Abstract

The National Policy on Population for Sustainable Development (2021) was delayed until its release and implementation in October 2023, leaving a narrow window to meet its ambitious targets. Nigeria's exponential population growth rate of 3.2%, well above the policy's goal of reducing the rate from 2.6% to 2.5% by 2030, presents significant challenges. A key objective of reducing the Total Fertility Rate (TFR) from 5.3 to 4.7 by 2025 and 4.0 by 2030 is now highly unlikely due to the late implementation and entrenched socio-cultural barriers. Additionally, the target of increasing modern contraceptive prevalence rates (mCPR) to 27% by 2020, 37% by 2025, and 47% by 2030 appears unattainable given current demographic trends and health service delivery gaps. Nigeria's youthful population, combined with cultural resistance to family planning and limited access to reproductive health services, complicates efforts to meet these targets. The country's rapid population growth continues to strain resources, further limiting the potential for achieving sustainable development goals. This paper employs the **Demographic Transition Theory (DTT)** to frame Nigeria's population challenges and examines the policy's delayed implementation through the lens of the **Political Economy of Population Policy**, highlighting the influence of governance and socio-economic inequalities on population control efforts. By critically analyzing the policy's feasibility, this paper suggests alternative approaches to address population management within Nigeria's specific socio-political context.

Population And Development A Critical Introduction:

Population and Development Frank Furedi, 1997 Many experts believe that population growth is the greatest threat facing humanity This concise and provocative book discusses both sides of this debate examining the way the arguments have changed and evolved and questioning the assumptions of the main protagonists Frank Furedi argues that the Western preoccupation with population growth reveals more about the internal concerns of Western societies than the socio economic development of the South Examining a broad range of key debates and controversies the population bomb in Asia the culture of a distinct regime of African fertility the role of education in stabilizing population growth in Kerala he contends that the marginalization of the goal of development is the outcome of a narrow concern with population policies The

Demographics of Empire Karl Ittmann, Dennis D. Cordell, Gregory H. Maddox, 2010-10-05 The Demographics of Empire is a collection of essays examining the multifaceted nature of the colonial science of demography in the last two centuries The contributing scholars of Africa and the British and French empires focus on three questions How have historians demographers and other social scientists understood colonial populations What were the demographic realities of African societies and how did they affect colonial systems of power Finally how did demographic theories developed in Europe shape policies and administrative structures in the colonies The essays approach the subject as either broad analyses of major demographic questions in Africa s history or focused case studies that demonstrate how particular historical circumstances in individual African societies contributed to differing levels of fertility mortality and migration Together the contributors to The Demographics of Empire question demographic orthodoxy and in particular the assumption that African societies in the past exhibited a single demographic regime characterized by high fertility and high mortality **The Blackwell**

Companion to Social Inequalities Mary Romero, Eric Margolis, 2008-04-15 The Blackwell Companion to Social Inequalities is a first rate collection of social science scholarship on inequalities emphasizing race ethnicity class gender sexuality age and nationality Highlights themes that represent the scope and range of theoretical orientations contemporary emphases and emerging topics in the field of social inequalities Gives special attention to debates in the field developing trends and directions and interdisciplinary influences in the study of social inequalities Includes an editorial introduction and suggestions for further reading **Demography in the Age of the Postmodern** Nancy E. Riley, James McCarthy, 2003-07-24

Demography has developed into a remarkably coherent field and now stands as a firmly established discipline with strong ties to policy making agencies However in recent years there has been increasing recognition within demography of the limits of existing theories and methods particularly its absence of a strong critical tradition and its isolation from recent theoretical developments in other social sciences In this study Nancy Riley and James McCarthy use the lens of postmodernism to structure a critical analysis of the field of demography Paying particular attention to the fundamental epistemologies and methodologies that currently underlie the field they explore how postmodern perspectives might serve to

energize the field and how demography could be enhanced by the introduction of insights from other social sciences Drawing on examples of new kinds of research in demography and related fields this is an important new book that seeks to reinvigorate the field of demography

The Limits to Scarcity Lyla Mehta,2013-05-13 Scarcity is considered a ubiquitous feature of the human condition It underpins much of modern economics and is widely used as an explanation for social organisation social conflict and the resource crunch confronting humanity s survival on the planet It is made out to be an all pervasive fact of our lives be it of housing food water or oil But has the conception of scarcity been politicized naturalized and universalized in academic and policy debates Has overhasty recourse to scarcity evoked a standard set of market institutional and technological solutions which have blocked out political contestations overlooking access as a legitimate focus for academic debates as well as policies and interventions Theoretical and empirical chapters by leading academics and scholar activists grapple with these issues by questioning scarcity s taken for granted nature They examine scarcity debates across three of the most important resources food water and energy and their implications for theory institutional arrangements policy responses and innovation systems The book looks at how scarcity has emerged as a totalizing discourse in both the North and South The scare of scarcity has led to scarcity emerging as a political strategy for powerful groups Aggregate numbers and physical quantities are trusted while local knowledges and experiences of scarcity that identify problems more accurately and specifically are ignored Science and technology are expected to provide solutions but such expectations embody a multitude of unexamined assumptions about the nature of the problem about the technologies and about the institutional arrangements put forward as a fix Through this examination the authors demonstrate that scarcity is not a natural condition the problem lies in how we see scarcity and the ways in which it is socially generated

International Handbook on Gender and Demographic Processes Nancy E. Riley,Jan Brunson,2018-05-02 This handbook presents a comprehensive and up to date overview of gender in demography addressing the many different influences of gender that arise from or influence demographic processes It collects in one volume the key issues and perspectives in this area whereby demography is broadly defined The purpose in casting a wide net is to cover the range of work being done within demography but at the same time to open up our perspectives to neighboring fields to encourage better conversations around these issues The chapters in this handbook carefully document definition and

measurement issues and take up parts of the demographic picture and focus on how gender plays a role in outcomes In other cases gender often plays a cross cutting role in social processes rather than having a single or easily distinguishable role it often combines with other social institutions and even other statuses and inequalities to affect outcomes Thus a key factor in this volume is how gender interacts with race ethnicity class nationality and sexuality in any demographic setting While each section contains chapters that are broad overviews of the current state of knowledge and behavior the handbook also includes chapters that focus on specific cultures or events in order to examine how gender operates in a particular circumstance

The Development Film in the Americas Molly Geidel, 2025-10-28 In this book Molly Geidel traces the rise and fall of the development film an overlooked film genre that circulated widely in the Americas from the 1940s through the 1970s Development films often short documentaries were made at the behest of state agencies global governance organizations and private corporations to link capitalist conceptions of economic growth to improved quality of life Development films made this link beautifully compelling blending elements from ethnography and socially committed leftist film traditions to create indelible narratives of underdevelopment and modernization The Development Film in the Americas tells the story of these films and the hemispheric cohort of filmmakers who crafted them chronicling the filmmakers' fraught relationships with both the organizations they worked for and the actors in their films

Bioregionalism and Global Ethics Richard Evanoff, 2010-09-13 While a number of schools of environmental thought including social ecology ecofeminism ecological Marxism ecoanarchism and bioregionalism have attempted to link social issues to a concern for the environment environmental ethics as an academic discipline has tended to focus more narrowly on ethics related either to changes in personal values or behavior or to the various ways in which nature might be valued What is lacking is a framework in which individual social and environmental concerns can be looked at not in isolation from each other but rather in terms of their interrelationships In this book Evanoff aims to develop just such a philosophical framework one in which ethical questions related to interactions between self society and nature can be discussed across disciplines and from a variety of different perspectives The central problem his study investigates is the extent to which a dichotomized view of the relationship between nature and culture

perpetuated in ongoing debates over anthropocentric vs ecocentric approaches to environmental ethics might be overcome through the adoption of a transactional perspective which offers a more dynamic and coevolutionary understanding of how humans interact with their natural environments Unlike anthropocentric approaches to environmental ethics which often privilege human concerns over ecological preservation and some ecocentric approaches which place more emphasis on preserving natural environments than on meeting human needs a transactional approach attempts to create more symbiotic and less conflictual modes of interaction between human cultures and natural environments which allow for the flourishing of both

Understanding Development Paul Hopper, 2012-02-27 Drawing on a wide range of case studies from across the globe this book explores such areas as health and population growth conflict and security global inequality and poverty fair trade and trade liberalization gender and education foreign aid and debt and sustainability and the environment This issues driven text focuses on the debates that have generated the most interest and passion among practitioners and non practitioners alike Always attentive to the contested and plural nature of the field it makes the case for a genuinely interdisciplinary approach which takes full account of the impact of globalization Publisher Changing European Visions of Disaster and Development Vanessa Pupavac, Mladen Pupavac, 2020-09-02 Goethe's 1832 poem *Faust* offers a vision of humanity realising freedom and prosperity through transcending natural adversity *Changing European Visions of Disaster and Development* returns to *Faust* as a way of exploring the rise and fall of European humanist aspirations to build free and prosperous national political communities protected from natural disasters *Faust* stories emerged in early modern Europe linked to the shaking of the traditional religious and political order and the pursuit of new areas of human knowledge and activity which led to a shift from viewing disasters as acts of God to acts of nature *Faust*'s dam building and land reclamation project in Goethe's poem was inspired by Dutch hydro engineering and in turn inspired others Faustian dreams of an engineered future were pursued by the American Yugoslav inventor Nikola Tesla and the country of his birth towards establishing its national independence and escaping the fate of being a borderland *Faust* remains a compelling reference point to explore European visions of disaster and development If *Faust* captured the European spirit of earlier centuries what is today's outlook Ambitious Faustian development visions to eradicate natural disasters have been replaced by anti Faustian risk cosmopolitanism sceptical towards human activity in ways counter to building collective protection from disaster Tesla's country of birth fears returning to being an insecure borderland of Europe This powerful and timely book calls for a rekindling of European humanism and *Faust*'s vision of free people standing on free land **Human Rights** Michael Goodhart, 2013 *Human Rights Politics and Practice* is an introduction to human rights that goes beyond a purely legal perspective to look at theoretical issues and practical approaches Bringing together leading experts it is up to date with cutting edge research in a constantly evolving field **Population Control Policies in China and India** Gabe T.
