Population Et Developpement Durable:

Population et développement durable (Population and Sustainable Development). Gérard-François Dumont, 2019 French Abstract La science de la population qui étudie notamment comment s'effectuent les relais entre les générations est au cœur du développement durable puisque ce dernier est un développement qui répond aux besoins des générations du présent sans compromettre la capacité des générations futures à répondre aux leurs. Néanmoins dans le sillage du terme de développement durable une conception mal comprise de ce dernier consiste à promouvoir une nouvelle forme de malthusianisme c'est-à-dire une attitude méfiante devant la vie humaine. Il importe donc de confronter cette nouvelle forme de malthusianisme à la réalité démographique. L'analyse scientifique montre d'abord que les évolutions démographiques mondiales des deux dernières siècles sont la preuve d'un développement durable qui s'est concrétisé bien avant même sa formulation. Elle permet aussi de prouver qu'il ne faut pas faire de la hausse moyenne du peuplement dans le monde le bouc émissaire de l'éventuelle insuffisance de développement durable.

Population et développement durable Pierre Peltre, 2003 Dans ce petit atlas on a voulu représenter les inégalités de développement par rapport aux grandes masses de population du monde selon le procédé cartographique de l'anamorphose. Ces cartes proportionnelles la population ont été agencées en séquences historiques et prospectives pour donner une lecture saisissante des grandes dynamiques démographiques économiques et sociales qui conditionnent troitement un développement durable. L'ouvrage est accompagné d'un CD Rom de cartographie interactive qui donne accès aux données de chaque pays et facilite aussi l'analyse spatiale des chronologies présentes.

Population et développement Alain Lery, Patrice Vimard, 2001 La conférence du Caire en septembre 1994 a marqué un tournant dans les politiques démographiques prônant l'abandon du contrôle des naissances par les États. Faisant le bilan de l'adoption de ce programme sont rassemblés ici les rapports des experts français analysant des conditions socio-économiques favorisant les relations entre la population et le développement.

Cliquet, Kristiaan Thienpont, 2013-04-09 Since the onset of modernisation the world population has doubled several times and will soon reach 6 billion of people The annual rate of increase in the world population is approximately 90 million people This is the largest absolute level of population growth ever recorded According to the most recent population projections of the United Nations the world population will probably double again before stabilising at a stationary level Ninety percent of the present and future population growth is accounted for by developing countries The fast increase in the size of the population in many developing countries is a serious obstacle to their attempts to overcome their backwardness make a substantial improvement to their quality of life and achieve a sustainable way of exploiting their renewable and non renewable resources At the same time non sustainable consumption and production patterns in the industrial countries and among wealthy citizens in developing countries place additional burdens on the planet's natural resources and ecosystems With a view of considering these problems and elaborating policy guidelines the United Nations staged its International Conference on Population and Development ICPD in Cairo Egypt September 5-13 1994 This monograph deals with the background to the ICPD its preparation proceedings and contents It also evaluates its results and recommendations by comparing the ICPD Action Programme with the current scientific literature The ICPD dealt with the key issues concerning the interrelations between population development and environment and their causes and was not limited to marginal issues such as abortion promiscuity and homosexuality as was the impression given in the media as a result of the way these questions were distorted by the action of religious fundamentalists The ICPD Action Programme forms an impressive charter with a broad range of relevant policy recommendations Nevertheless compared to most of the current scientific literature the ICPD seems to underestimate the seriousness and urgency of the issues at stake
