Flash 8: Projects for Learning Animation and Interactivity Rich Shupe, Robert Hoekman, Jr., 2006-03-28 Macromedia Flash is fast becoming the Web's most widely used platform for creating rich media with animation and motion graphics but mastering Flash isn't easy. Most entry level books teach through simple examples that concentrate on either animation or scripting but rarely both together. To get the most from Flash 8 you not only need to be proficient in programming interface design you need the creativity for story telling and the artistic insights to design fluid animation. Flash 8 Projects for Learning Animation and Interactivity teaches Flash design rather than simply Flash itself. With a standalone series of walkthroughs and tutorials for Flash beginners coming from a graphics field this book teaches Flash in the context of real world projects. Rather than learn a Flash tool for the sake of it you learn which areas of Flash are important and which are less used simply by seeing how typical content is actually created. And rather than a text heavy approach this graphically rich book leads you through hands on examples by illustration. Each project in the book starts with goals and broad sketches before moving to design and scripting. This helps you understand design intent the why of the process rather than just learning the interfaces and the how of it all. Along the way you'll create Flash content that includes traditional animation techniques as seen in full length animated features and ActionScript based interactive animation such as custom web site interface designs. You also learn how to combine both traditional animation techniques and ActionScript to create feature rich Flash assets from the ground up. Co authored by educational developers with years of experience creating compelling content interfaces and applications. Flash 8 Projects for Learning Animation and Interactivity offers a content driven approach that is also inspiration driven. You learn because you're accomplishing something tangible not because you think you need to know how a tool works. If you want to understand how various features of Flash come together to create a final end design this book provides you with both the insight and the know how. *Planning for Learning through The Twelve Days of Christmas* Rachel Sparks Linfield, Penny Coltman, 2012-11-07 Plan for six weeks of learning covering all six areas of learning and development of the EYFS through the topic of the twelve days of Christmas. Active Learning Anne C. Martin,Ellen Schwartz,2015-04-28 This powerful collection will inspire new and veteran teachers to make space for children s interests for teaching as relational and intellectual work and for new insights and ideas The authors introduce the Prospect Center s Descriptive Review of Practice a collaborative inquiry process that provides an opportunity for teachers to examine their practice and gain new perspectives from other participants The contributors to this

volume respond to each child's modes of thinking as they develop curriculum or find wiggle room in curricula they are given. By demonstrating how it is possible to pursue careful knowledge of craft this book offers ways of teaching that allow for continuing growth and change.

Book Features An inquiry methodology that assists teachers to reflect on the classroom and develop curriculum that responds to children's interests and needs. Specific examples of a variety of sources teachers can draw on and think about to improve practice. A method of data collection that can inform practice while allowing for the unevenness, messiness, and essential humanness of teaching and learning.

Making Space for Active Learning is a collection that stands alone and gets to the heart of what we mean by learning and teaching. Each contribution reminded me of how much I miss being in the classroom and how much we're missing in current so-called school reform discourse. Keep this book handy. A chapter at a time will restore some needed sanity about what's important.

Deborah Meier, author and education activist. This book is a moving and powerful collection of teachers' work that holds the possibility of inspiring and changing new teachers' practice.

Kathy Schultz Dean, Professor, School of Education, Mills College. This book will add significantly to the expanding and important literature about The Prospect Processes, which were developed over many years at the Prospect School and Center in Vermont. The chapters all, by experienced educators, profit from the back and forth between inquiry and stories of classroom life, each informing the other.
