Architectural Conservation in Asia John H. Stubbs, Robert G. Thomson, 2016-11-10 At a time when organized heritage protection in Asia is developing at a rapid pace Architectural Conservation in Asia provides the first comprehensive overview of architectural conservation practice from Afghanistan to the Philippines The country by country analysis adopted by the book draws out local insights experiences best practice and solutions for effective cultural heritage management that will inform study and practice both in Asia and beyond Whereas architectural conservation in much of the Western world has been extensively documented this book brings together coverage of many regions where architectural conservation has been understudied Following on from the highly influential companion volumes on global architectural conservation and architectural conservation in Europe and the Americas with this book the authors extend their pioneering global examination to the dynamic and evolving field of architectural conservation in Asia Throughout the book the authors and regional experts provide local case studies and profile topics that bring depth and insight to this ambitious study As architectural conservation becomes increasingly global in practice this book will be of considerable assistance to architectural conservation practitioners site managers and students of architecture planning archaeology and heritage studies worldwide Jahrbuch 2022 der Deutschen Gesellschaft für Geschichte der Sportwissenschaft e.V. international movement with the essence of their own country Today Japan is one of the growth points of world architecture Why this sudden surge of sophistication How could so many Japanese architects step up so quickly and with such unison into command of the modern building arts and technologies How genuine is their style The question of its validity and the reasons for its rapid maturation provide the theme underlying this study of the new direction which Japanese architecture is now forcefully taking Robin Boyd finds some reasons in the inescapable if indirect influences of Japan's great architectural traditions some in the social background of today and some in the special kind of insularity which colors the Japanese experience poised as they see it between East and West The new work of a number of Japanese architects is illustrated and analyzed Some of these architects are world famous all are working in the forefront of national development and share responsibility for the vigor and promise that cannot fail to excite a visitor from the West **The Making of a Modern**
