*Lady Gaga and Popular Music* Martin Iddon, Melanie L. Marshall, 2014-01-03 This book is a multi faceted interdisciplinary examination of the music and figure of Lady Gaga combining approaches from scholars in cultural studies art fashion and music It represents one of the first scholarly volumes devoted to Lady Gaga who has become over a few short years central to both popular and indeed populist as well as more scholarly thought in these areas and who the contributors argue is helping to shape directly and indirectly thought and culture both in the fields of the scholarly and the

everyday Lady Gaga's output is firmly embedded in a self-consciously intellectual pop culture tradition and her music videos are intertextually linked to icons of pop culture intelligentsia like Alfred Hitchcock and open to multiple interpretations. In examining her music and figure this volume contributes both to debates on the status of intertextuality held in tension with originality and to debates on the figuring of the sexualized female body and representations of disability. There is interest in these issues from a wide range of disciplines: popular musicology, film studies, queer studies, women's studies, gender studies, disability studies, popular culture studies and the burgeoning sub-discipline of aesthetics and philosophy of fashion.

*Popular Music and the New Auteur* Arved Ashby, 2013-12 *Popular Music and the New Auteur* looks at seven contemporary directors whose feature films are characterized by music video aesthetics. Demonstrating a fresh kind of cinematic musicality, these filmmakers write against music rather than against script and allow pop songs a determining role in narrative and imagery. *ECSCW 2005* Hans Gellersen, Kjeld Schmidt, Michel Beaudouin-Lafon, Wendy Mackay, 2006-01-26 The emergence and widespread use of personal computers and network technologies have seen the development of interest in the use of computers to support cooperative work. This volume presents the proceedings of the ninth European conference on Computer Supported Cooperative Work (CSCW). This is a multidisciplinary area that embraces the development of new technologies grounded in actual cooperative practices. These proceedings contain a collection of papers that reflect the variegated research activities in the field. The volume includes papers addressing novel interaction technologies for CSCW systems, new models and architectures for groupware systems, studies of communication and coordination among mobile actors, studies of cooperative work in complex settings, studies of groupware systems in actual use in real world settings and theories and techniques to support the development of cooperative applications. The papers present emerging technologies alongside new methods and approaches to the development of this important class of applications. The work in this volume represents the best of the current research and practice within CSCW. The collection of papers presented here will appeal to researchers and practitioners alike as they combine an understanding of the nature of work with the possibility offered by new technologies. *Edward Elgar*, 2013 This updated second edition is an in-depth exploration of Elgar's compositions and of writings by and about the composer and his music.
