This book challenges certain differences between contract tort and equity in relation to the measure in a broad sense of damages Damages are defined as the monetary award made by a court in consequence of a breach of contract a tort or an equitable wrong In all these causes of action damages usually aim to put the claimant into the position the claimant would be in without the wrong Even though the main objective of damages is thus the same for each cause of action their measure is not While some aspects of the measure of damages are more or less harmonised between contract tort and equity e g causation in fact and mitigation significant differences exist in relation to 1 remoteness of damage which is the question of whether when and to which degree damage needs to be foreseeable to be recoverable 2 the compensability of non pecuniary loss such as pain and suffering distress and loss of reputation 3 the effect of contributory negligence which is the victim's contribution to the occurrence of the wrong or the ensuing loss through unreasonable conduct prior to the wrong 4 the circumstances under which victims of wrongs can claim the gain the wrongdoer has made from the wrong and 5 the availability and scope of exemplary or punitive damages For each of the five topics this book examines the present position in contract tort and equity and establishes the differences between the three areas It goes on to scrutinise the arguments in defence of existing differences The conclusion on each topic is that the present differences between contract tort and equity cannot be justified on merits and should be removed through a harmonisation of the relevant principles *Commentaries on the Law of Contracts: Operation and interpretation* William Frederick Elliott,1913 **Commentaries on the Law of Contracts** William Frederick Elliott,1913 **Selections from Williston's Treatise on the Law of Contracts** Samuel Williston,1920 **The New French Law of Contract** Solène Rowan,2022-08-01 After being almost untouched for over 200 years the contract law section of the French Civil Code was overhauled in 2016 and 2018 The New French Law of Contract describes explains and analyses the new general principles of contract law in the reformed Code in a concise and stimulating way The areas covered include contract formation validity the interpretation and supplementation of terms the regulation of unfair terms privity of contract change of circumstances breach of contract and remedies The book examines the ways in which the new articles affirm or depart from the provisions of the 1804 Code and pre reform case law giving special attention to changes that have proved to be controversial and the debates that surround them It also considers the various influences that have shaped the reforms in particular those from international contract law instruments such as the Principle of European Contract Law and the UNIDROIT Principles Written from the standpoint of a common lawyer the book is designed to help readers from a common law background to navigate the innovations in the reforms and the new French law of contract that emerges It is essential reading for students researchers practitioners law makers and judges with an interest in comparative law Contract Law John Cartwright,2023-08-24 The fourth edition of this acclaimed textbook addresses the developments in English contract law since the last edition including the impact of the withdrawal of the UK from the
