Population Crisis United States. Congress. Senate. Committee on Government Operations. Subcommittee on Foreign Aid Expenditures, 1966 **Population Crisis** United States. Congress. Senate. Committee on Government Operations. Subcommittee on Foreign Aid Expenditure, 1970 Monograph of statements made at congressional hearings in the USA concerning present and future social problems of unprecedented population growth shows limited progress on an international scale towards establishing social policies with regard to birth control and family planning but questions whether the world has adequate time in which to avert disaster Graphs and references **Population Crisis** United States. Congress. Senate. Committee on Government Operations. Subcommittee on Foreign Aid Expenditures, 1966 *The Population Crisis and the Use of World Resources* Stuart Mudd, 2013-12-11 *The Demographic Crisis in Europe* Richard R. Verdugo, 2021-05-01 By most accounts Europe has been mired in a demographic crisis since about 1970 By a demographic crisis is meant that Europe's dependency ratio is increasing and the net result has been declining populations and fewer workers to sustain society However there are certain issues that need attention Two topics seem to capture some of these issues The implications of the possible crisis and the crisis assessment The present volume is organized around both topics implications and assessment There are at least three contributions being made by the proposed volume To begin with while there are other issues related to the demographic crisis in Europe the present volume should motivate additional research Secondly the research in the proposed volume does not necessarily assume that there is a demographic crisis in Europe nor that it is consistent across national lines Thus each chapter in essence examines a different issue associated with the proposal that there is a crisis Finally the present volume makes several methodological contributions For example the chapter by David Swanson uses non Bayesian modeling in studying infant mortality Richard Verdugo examines the dependency ratio and selected factors on economic growth in selected European nations Kposowa and Ezzat conduct an assessment Martins examines variation in the path toward a crisis Johnson examines humanitarian migration and the crisis Edmonston examines the association between geopolitics and the crisis **World Population Crisis** Phyllis Tilson Piotrow, 1973 *Analyzing the Global Population Crisis* Philip Steele, 2018-07-15 The world's population has more than doubled in the past fifty years which has strained natural resources increased pollution and harmed many plants and animals This book examines demography around the world covering immigration refugees urbanization poverty trade and access to water and food Controversial issues such as eugenics and abortion are also discussed in terms of their impact on population and birth rates providing readers with various perspectives to critique this complex issue *The "Population Problem" in Pacific Asia* Stuart Gietel-Basten, 2019-06-07 Despite the twenty first century's often being referred to as the Asian Century indicating hope for economic growth and the rebalancing of the global order population aging and stagnation present an existential threat to the success of China and other territories of Pacific Asia namely Japan Taiwan Hong Kong Singapore and

South Korea This book argues that the population problem rooted in low fertility has thus far been largely considered in a linear way low fertility leads to population stagnation and rapid aging so fixing low fertility should correct the problem However a multi dimensional lens is essential to appreciating the scale and nature of the issue and indeed to determining whether it is an issue at all Stuart Gietel Basten examines how the issue of low fertility has been constructed how blame has been apportioned and why policies designed to tackle it have yielded few results Drawing on an array of primary and secondary sources as well as examples from scholarly and popular literature *The Population Problem in Pacific Asia* takes a comparative approach to fertility in the region and locates mainland China in its regional context It serves as a useful resource for government workers stakeholders and students and scholars in sociology demography geography economics and area studies Population Crisis in India Vasant P. Committee on Science and Astronautics,1967 Toward a Small Family Ethic Travis N. Rieder,2016-06-23 This thought provoking treatise argues that current human fertility rates are fueling a public health crisis that is at once local and global Its analysis and data summarize the ecological costs of having children presenting ethical dilemmas for prospective parents in an era of competition for scarce resources huge disparities of wealth and poverty and unsustainable practices putting irreparable stress on the planet Questions of individual responsibility and integrity as well as personal moral and procreative issues are examined carefully against larger and more long range concerns The author s assertion that even modest efforts toward reducing global fertility rates would help curb carbon emissions slow rising global temperatures and forestall large scale climate disaster is well reasoned and more than plausible Among the topics covered The multiplier effect food water energy and climate The role of population in mitigating climate change The carbon legacy of procreation Obligations to our possible children Rights what is right and the right to do wrong The moral burden to have small families *Toward a Small Family Ethic* sounds a clarion call for bioethics students and working bioethicists This brief thought rich volume steers readers toward challenges that need to be met and consequences that will need to be addressed if they are not National Library of Medicine Current Catalog National Library of Medicine (U.S.),1971 First multi year cumulation covers six years 1965 70 The Population Crisis Larry K.
