Challenges and Prospects in African Education Systems Soji Oni, 2013-11-14 Challenges and Prospects in African Education System The general idea this book is trying to disseminate is to inform readers about the compelling challenges and prospects in African system of education As we all know when issues of Africa educational system is raised the first set of thoughts that come to mind is decline in standard deterioration of facilities examination malpractices cult crises or school based violence shortage of teachers underqualified teachers and poor teachers performance which results in poor learning standards lack of classroom discipline that is exacerbated by insufficient resources and inadequate infrastructure failure of appropriate inspection and monitoring and confusion caused by changing curricula without proper communication and training All these have led to massive demoralization and disillusionment among teachers and a negative and worsening perception of African system of education This therefore calls for in depth analysis aimed at tutoring every stakeholder in education on how their action and inactions have individually and collectively contributed to the collapsing state of education in Africa However the prospect is that Africas recovery and sustainable development can only be guaranteed through expansion and sustenance of both quantitative and qualitative of the continents stock of human capital through education In order for education to realize

its key role in development it must be provided to the younger segments of African society as quickly as human and financial resources permit with the ultimate goal of developing a comprehensive meaningful and sustainable system of education at all levels and for all age groups This is the message that this book puts across in the six knitted sections *Political Foundations for Becoming a Teacher* Forrest W. Parkay, 2006 *Political Foundations for Becoming a Teacher* introduces the political trends issues and forces that shape public and private education in the United States Based on the successful introductory text *Becoming a Teacher* this breakout text explores topics such as the effects of high stakes testing assessments and standards based curricula on the classroom and the battle among political interest groups to influence education Readable and practical *Political Foundations for Becoming a Teacher* provides a realistic picture of how politics affects the teaching profession and suggests how future teachers can take advantage of expanding leadership roles *Handbook of Comparative Education Law* Charles J. Russo, 2017-11-01 Each of the four volumes in this set as well as each volume independently provide comparative analyses for researches practitioners and students of the law and education In examining law and education in various countries around the world Designed to allow readers to learn from rather than copy the legal and educational systems in these volumes the books are designed to generate thought and conversation on how education can be improved around the world By having chapter authors leading academicians in the home countries follow the same template so it can be easier to compare similarities and differences thereby helping to make the book user friendly The value of these books is that they should help to enhance international awareness of the similarities and advantages associated with bringing together knowledge from various countries concerning education law Volume 2 encompassing Selected Nations in Asia namely China Israel Palestine South Korea and Turkey consists of detailed analysis of educational law and systems in these representative countries so researchers and students there and elsewhere can learn from one another *Resources in Education* ,2000 **Continuous Teacher Education in Russia** Roza A. which international organizations have shaped reforms in education and training in federalist countries with regards to policy convergence In advanced democracies international organizations have become increasingly influential in government activity This also applies to policy fields that have traditionally been nearly exclusively regulated by the nation state How strong is their influence in policy fields like education where they rely on purely soft governance to stimulate national policies From a political science perspective three major initiatives are analyzed the OECD s PISA study the European Bologna process and the European Union s Copenhagen process Within a few years these initiatives have contributed to deep transformations within the education arena This book elucidates the processes in which nation states comply with these initiatives using the examples of Switzerland and the United States div
