Gaztambide, 2025-06-13 This book sheds light on an as yet unstudied aspect of The Museum of Modern Art's MoMA preeminent role in establishing the definition of the problematic term Latin American art in the United States from the 1930s to the present through its collection displays In examining the shifting categorization of Latin American works according to stylistic and geographic taxonomies we gain a greater understanding of the organization of the Museum's collections as a whole during the 1940s and 1950s This book is the first to document these institutional precedents crucial for the understanding of the articulation of a Modernist canon and its contested legacy today The MoMA is widely recognized as the preeminent institution that defined 20th century art through its collection shaping our understandings of the history of art with its hierarchies and exclusions as they sediment over time MoMA's holdings of art from Latin America shed light on a key period when the stylistic categories that have since come to be accepted by many today as the Modernist canon developed MoMA's collection displays suggest ways in which artists from areas of the world formerly excluded can be incorporated within today's increasingly global museums MoMA's approach may be compared to initiatives adopted by several museums since the 2000s creating geographically defined curatorial positions as a way to redress gaps in collecting art from Latin America and other areas of the world In this book author Miriam M Basilio Gaztambide offers a closer study of the history of collection displays as a means to understand canon formation in modern art museums This work will be of interest to those researching Latin American American modern and contemporary art and curatorial and museum studies **Painting and**

Exhibiting Italian Art in the United States from Futurism to Arte Povera Raffaele Bedarida,2022-06-28 This volume explores how Italian institutions dealers critics and artists constructed a modern national identity for Italy by exporting literally and figuratively contemporary art to the United States in key moments between 1929 and 1969 From artist Fortunato Depero opening his Futurist House in New York City to critic Germano Celant launching Arte Povera in the United States Raffaele Bedarida examines the thick web of individuals and cultural environments beyond the two more canonical movements that shaped this project By interrogating standard narratives of Italian Fascist propaganda on the one hand and American Cold War imperialism on the other this book establishes a more nuanced transnational approach The central thesis is that beyond the immediate aims of political propaganda and conquering a new market for Italian art these art exhibitions publications and the critical discourse aimed at American audiences all reflected back on their makers they forced and helped Italians define their own modernity in relation to the world s new dominant cultural and economic power The book will be of interest to scholars working in art history social history exhibition history and Italian studies
