tocquevillian approach it argues that the monarchy undermined its own attempts at reform by extending central authority while at the same time it continued to rely upon corporate structures and monopolies to finance the state The unresolvable institutional conflicts had the effect of politicising members of the privileged elite and eventually led many of them to embrace a rhetoric of citizenship accountability and civic equality that had far reaching and unanticipated consequences When Lille s bourgeoisie consolidated a municipal revolution in 1789 they followed a programme that was politically liberal but economically conservative Arranged as a series of case studies the book illuminates the structure of political power in the Flemish provincial estates the growth of royal taxation the problem of municipal credit the role of venal officeholders and the relationship of the revolutionary bourgeoisie to monopolies of the guilds Politics, Economics, and Welfare Robert A. Dahl, 2017-09-29 For most of this century the habit of thinking about politics and economics in terms of grand and simple alternatives has exerted a powerful influence over the minds of those concerned with economic organization Politics Economics and Welfare is a systematic attack on the idea of all embracing ideological solutions to complex economic problems **Disjoined Partners** Peter Katzenstein, 2024-07-26 Is there a natural tendency toward the political integration of states that are united in culture but divided in politics Disjoined Partners arrives at a largely negative response In an application of political science techniques to a subject traditionally in the domain of history Peter J Katzenstein analyzes Austro German relations since 1815 in six chronologically arranged case studies Asking why these partners remain disjoined Katzenstein finds the answer in the persistence of Austria s political autonomy In an appendix the author illustrates how this type of analysis could be extended to include an examination of the unification of Germany and of Italy in the middle of the nineteenth century and of the fragmentation of Sweden Norway and England Ireland at the beginning of the twentieth His study sheds new light on the reasons for the continued political autonomy of nation states Disjoined Partners derives from the author s dissertation which was awarded the Charles Sumner Prize at Harvard and the American Political Science Association s Helen Dwight Reid Award for the best dissertation of the year in the field of international relations law and politics This title is part of UC Press s Voices Revived program which commemorates University of California Press s mission to seek out and cultivate the brightest minds and give them voice reach and impact Drawing on a backlist dating to 1893 Voices Revived makes high quality peer reviewed scholarship accessible once again using print on demand technology This title was originally published in 1976 **After Progress** Norman Birnbaum, 2002-07 Here Birnbaum traces the decline and fall of social reform in Europe and America He shows for example that William Howard Taft railed against socialism by which he meant anything restricting the market
