Nueva historia de la nación argentina, 2001 **Nueva historia de la nación argentina: La Argentina del siglo XX, c.1914-1983**, 2001 **Academies and Schools of Art in Latin America** Oscar E. Vázquez, 2020-05-28 This edited volume's chief aim is to bring together in an English language source the principal histories and narratives of some of the most significant academies and national schools of art in South America Mexico and the Caribbean from the late 18th to the early 20th centuries The book highlights not only issues shared by Latin American academies of art but also those that differentiate them from their European counterparts Authors examine issues including statutes the influence of workshops and guilds the importance of patronage discourses of race and ethnicity in visual pedagogy and European models versus the quest for national schools It also offers first time English translations of many foundational documents from several significant academies and schools This book will be of interest to scholars in art history Latin American and Hispanic studies and modern visual cultures Shocks and Political Change William R. Thompson, Thomas J. Volgy, 2023-05-16 Political shocks have come to be considered highly salient for explaining major changes to international politics and to the foreign policies of states Such shocks can occur at all levels of analysis domestically dyadically regionally or globally They range from political phenomena such as coups and wars to ecological catastrophes These shocks are sufficiently disruptive to cause foreign policy makers to reconsider their foreign policy orientations and to contemplate major changes to their policies In fact some have argued that it is mostly through political shocks that fundamental policy change occurs in most states No wonder then that political shocks are now increasingly part of the toolbox of considerations used by foreign policy and international relations scholars as they focus on understanding patterns of conflict and cooperation between states Given the salience of political shocks to understand foreign policy change this book brings together a group of both senior and more junior scholars whose previous work has shown substantial promise for moving forward theory and empirical analysis Their combined efforts in this book highlight the value of multiple theoretical and empirical approaches to a clearer understanding of the nature of political shocks and their consequences for foreign policy and international politics Genoese Trade and Migration in the Spanish Atlantic, 1700-1830 Catia Brilli, 2016-04-26 In the eighteenth century Genoese merchants thrived in the changing Atlantic market Their trade and migration are explored here **Religion, Pluralism, and Reconciling Difference** W. Cole Durham, Jr., Donlu D. Thayer, 2018-11-22 We live in an increasingly pluralized world This sociological reality has become the irreversible destiny of humankind Even once religiously homogeneous societies are becoming increasingly diverse Religious freedom is modernity's most profound if sometimes forgotten answer to the resulting social pressures but the tide of pluralization threatens to overwhelm that freedom's stabilizing force Religion Pluralism and Reconciling Difference is aimed at exploring differing ways of grappling with the resulting tensions and then asking will the tensions ultimately yield poisonous polarization that erodes all hope of meaningful community Or can the tradition and the

institutions protecting freedom of religion or belief be developed and applied in ways that still foster productive interactions stability and peace This volume brings together vital and thoughtful contributions treating aspects of these mounting worldwide tensions concerning the relationship between religious diversity and social harmony The first section explores controversies surrounding religious pluralism from different starting points including religious political and legal standpoints The second section examines different geographical perspectives on pluralism Experts from North and South America Europe Africa and the Middle East address these issues and suggest not only how social institutions can reduce tensions but also how religious pluralism itself can bolster needed civil society

Science and Catholicism in Argentina

(1750-1960) Miguel de Asúa,2022-05-09 Science and Catholicism in Argentina 1750 1960 is the first comprehensive study on the relationship between science and religion in a Spanish speaking country with a Catholic majority and a Latin pattern of secularisation The text takes the reader from Jesuit missionary science in colonial times through the conflict ridden 19th century to the Catholic revival of the 1930s in Argentina The diverse interactions between science and religion revealed in this analysis can be organised in terms of their dynamic of secularisation The indissoluble identification of science and the secular which operated at rhetorical and institutional levels among the liberal elite and the socialists in the 19th century lost part of its force with the emergence of Catholic scientists in the course of the 20th century In agreement with current views that deny science the role as the driving force of secularisation this historical study concludes that it was the process of secularisation that shaped the interplay between religion and science not the other way around
