Sustainability of Young Companies-Contemporary Trends and Challenges Marek Jabłoński,2019-07-11

Ensuring the sustainability of early stage companies and increasing awareness of the need for balancing targets against different stakeholder groups among young companies are not well developed Young companies in the first place want to achieve financial success very often without regard for aspects such as the environment positive relationships with employees suppliers or other stakeholder groups fulfilling requirements of labor law etc Another issue is that of companies whose business models are based on actuarially preferred concepts such as sharing economy sustainable development e commerce renewable energy social media and others A key issue is the resignation of companies from an approach to business based on the foundations of classical economics to the sharing economy Theory and practice seek new solutions in the sphere of value sharing in these new areas of sharing and innovative forms of its implementation Intriguing is the relationship of these business models with sustainability issues as well as wondering how technology can influence sustainability A contemporary approach to consumer value fits in with the assumption of a shared economy It is interesting how it affects the assumptions of sustainability of business The ongoing changes in the value system of potential consumers create new conditions for the design of sustainability business models and creation of innovation

A fusion of decision-making method and neutrosophic linguistic considering multiplicative inverse matrix for coastal erosion problem Azzah Awang, Lazim Abdullah, Ahmad Termimi Ab Ghani, Nur Aidya Hanum Aizam, Mohammad Fadhli Ahmad, The recent boom of decision making under uncertain information has attracted many researchers to the field of integrating various types of sets with decision making methods In this paper a combined decision making trial and evaluation laboratory DEMATEL with single valued neutrosophic sets is proposed to solve the decision problem This new model combines the advantages of multiplicative inverse of decision matrix in DEMATEL and neutrosophic numbers in linguistic variables which can find the interrelationship among factors of decision problem Differently from the typical multiplicative inverse of DEMATEL which directly used

inverse of matrix using real numbers this method introduces the concept of inverse of matrix using the proposed left right neutrosophic numbers This step will enhance the validity of multiplicative inverse of decision matrix in the DEMATEL with neutrosophic numbers The proposed neutrosophic DEMATEL is also be compared with the DEMATEL and fuzzy DEMATEL This paper includes a case study that demonstrates the applicability of the neutrosophic DEMATEL in establishing the relationship among influential factors of coastal erosion
