Consumerism in Twentieth-Century Britain Matthew Hilton, 2003-11-13

This book is the first comprehensive history of consumerism as an organised social and political movement Matthew Hilton offers a groundbreaking account of consumer movements ideologies and organisations in twentieth century Britain He argues that in organisations such as the Co operative movement and the Consumers Association individual concern with what and how we spend our wages led to forms of political engagement too often overlooked in existing accounts of twentieth century history He explores how the consumer and consumerism came to be regarded by many as a third force in society with the potential to free politics from the perceived stranglehold of the self interested actions of employers and trade unions Finally he recovers the visions of countless consumer activists who saw in consumption a genuine force for liberation for women the working class and new social movements as well as a set of ideas often deliberately excluded from more established political organisations

Numbers and Narratives Wray Vamplew, 2018-11-08

This volume argues for a more quantitative economic and theoretical approach to sports history The author notes that sport can have peculiar economics as in no other industry do rival businesses have to cooperate to produce a sellable output He also demonstrates via a case study of early gate money football in Scotland that sports producers were not always seeking profits and often put winning games and trophies ahead of making money Another analysis examines how industrialisation affected sport how sport became an industry in its own right and how the workplace became a major provider of sports facilities A look at third sector economics highlights how the popularity of football provided an ideal vehicle for charity fundraising The book observes that most sports participants are amateurs but at the elite level the paid player has a key role and this is assessed through case studies of the jockey and the golf professional Finally the author discusses and evaluates various theories relating to the historical development of the sports club This book was originally published as a special issue of Sport in Society Cultures Commerce Media Politics
