Murphy, Harm J. De Blij, 2015 Human Geography Erin H. Fouberg, Alexander B. Murphy, Harm J. de Blij, 2009-01-27 Taking us from our hominid ancestors to the megacities of today Human Geography brings a new emphasis to the political and economic issues of human geography **Subject Guide to Books in Print**, 2001 *Geography, Regions and Concepts* Harm J. De Blij, Peter O. Muller, 1985 Includes index **Aging in Comparative Perspective** Ian Gillespie Cook, Jamie Halsall, 2011-11-23 This book examines the key aging processes in seven countries United States United Kingdom Sweden Japan China Nepal and South Africa and the main policies that have been and are being developed to deal with this rapid change in the demographic profile It addresses the problems that are identified as well as the positive aspects of aging within each of these contrasting societies Thus it makes a significant contribution to the major debates about growing old across the globe **Geography**, 1983 Includes section Reviews and other bibliographical material The Geography of Tourism and Recreation, **Seeking a Richer Harvest** Tina Thurston, Christopher T Fisher, 2006-11-25 Subsistence intensification innovation and change have long figured prominently in explanations for the development of social complexity

among foragers and horticulturalists and the rise of chiefly societies and archaic states yet there is considerable debate over the actual mechanisms that promote these processes Traditional approaches to the intensification question emphasize population pressure climate change bureaucratic management or even land degradation as prerequisites for the onset of new or changing strategies or the construction and maintenance of agricultural landscapes Most often these factors are modeled as external forces outside the realm of human decision making but recent archaeological research presents an alternative to this suggesting that subsistence intensification is the result of human driven strategies for power prestige and status stemming from internal conditions within a group When responding to environmental adversity human groups were less frequently the victims as they have been repeatedly portrayed Instead human groups were often vigorous actors responding with resilience ingenuity and planning to flourish or survive within dynamic and sometimes unpredictable social and natural milieux
