The Physics of God and the Quantum Gravity Theory of Everything James Redford, 2011-12-19 ABSTRACT Analysis is given of the Omega Point cosmology an extensively peer reviewed proof i e mathematical theorem published in leading physics journals by professor of physics and mathematics Frank J Tipler which demonstrates that in order for the known laws of physics to be mutually consistent the universe must diverge to infinite computational power as it collapses into a final cosmological singularity termed the Omega Point The theorem is an intrinsic component of the Feynman DeWitt Weinberg quantum gravity Standard Model Theory of Everything TOE describing and unifying all the forces in physics of which itself is also required by the known physical laws With infinite computational resources the dead can be resurrected never to die again via perfect computer emulation of the multiverse from its start at the Big Bang Miracles are also physically allowed via electroweak quantum tunneling controlled by the Omega Point cosmological singularity The Omega Point is a different aspect of the Big Bang cosmological singularity the first cause and the Omega Point has all the haecceities claimed for God in the traditional religions From this analysis conclusions are drawn regarding the social ethical economic and political implications of the Omega Point cosmology
