Simonovits,2003-09-30 The issue of unfunded public pension

systems have moved to the centre of public debate all over the world Unfortunately a large part of the discussions have remained on a qualitative level This book seeks to address this by providing detailed knowledge on modelling pension systems **Old Age In Europe** Kathrin Komp,Marja Aartsen,2013-01-24 Europe currently is the oldest continent in the

world and its population is still ageing This demographic shift affects society economy and welfare states Scholars from

various disciplines and the public noted this development and wonder what effects it may have but lack adequate information. They call for explanations that are concise and easily accessible. The book at hand fills this lacuna. It introduces readers to the most important developments, theories, concepts and discussions in ageing studies, always keeping an eye on the current situation in Europe. Each chapter adopts the perspective of a different discipline, e.g. public health, sociology, economics or technology. To make the explanations easy to understand, the book includes learning tools such as learning objectives, multiple choice questions and a glossary.

**The Welfare State in Europe** Pierre Pestieau, Mathieu Lefebvre, 2018-08-23. Although in Europe there continues to be a large degree of consensus that it is the responsibility of government to ensure that nobody who is poor, sick, disabled, unemployed or old is left deprived, there are mounting calls to roll back spending on the welfare state. It is argued that it fails to achieve its main objectives, that it is responsible for a decline in economic performance and that it was conceived in a very different period and is therefore not adapted to modern realities. This second edition of *The Welfare State in Europe: Economic and Social Perspectives* provides an informed analysis of the key criticisms of the welfare state and examines the prospects of this system in an increasingly integrated world. It answers important questions regarding the current social situation of European countries, the performance of the welfare states and the reforms that should be undertaken. It calls for fundamental changes in social policies in order to address the rising inequality that hampers social cohesion in Europe. Now focused on Europe in its entirety and including a new chapter on long term care, this new edition of an integral text on the welfare state places increased focus on social divisions and the populist vote to provide a balanced and up to date analysis of the performance of current systems.

***Immigrant Integration in Europe*** Angela Paparusso, 2021-08-08. This topical book sheds light on immigrants' subjective well being by analysing the main factors associated with self reported life satisfaction among immigrants and natives. It thereby draws upon subjective components of well being which are now receiving growing attention in well being research. It also fills in a gap in migration research which has not yet focused on the study of immigrants' well being. Starting from a broader focus on Europe, the book then looks more closely at Italy. This is a key country in the immigration policy field in Europe but where the study of immigrants' integration from a subjective perspective has been rarely addressed so far. The book provides suggestions for constructing and implementing immigration and integration policies by not only taking into account the needs of the host societies but also the experiences, opinions, requirements and expectations of immigrants. This book is very useful for academic and policy researchers working on immigrant integration issues.

***Older Women in Europe*** Isabella Paoletti, 2022-09-30. This book is about older women's strength, freedom, tenacity, determination, resilience, independence, social and political involvement and in particular it is about reimagining ageing. Older women represent the great majority of older people. The book describes instances of age and gender discrimination and examples of social inclusion and protagonism of older women in Europe. It solicits a change in perspective focusing on the necessary societal changes to make space to older people and older women in particular. How is

society going to address age and gender discrimination in social and institutional settings How should work settings change to effectively make space to older workers and in particular older women How should the pension system change How could public health systems could provide effective care to older people and be sustainable This edited collection focuses on older women s rights rather than their needs adopting a human rights based approach Preservation of older women s dignity autonomy and security is its central topic that is ensuring that their rights are recognised This collection offers insights valuable to a wide array of human rights activists professionals policymakers and social scientists and older women themselves
