Many of the molecules that we smell every day existed long before any creature was around to smell them before there was even a planet for those creatures to live on Beginning with the origins of those molecules in interstellar space McGee moves onward through the smells of our planet the air and the oceans the forest and the meadows and the city all the way to the smells of incense perfume wine and food Here is a story of the world of every smell under our collective nose A work of astounding scholarship and originality *Nose Dive* distills the science behind the smells and translates it as only McGee can into an accessible and entertaining guide Incorporating the latest insights of biology and chemistry and interweaving them with personal observations he reveals how our sense of smell has the power to expose invisible intangible details of our material world and trigger in us feelings that are the very essence of being alive
