**The Oxford Handbook of Management Ideas** Andrew Sturdy, Stefan Heusinkveld, Trish Reay, David Strang, 2019-03-28 Management ideas and their associated applications have become a prevalent feature of our working lives While their focus is familiar such as efficiency motivation and improvement they range from specific notions such as activity based costing to broad movements like corporate social responsibility This Handbook brings together some of the latest research from leading international scholars on how management ideas are produced promoted and adapted and their effects on business and working practices and society at large Rather than focusing on specific management ideas this volume explores their key socio political contexts and channels of dissemination and is organized around four core overlapping themes The first section sets out the research field in general in terms of both an overall system and of different perspectives and research methods The second section explores the role of different actors and channels of diffusion including the consumers and producers of management ideas and new media as well as traditional players in the management ideas field such as consultancies and business schools The third section focuses on specific features or dynamics of the management ideas system such as their adoption evolution institutionalisation and resurgence while in the final section critical and new perspectives on management ideas are examined highlighting specific socio political contexts and the possibility of alternative ideas and forms of critique With a broad range of perspectives represented this Handbook provides a comprehensive authoritative and enduring resource for those studying management innovation and organizational change as well as for those working in the management ideas industry

**The Flow of Management Ideas** Stefan Heusinkveld, Marlieke van Grinsven, Claudia Groß, David Greatbatch, Timothy Clark, 2021-06-10 Traces the flow of management ideas from lectures and seminars given by management gurus to organizational practice and beyond

History in Management and Organization Studies Behlül Üsdiken, Matthias Kipping, 2020-10-25 There has in recent times been an increasing interest in history broadly defined among management scholars But what specifically a historical approach or perspective can contribute to research on organizational fields organizations strategy etc and how exactly such historical research should be carried out remain questions that have been answered only partially if at all Building on the authors prior and ongoing work History in Management and Organization Studies From Margins to Mainstream is unique in presenting a comprehensive and integrated view of how history has informed management research with a focus on organization theory and strategy More specifically the volume provides an overview of how the relationship between history and management scholarship has evolved from the 19th century until today focusing mainly on the post World War II period and systematically surveys the kind of research programs within organization theory and strategy that have used historical data and or history as a theoretical construct while also identifying the remaining blind spots As a whole it offers a kind of roadmap for management scholars and historians to situate their research and hopefully find new roads for others to travel The book is intended for anybody conducting or planning to

conduct historical research within management and organization studies and aims in particular at becoming a standard feature of research methods courses in business schools and departments of management

**Management Innovations for Healthcare Organizations** Anders Örténblad, Carina Abrahamson Löfström, Rod Sheaff, 2015-11-19 Innovations in management are becoming more numerous and diverse and are appearing in organizations providing many different kinds of products and services The purpose of this book is to examine whether some widely promoted examples of these management innovations ranging from techniques such as Kaizen to styles of leadership and the management of learning can usefully be applied to organizations which provide healthcare and applied in different kinds of health systems Management Innovations for Healthcare Organizations is distinctive in selecting a wide and diverse range and selection of managerial innovations to examine No less distinctively it makes an adaptive critical scrutiny of these innovations Neither evangelist nor nihilist the book instead considers how these innovations might be adapted for the specific task of providing healthcare Where evidence on these points is available the book outlines that too Consequently the book takes an international approach with contributions from Europe the Middle East Australia and North America Each contributor is an expert in the management innovation which they present This combination of features makes the book unique

The Oxford Handbook of Management Consulting Matthias Kipping, Timothy Clark, 2012-03-29 Management consultants of various kinds play an important role in the world of business and within other types of organization The Oxford Handbook on Management Consulting is a comprehensive overview of thinking and research on management consultancy with contributions from leading international scholars The first section provides an account of the historical developments in management consulting research and how current thinking has evolved from prior work The second section focuses on disciplinary and theoretical perspectives their diversities areas of synergy and parallel concerns The following sections examine consulting as a knowledge business consultants and management fashion and the relationship between management consultants and their clients The Handbook concludes with an assessment of areas of future research and debate By bringing together a wide range of research and thinking on management consulting across different disciplines sub disciplines and conceptual approaches the Handbook provides a comprehensive understanding of both current thinking and future directions for research

*Defining Management* Lars Engwall, Matthias Kipping, Behlül Üsdiken, 2016-06-10 Defining Management charts the expansion of management as an idea and practice from a time when it was limited to churches and households to its current ubiquity focusing in particular on the role of business schools consultants and business media in this process How did an entire industry develop around business schools consultants and business media who are now widely considered the authorities regarding best management practice This book shows how these actors on their own and in interaction became taken for granted and gained such definitional power over management and managers expanded across the globe from often modest and not always respected origins and impacted and continue to impact businesses and increasingly the broader economic

and social context Building on extant and some new research the book is unique in bringing together issues and actors that have been examined elsewhere separately Any student or professional of management interested in the evolution of their field or the rise of business schools consultants and business media will find this book both novel and thought provoking

**The Organization of the Expert Society** Andreas werr,Staffan Furusten,2016-12-01 It is often claimed that we live in an expert society a society where more and more individuals take expert roles in increasingly narrow fields In contrast to more traditional experts most of these new experts lack generally accepted mechanisms for the certification and legitimation of their expertise This book focuses on these new as well as established experts and the efforts undertaken to secure and legitimate their expertise We view these efforts as organizing attempts and study them on four different levels the society the market the organization and the individual Based on empirical studies on these four levels of analysis The Organization of the Expert Society makes the argument that current organizing initiatives in the expert society are based in an objectifying view of expertise that risks concealing and downplaying key aspects of expertise Well intended organizing initiatives in the expert society thus run the risk of promoting ignorance rather than securing expertise Focusing on a current general and global phenomenon the rise and organization of an expert society The Organization of the Expert Society will be key reading for scholars academics and policy makers in the management fields of Organizational Theory Management Consulting Organizations Society Critical Management Studies as well as the disciplines of Sociology Political Science and Social Anthropology *Handbook of Top Management Teams* F. Bournois,J. Duval-Hamel,S. Roussillon,J. Scaringella,2010-10-29 Questions of company governance have been examined over the years but this has generally been in areas concerning shareholders Meanwhile the management team and board of directors remain comparatively unexplored This book has been written to provide a way into this relatively unknown world of executive committees *Fashion and Utopia in Management Thinking* René ten Bos,2000-01-01 Building upon some rather unusual sources in postmodern theory the author argues that management fashion might encourage the practitioner to engage in philosophical self examination and to adopt alternative forms of understanding However it is also argued that management fashion often fails to keep up to this promise because it remains paradoxically incapable of laying off its rationalist cloak **BOOK JACKET**

Sylwia,Kalinowska-Żeleźnik, Anna,2019-06-14 The development of communication technology and the proliferation of centers

that collect interpret and transmit information does not mean that communities have become a more transparent and enlightened environment. If anything, the pioneering research of modern communication signifies the ambiguity of individual and collective existence. *Myth in Modern Media Management and Marketing* is an essential reference source that discusses the analysis of the role of myth and mythical thinking in the operation of media organizations and their functioning on the media market. Featuring research on topics such as social media brand management and advertising, this book is ideally designed for social media analysts, media specialists, public relations managers, media managers, marketers, advertisers, students, researchers, and professionals involved with media and new media management.

***Management with Online Study Tools 12 Months*** Danny Samson, Timothy Donnet, Richard L. Daft, 2017-10-25. Samson, Daft, Donnet's *Management* is a robust foundation text providing a balance of broad theoretical content with an engaging, easy-to-understand writing style. It covers the four key management functions: planning, organising, leading, and controlling, conveying to students the elements of a manager's working day. Along with current management theory and practice, the authors integrate coverage of innovation, entrepreneurship, agile workplaces, social media, and new technology throughout. This sixth edition features a new author on the team and contains updates to content based on recent research. Real-life local and international examples showcase the ongoing changes in the management world. Focusing on a skills approach, they bring concepts to life for students, supporting motivation, confidence, and mastery. Each part concludes with a contemporary continuing case study focusing on car company Toyota as it faces managerial challenges and opportunities in the region.

**Management Scholarship and Organisational Change** Miriam Green, 2019-01-08. Change is a crucial and inescapable process for many organisations. It remains a constant challenge for managers, and many change management initiatives fail. Burns and Stalker's seminal text on managing change, *The Management of Innovation*, has often been used as a basis for research in mainstream management journals and has been represented as an important theory in popular and long-established management textbooks. The issues raised in that book are still being grappled with by academics and practitioners today. Miriam Green provides a critical analysis of the mainstream construction of knowledge on change management through an examination of representations of that text. The main thesis of her book is that this literature, though valuable, does not provide a full picture. Its objectivist approach ignores the role of other factors raised in the original study.

These factors include the effects of power politics resistance and employee influence on the outcomes of managerial change strategies and on other organisational processes with important consequences for the understanding of change initiatives by both academics and practitioners This is part of an ongoing debate in management studies and more widely in the social sciences about theoretical approaches and research methods The originality of this book lies in its in depth comparison of an entire monograph on organisations facing technological and commercial change with an equally in depth analysis of the ways this work has been represented and used as a basis for teaching and research It highlights the limitations of the exclusive use of one approach to explain the complications arising from organisational change It challenges the scientific justification offered for that approach and supports arguments for more inclusive and sustainable scholarship of greater relevance to academics managers and other organisational stakeholders

**Processual Perspectives on the Co-Production Turn in Public Sector Organizations** Thomassen, Anja Overgaard, Jensen, Julie Borup, 2020-12-11 Existing research understands co production as leading to shifts in roles of the public sector institutions and their staffs The shift is seen in the way that a discursive use of the term service provision with embedded logics encompassing fiscal accountability performance measurement efficiency and process regulation has changed towards discourses that embrace collaboration between the public sector front staff and the citizens with the aim of developing legitimate and effective welfare services that are co produced by means of active participation and distributed decision making However this change requires new approaches to the way in which the implementation of new practices and tools is executed in practice as studied and researched and how the new practices and tools are understood and evaluated in organizations Processual Perspectives on the Co Production Turn in Public Sector Organizations is an essential reference book that examines unfolds and develops approaches to co production and implementation as dynamic processual collaborative sensemaking and as requiring and resulting in capacity building and learning Moreover the book examines new approaches to engage citizens and public sector actors in collaborative and co productive processes especially with concern for new goals pertaining to sustainability social equity democratic legitimacy etc Covering topics that include knowledge management and collective leadership the book presents perspectives on capacity building learning change and evaluation in organizations and current research in different areas of the public sector It is intended for public sector administrators and managers investigating the relevancy approaches and methods in co production Furthermore it targets civil actors and welfare service users leaders and managers of public organizations researchers academicians and students in programs that include social welfare development public administration political science and organizational development

Understanding Management Control and Organisational Sense-making Dr Krister Bredmar, 2016-07-29 Summary This book centres around three different areas management control organisations and information systems in order to understand what is actually going on and to make sense of management control questions Management control techniques used today could in many cases be traced back to industrialisation With

the help of computerised information systems the speed and detail with which a manager could get a hold of important information has increased Today it has become even more important to be able to choose what information to work with and that the context in which it should be used is understood Organisational sense making is in many ways an interesting and important path to take in order to do this When working with the management control function it is important to understand the organisation where the work is undertaken One important part of the function is planning and another is control Both are needed in order for the management control function to work Performance is often a key ingredient when trying to find out what is working in a plan and what is not and here the understanding for information becomes necessary Since the work is done within an organisation both by managers and employees it is also crucial to find ways to work with not only models methods and techniques but also people and social dimensions Key Features Managers and employees want to act in a meaningful way in general The way planning and control is undertaken in an organization is to a large extent dependent on the way a manager interprets information about the organisation Decisions and actions can be traced to the interpretation of a situation in the past and present Since organisations are built on people it is important to try to understand why they act in a certain way and how their understanding of the organisation is evolving Management control has in many ways been described as a function that is dependent on different techniques and methods however it can also be described as a social process focusing on decisions and actions Informations systems have come to play a crucial role in managing an organisation especially when it comes to tracing performance The demand for responsible and accountable management has led to an increased emphasis on meaningful decisions and actions The Author Dr Krister Bredmar is associate professor at Linneaus University in Sweden He has for more then 20 years worked with management control and organisational sense making both in theory and in practice His research has been published both in academic journals and in books Readership Scholars students and practitioners Contents The accounting heritage Corporate epistemology Thinking ahead The essence of management control Understanding performance The control concept in management control Reports communication and stakeholders The essence of sense making Organisations as a set of social relations Information systems and management control Individuals and organisations Organisational structure A social perspective A decisions context Techiques and functions Thinking and acting strategically Accounting tools Information and knowledge The performance paradox
