Bush,2021-04-13 How Taiwan can overcome internal stresses and the threat from China Taiwan was a poster child for the third wave of global democratization in the 1980s It was the first Chinese society to make the transition to democracy and it did so gradually and peacefully But Taiwan today faces a host of internal issues starting with the aging of society and the resulting intergenerational conflicts over spending priorities China s long term threat to incorporate the island on terms similar to those used for Hong Kong exacerbates the island s home grown problems Taiwan remains heavily dependent on the United States for its security but it must use its own resources to cope with Beijing s constant intimidation and pressure How Taiwan responds to the internal and external challenges it faces and what the United States and other outside powers do to help will determine whether it is able to stand its ground against China s ambitions The book explores the broad range of issues and policy choices Taiwan confronts and offers suggestions both for what Taiwan can do to help itself and what the United States should do to improve Taiwan s chances of success **No More States?** Richard N. Rosecrance,Arthur A.

Stein,2006-08-04 The twentieth century witnessed an explosion of new nations carved out of existing ramshackle empires and multiethnic states Many observers contend that the creation of new states will continue indefinitely with the two hundred of today becoming the four hundred of tomorrow as more groups seek independence This provocative and compelling book explores the impact of globalization and terrorism on this trend arguing convincingly that the era of national self determination has finally come to an end Examining the forces that determine the emergence of new nation states the distinguished contributors consider a rich array of specific cases from the Middle East Asia North America Europe and Russia where new states could be created They contend that globalization rather than expanding such opportunities is not as friendly to new weak states with limited resources as it is to established rich nations Given the vast sums circulating in the world market few fledgling nations can be financially independent They find it more prudent to shelter within the protective embrace of existing federations Equally governments of federal states can induce restive petitioners_ such as Quebec Scotland and the Basques_ to remain inside the metropolitan boundary through a system of tangible restraints and rewards Those who reject the benefits such as rebels in Chechnya and Aceh will fail in their bids for independence Taiwan_ poised on a knife edge between integration with China and independence_ faces a series of costs and diminished returns if it seeks full statehood Finally terrorism has lost its legitimacy as a technique for gaining independence in the eyes of the international community Despite the stall in new state formation there has been no sign of successful military or imperial expansion by established countries toward consolidation into fewer larger national units Neither aggression by regional states_ such as the Iraq invasion of Kuwait in 1990 nor intervention_ such as the U S occupation of Iraq in 2003 are likely to succeed On balance the book concludes discontented national movements will have to find ways to exist within current geopolitical boundaries
