Population Policy And Ethics The American Experience:

Population Policy and Ethics Robert M. Veatch, 1977 Beyond the Numbers Laurie Ann Mazur, 2013-04-16 *Beyond the Numbers* presents a thought provoking series of essays by leading authorities on issues of population and consumption. The essays both define the poles of debate and explore common ground beyond the polarized rhetoric. Specific chapters consider each of the broad topics addressed at the International Conference on Population and Development held in September 1994 in Cairo, Egypt. The essays are supplemented by sidebars and short articles featuring more impassioned voices that highlight issues of interest not fully explored in the overviews. As well as providing a sense of the difficulties involved in dealing with these issues, the essays make clear that constructive action is possible. Topics covered include the interrelationships between population, economic growth, consumption, and development; the history of population and family planning efforts; gender equality and the empowerment of women; reproductive rights; reproductive health; family planning; health and mortality.

Biomedical Ethics Reviews · 1992 James M. Humber, Robert F. Almeder, 1993-02-09 *Biomedical Ethics Reviews 1992* is the tenth volume in a series of texts designed to review and update the literature on issues of central importance in bioethics today. Two topics are discussed in the present volume: 1. Bioethics and the Military and 2. Compulsory Birth Control. Each topic constitutes a separate section in our text; introductory essays briefly summarize the contents of each section. Bioethics is by its nature interdisciplinary in character. Recognizing this fact, the authors represented in the present volume have made every effort to minimize the use of technical jargon. At the same time, we believe the purpose of providing a review of the recent literature as well as of advancing bioethical discussion is well served by the pieces collected herein. We look forward to the next volume in our series and very much hope the reader will also.

International population policy issues and choices for the United States., 1987 **Population Policy and Women's Rights** Ruth Dixon-Mueller, 1993-03-30 Global population policies are under intense scrutiny as environmental and development organizations worry about the threat of overpopulation and call for stronger measures of population control. At the same time, women's organizations in both developing and industrialized countries are intensifying their attacks on the simplistic thinking of the population controllers and the quest for a technological fix on the part of the family planning establishment. *Population Policy and Women's Rights* presents a forceful argument for a more responsive approach to fertility limitation in developing countries, one that builds on women's concerns about their survival and security and strengthens women's rights. Ruth Dixon-Mueller reviews the history of the debate between feminists and the birth control movement, examines the forces affecting U.S. population policy on the domestic and international fronts, and documents the relationship between women's

reproductive rights and their rights in other areas Dixon Mueller begins by focusing on the evolution of the political positions of the women's movement and the birth control population control movements She examines the relationship between different aspects of women's rights and reproductive choice in developing countries She concludes with a proposal for a woman centered approach to reproductive policy making based on promoting women's rights and protecting women's sexual and reproductive health Written from a sociological perspective *Population Policy and Women's Rights* is recommended for researchers policy makers and students in the fields of population development women's studies and human rights

Fertile Matters Elena R. Gutiérrez, 2009-06-03 While the stereotype of the persistently pregnant Mexican origin woman is longstanding in the past fifteen years her reproduction has been targeted as a major social problem for the United States Due to fear fueled news reports and public perceptions about the changing composition of the nation's racial and ethnic makeup the so called Latinization of America the reproduction of Mexican immigrant women has become a central theme in contemporary U S politics since the early 1990s In this exploration Elena R Guti rrez considers these public stereotypes of Mexican American and Mexican immigrant women as hyper fertile baby machines who breed like rabbits She draws on social constructionist perspectives to examine the historical and sociopolitical evolution of these racial ideologies and the related beliefs that Mexican origin families are unduly large and that Mexican American and Mexican immigrant women do not use birth control Using the coercive sterilization of Mexican origin women in Los Angeles as a case study Guti rrez opens a dialogue on the racial politics of reproduction and how they have developed for women of Mexican origin in the United States She illustrates how the ways we talk and think about reproduction are part of a system of racial domination that shapes social policy and affects individual women's lives

Comprehensive Sickle Cell Center Program ,1980 **Population Policy and Ethics the American Experience** Robert M. Veatch,1977 *Poor Women, Powerful Men* Martha C Ward,2019-07-09 *Poor Women Powerful Men* chronicles the achievements and subsequent failure of the Louisiana Family Health Foundation the most extensive family planning program ever to operate in the United States Martha C Ward s even handed account reveals the mechanisms of politics

poverty and public health policies at work in the perpetual controversies surrounding reproductive rights and the delivery of health care services to the poor Ward's book begins in the early 1960s when Louisiana was among the most underdeveloped states and ranked at the bottom of all scales measuring illiteracy illegitimacy and infant mortality Despite the free statewide Charity Hospital system many routine preventive medical and public health services were not available to poor women and their children particularly if they were black But in the mid 1960s a visionary group of doctors and health care practitioners began to clear the hurdles erected by law church and the medical political establishment By 1970 they had set up the first statewide family planning program for poor people in the United States The Louisiana experiment was a spectacular success The Ford Rockefeller and Kellogg Foundations poured millions of dollars into the program The Great Society and War on Poverty programs placed a high priority on the health of poor mothers and infants With the help of the population lobby including Planned Parenthood and the Agency for International Development the Family Health Foundation moved into Latin America and other developing areas But in 1974 the bubble burst Accusations of fiscal mismanagement fraudulent statistics patronage and political payoffs led to federal indictments and jail sentences for top officials Poor women and powerful men the black and white communities and the liberal and conservative medical factions were pitted against each other With the collapse of the program methods for handling the epidemic of adolescent pregnancies and the high infant mortality rate reverted to the state bureaucracies Poor Women Powerful Men is the first book length account of the Louisiana experiment In a clear and dispassionate voice Ward demonstrates that many of the questions raised by the experiment persist Is family planning an answer to the cycle of poverty teenage pregnancies and infant mortality How can the conflict between private and public delivery of medical care be resolved Where do the reproductive rights of women fit into governmentally supported birth control programs We seem no closer today to answering these questions than the Louisiana Family Health Foundation was more than a decade ago
