Population Growth And Agrarian Change An Historical Perspective:

Population Growth and Agrarian Change David B. Grigg, 1980-12-18 This book first published in 1980 suggests some ways of looking at the interrelationships between population growth and agrarian change and uses these approaches to consider the demographic and agrarian problems of various parts of Europe in the past in the fourteenth century the sixteenth and early seventeenth centuries and in the early nineteenth century Population Growth and Agrarian Change D. B. Grigg, 1980-12-18 Since the 1950s much attention has been paid to the effect of rapid population growth on the rural societies of the Third World Yet it is often forgotten that Europe faced similar problems in the past This book first published in 1980 suggests some ways of looking at the interrelationships between population growth and agrarian change and uses these approaches to consider the demographic and agrarian problems of various parts of Europe in the past in the fourteenth century the sixteenth and early seventeenth centuries and in the early nineteenth century These places are then compared with rural societies in the developing world at the present time Population growth and agrarian change David D. Grigg, 1980 Population Growth and Agrarian Change, 1975 Population growth and agrarian change David Brian Grigg, 1980 **Achieving Zero Hunger** Food and Agriculture Organization of the United Nations, 2018-06-05 This report provides estimates of investment costs both public and private required to eliminate chronic dietary energy deficits or to achieve zero hunger by 2030 This target is consistent with achieving both the Sustainable Development Goal 2 to eliminate hunger by 2030 and the Sustainable Development Goal 1 to eradicate poverty The report adopts a reference baseline scenario reflecting a business as usual situation to estimate the additional investment requirements In this scenario around 650 million people will still suffer from hunger in 2030 The investment requirements to eliminate hunger by 2030 are then estimated Hunger is eliminated through a combination of social protection and targeted pro poor investments The first component aims to bring the poor immediately above the extreme poverty line through social protection by a transfer to cover the poverty gap PGT The second component involves additional investment required to stimulate and to sustain higher pro poor growth of incomes and employment than in the business as usual scenario This would in turn reduce the need for social protection to cover the PGT The analysis is complemented by looking at alternative ways to achieve zero hunger by 2030 Mobility and Modernity Steven Lawrence Hochstadt, 2023-07-28 Mobility and Modernity uses voluminous German data on migrations over the past two centuries to demonstrate why conventional assumptions about the relationship between mobility and modernity must be revised Thus far the changing total volume of migration has not been traced over a long period for any country Unique migration registration statistics both detailed and broadly geographical in coverage allow the precise plotting of migration rates in Germany since 1820 Steve Hochstadt combines careful quantitative methods easily understood numerical data and social analysis based upon broad reading in German social history to show that current beliefs about the direction and timing of changes in German mobility which have been based on late nineteenth century

anxieties about urbanization and industrialization do not match the data Migration rates in Germany rose continuously throughout the nineteenth century and have fallen during the twentieth century Mobility Hochstadt argues was not an unprecedented accompaniment to industrialization but a traditional rural response to specific economic changes Hochstadt's more precise analysis of urban in and outmigration shows the mechanism of urbanization to have been the migration of families rather than the much greater but also more circular migration of single men and women Hochstadt demonstrates the importance of examining historical behavior powerfully justifying the methods of historical demography as a path to social understanding The data and specific conclusions are German but the methods and reinterpretation of migration history have much wider application both to other modern European nations and to currently developing countries Those who study the modern social history of Europe the mechanisms that formed urban working classes and the methods of historical demography will be interested in Hochstadt's work

The Medieval Antecedents of English Agricultural Progress Bruce M.S. Campbell, 2023-05-31 Until recently historians tended to stress the perceived technological and ecological shortcomings of medieval agriculture The ten essays assembled in this volume offer a contrary view Based upon close documentary analysis of the demesne farms managed for and by lords they show that by 1300 in the most commercialized parts of England production decisions were based upon relative factor costs and commodity prices Moreover when and where economic conditions were ripe and environmental and institutional circumstances favourable medieval cultivators successfully secured high and ecologically sustainable levels of land productivity They achieved this by integrating crop and livestock production into the sort of manure intensive systems of mixed husbandry which later underpinned the more celebrated output growth of the seventeenth and eighteenth centuries If medieval agriculture failed to fulfill the production potential provided by wider adoption of such systems this is more appropriately explained by the want of the kind of market incentives that might have justified investment innovation and specialization on the scale that characterized the so called agricultural revolution than either the lack of appropriate agricultural technology or the innate backwardness of medieval cultivators

No Fixed Abode R. Humphreys, 1999-08-02 Homelessness is now a much greater problem than twenty years ago In Britain today around half a million homeless people form a regrettable permanent underclass This book spells out their similarities with the spurned vagrant of bygone days It traces how for centuries emergent laws have combated alleged threats from unruly vagrants while largely ignoring causal factors like economic fluctuation bad harvests disease and war It is argued that only educational and social reform will alleviate the homeless plight

The Premodern Chinese Economy Gang Deng, 2002-01-04 Covering the time span from the Shang to the Qing Periods 1520BC 1911AD Gang Deng examines important factors in the decline of the Chinese economy from medieval sophistication to modern underdevelopment These factors include resource endowments socio economic structure property rights state and bureaucracy ideology and values geo political environment internal rebellions external invasions and conquests The Premodern Chinese Economy is a comprehensive analysis of China's

economic history and provides essential background to the study of this country's modern struggle for growth and development Deng's emphasis on comparative analysis offers new insights into the concept of underdevelopment and theories of transitional economics This will become a major reference work in the fields of Chinese studies economic history and development studies Labour-Intensive Industrialization in Global History Gareth Austin, Kaoru Sugihara, 2013-09-13 The prevailing view of industrialization has focussed on technology capital entrepreneurship and the institutions that enabled them to be deployed Labour was often equated with other factors of production and assigned a relatively passive role Yet it was labour absorption and the improvement of the quality of labour over the course of several centuries that underscored the timing pace and quality of global industrialization While science and technology developed in the West and whereas the use of fossil fuels especially coal and oil were vital to this process the more recent history has been underpinned by the development of comparatively resource and energy saving technology without which the diffusion of industrialization would not have been possible The labour intensive resource saving path which emerged in East Asia under the influence of Western technology and institutions and is diffusing across the world suggests the most realistic route humans could take for a further diffusion of industrialization which might respond to the rising expectations of living standards without catastrophic environmental degradation **Unravelling Dreams** Ben Marsh, 2020-04-23 Reveals how commodity failure as much as success can shed light on aspirations environment and economic life in colonial societies **An Economic History of Nineteenth-Century Europe** Ivan Berend, 2013 A transnational survey of the economic development of Europe exploring why some regions advanced and some stayed behind *The Writing of Rural England, 1500-1800* S. Bending, A. McRae, 2003-08-12 The Writing of Rural England 1500 1800 documents and contextualizes the conflicting representations of rural life during a crucial period of social economic and cultural change It highlights the dialogues and tensions between agriculture and aesthetics economics and morality men and women leisure and labour By drawing on both canonical and marginal texts it argues that early modern writing not only reflected but played a part in constructing the cultural meanings of the English countryside with which we continue to live Revolutionary Europe, 1780-1850 Jonathan Sperber, 2014-06-11 Providing a continent wide history this major survey covers the key political events of this turbulent period Jonathan Sperber also looks at lives of ordinary people and considers broad social and economic developments In particular he examines the relationships between the different revolutionary movements showing how the French Revolution of 1789 set patterns which recurred over the following sixty years Upland Communities Pier Paolo Viazzo, 1989-02-16 This book follows the social economic and demographic transformations of the Alpine area from the late Middle Ages Its aim is to reassess the image of the upland community which emerges from the work of historians geographers and social anthropologists The book therefore deals at length with such problems as the causes and consequences of emigration and patterns of marriage and inheritance in favouring or hampering the adjustments of local populations to changing economic or ecological circumstances and tackles

the vexed question of the relative importance of cultural and environmental factors in shaping family forms and community structures Although its foundation lies in a long period of anthropological fieldwork conducted in an Alpine community Upland Communities relies on the methods and conceptual tools of historical demography Combined with a long term historical perspective its broad comparative approach unveils an unexpected diversity in regional and spatial demographic patterns and questions a number of deep rooted but ultimately misleading notions concerning mountain society and its alleged backwardness in the past

Greed, Lust and Gender Nancy Folbre, 2009-10-22 When does the pursuit of self interest go too far lapsing into morally unacceptable behaviour Until the unprecedented events of the recent global financial crisis economists often seemed unconcerned with this question even suggesting that greed is good A closer look however suggests that greed and lust are generally considered good only for men and then only outside the realm of family life The history of Western economic ideas shows that men have given themselves more cultural permission than women for the pursuit of both economic and sexual self interest Feminists have long contested the boundaries of this permission demanding more than mere freedom to act more like men Women have gradually gained the power to revise our conceptual and moral maps and to insist on a better and less gendered balance between self interest and care for others This book brings women s work their sexuality and their ideas into the center of the dialectic between economic history and the history of economic ideas It describes a spiralling process of economic and cultural change in Great Britain France and the United States since the 18th century that shaped the evolution of patriarchal capitalism and the larger relationship between production and reproduction This feminist reinterpretation of our past holds profound implications for today s efforts to develop a more humane and sustainable form of capitalism

Reproduction and Social Organization in Sub-Saharan Africa Ron J. Lesthaeghe, 2023-11-15 Unlike most Asian and Latin American countries sub Saharan Africa has seen both an increase in population growth rates and a weakening of traditional patterns of child spacing since the 1960s It is tempting to conclude that sub Saharan countries have simply not reached adequate levels of income education and urbanization for a fertility decline to occur This book argues however that such a socioeconomic threshold hypothesis will not provide an adequate basis for comparison These authors take the view that any reproductive regime is also anchored to a broader pattern of social organization including the prevailing modes of production rules of exchange patterns of religious systems kinship structure division of labor and gender roles They link the characteristic features of the African reproductive regime with regard to nuptiality polygyny breastfeeding postpartum abstinence sterility and child fostering to other specifically African characteristics of social organization and culture Substantial attention is paid to the heterogeneity that prevails among sub Saharan societies and considerable use is made therefore of interethnic comparisons As a result the book goes considerably beyond mere demographic description and builds bridges between demography and anthropology or sociology This title is part of UC Press s Voices Revived program which commemorates University of California Press s mission to seek out and

cultivate the brightest minds and give them voice reach and impact Drawing on a backlist dating to 1893 Voices Revived makes high quality peer reviewed scholarship accessible once again using print on demand technology This title was originally published in 1989 **The Vanishing Irish** Timothy W. Guinnane,2015-12-08 In the years between the Great Famine of the 1840s and the First World War Ireland experienced a drastic drop in population the percentage of adults who never married soared from 10 percent to 25 percent while the overall population decreased by one third What accounted for this For many social analysts the history of post Famine Irish depopulation was a Malthusian morality tale where declining living standards led young people to postpone marriage out of concern for their ability to support a family The problem here argues Timothy Guinnane is that living standards in post Famine Ireland did not decline Rather other more subtle economic changes influenced the decision to delay marriage or not marry at all In this engaging inquiry into the vanishing Irish Guinnane explores the options that presented themselves to Ireland s younger generations taking into account household structure inheritance religion cultural influences on marriage and family life and especially emigration Guinnane focuses on rural Ireland where the population changes were most profound and explores the way the demographic patterns reflect the rural Irish economy Ireland s place as a small part in a much larger English speaking world and the influence of earlier Irish history and culture Particular effort is made to compare Irish demographic behavior to similar patterns elsewhere in Europe revealing an Ireland anchored in European tradition and yet a distinctive society in its own right Originally published in 1997 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905 *Agricultural Enlightenment* Peter Jones,2016 *Agricultural Enlightenment* explores the modernization of the rural economy in Europe through the lens of the Enlightenment It focuses on the second half of the eighteenth century and emphasizes the role of useful knowledge in the process of agrarian change and agricultural development As such it invites economic historians to respond to the challenge issued by Joel Mokyr to look beyond quantitative data and to take seriously the argument that cultural factors broadly understood may have aided or hindered the evolution of agriculture in the early modern period what people knew and believed had a direct bearing on their economic behavior Mokyr *The Enlightened Economy* Evidence in support of the idea that a readily accessible supply of agricultural knowledge helps to explain the trajectory of the rural economy is drawn from all of the countries of Europe The book includes two cases studies of rapid rural modernization in Scotland and Denmark where *Agricultural Enlightenment* was swiftly followed by full scale *Agricultural Revolution*
