Population And Society In Western European Port Cities:

Population and Society in Western European Port Cities, C.1650-1939 Richard Lawton, W. Robert Lee, 2002-01-01
This volume brings together ten original papers on the population dynamics and development of Western European port cities. In a substantial overview chapter, Lawton and Lee examine Port Development and the Demographic Dynamics of European Urbanisation setting in context the individual case studies that follow. These studies of Bremen, Cork, Genoa, Glasgow, Hamburg, Liverpool, Malm, Nantes, Portsmouth and Trieste provide an important enhancement of our understanding of the particular socio-economic and demographic characteristics of port cities and point to the existence of a particular port demographic regime. They emphasize the central importance of the high proportion of unskilled and casual labor, the susceptibility of cyclical employment, the inflated risk of epidemic infection and other demographic and economic factors specific to port cities.

Life on the Tyne Peter D. Wright, 2016-05-06
Whilst the early modern period has long been recognized as witnessing a growth in trade and consumerism, the majority of studies to date have tended to focus upon London and southern England. In order to provide a more balanced understanding of the dynamics at work on a national level, this book explores the local economy and waterborne trades of Newcastle and the River Tyne in North East England. Drawing upon a variety of primary sources,

including parish records probate inventories Newcastle Exchequer port books and the previously unpublished diary of an apprentice hostman none of which have been examined previously in this context the study adds significantly to our understanding of the growing community in North East England In particular it underlines the expansion of a thriving middling class with an associated culture of consumption driving a rapid increase in the import and often re export of a wide range of luxury items of food clothing and soft furnishings As the coal trade and a flourishing general trade with London and other home and overseas ports grew the book highlights the major impact upon the size and variety of work in the port and the subsequent increasing size and complexity of the water trades community and its associated business networks

Geographers Hayden Lorimer, Charles W. J. Withers, 2013-09-12 This volume of Geographers Biobibliographical Studies brings together essays on four Frenchmen a Czech and three Englishmen The lives of our subjects extend from the late Enlightenment and the era of polite science in Regency Britain to the first decade of the 21st century These geographers and their studies are linked not only in their regional expertise from Brazil French Indo China to Scandinavia and South Africa but also by their commitment to the development of geography as a science and as a discipline Here in different settings and at different times we can see how the lived experience of geographers lives shaped the contours of the subject Poverty and Welfare in Guernsey, 1560-2015 Rose-Marie Crossan, 2015 An account of poor relief in Guernsey from the Reformation to the twenty first century incorporating a detailed case study of the St Peter Port workhouse and an outline of the development of Guernsey s modern social security system This book based on extensive original research provides an account of parochial poor relief in Guernsey from the Reformation to the twenty first century incorporating a detailed case study of the parochial workhouse in the town of St Peter Port and an outline of the development of Guernsey s modern social security system from its beginnings in the 1920s to the present day Guernsey has had throughout much of its history a disproportionately large population for its size in the early eighteenth century St Peter Port was on a par with English county towns such as Warwick and Lincoln Moreover since Guernsey was outside the jurisdiction of the Westminster Parliament and retained cultural affinities with France the island developed its own social welfare regime which was closer in some respects to continental regimes than it was to the English Poor Law model The differing nature of welfare regimes how they arose and how they differ is a major focus of interest amongst historians of social welfare besides being a fascinating local study the book has much to contribute to the wider history of social welfare in Britain and Europe Rose Marie Crossan completed her doctorate at the University of Leicester and is the author of Guernsey 1814 1914 Migration and Modernisation The Boydell Press 2007

Prostitution and Social Control in Eighteenth-Century Ports Marion Pluskota, 2018-10-24 In the last third of the eighteenth century Bristol and Nantes were two of the most active commercial ports of England and France despite a slowdown of their economy Their economies were based primarily on the maritime trade but they developed alongside Atlantic industries that attracted many migrants both male and female from the surrounding countryside and from abroad

The busy urban environment the high number of sailors and single men migrating to the port and the decline of female house based proto industries were factors encouraging the development of prostitution How prostitution is perceived in the context of social control and urban change is key to understanding the evolving attitudes to gender and sexuality in the eighteenth century In this comparative study Marion Pluskota offers an analysis of the lives of prostitutes that looks beyond a purely criminal perspective and which encompasses their roles within their families relationships and social networks Using police and judicial records she provides a valuable corrective to the narrow analysis of prostitutes in terms of immorality or deviance The unique forms of development and problems faced by port cities in the early modern period make them particularly interesting subjects for comparative history This book is well suited for those who study social history gender and women s history

The European Peasant Family and Society Richard L. Rudolph, 1995-01-01 In recent years the peasant household has become a central focal point of social history This is true not only because the peasant represents the major element of European society through the nineteenth century but also because many of the main issues in modern historical debate can be studied within the sphere of the peasant family This book deals with the European peasant family during the period of transformation from agrarian to industrial society the time called by some the period of protoindustrialization The essays in this volume explore some of the major issues concerning the influence of the economy society and institutions on the peasant household and conversely the influence of the peasant household on the outside world Themes dealt with include the ways in which the physical environment and the economy may make for very different family structures and even affect intra family relationships the effects of inheritance marriage and kinship strategies as well as social pressure on peasant family structure and demography the debate about changing gender roles and status the debate over the manner and effects of class formation questions of social and political agency the nature of gender and parent child relations the validity of protoindustrial theory and the role of peasants in initiating industrialization as consumers producers and as a labor force In examining these themes the essays provide both case studies and innovative analysis by preeminent international scholars in the fields of family and women s history economic history and demography
