

POPULATION GROWTH AND SUSTAINABLE DEVELOPMENT IN SUB- SAHARAN AFRICA

1) INTRODUCTION.

This paper discusses Population Growth in Sub-Saharan Africa and its link to the region's sustainable development. It further provides some recommendation for policy makers in the region to ensure that the population dynamics of the region, are linked to its development strategies.

Human population is noted to be one of the major pillars of sustainable development alongside poverty, pollution, participation, policy and market failures, and prevention and management of disasters.¹ It is at the centre of sustainable development due to the impact that population growth, population ageing, migration and urbanization, holds for economic, social, and environmental sustainability.² Therefore, population planning is a significant factor in sustainable development.

This link between population and sustainable development is particularly critical for Sub-Saharan Africa whose population growth is seen to be rising more rapidly than that of the other regions of the world. The rate of the population growth is constantly increasing the region's vulnerability to climate change impacts and undermining its sustainable developmental efforts, such as alleviation of poverty, food security, preservation of the environment, and improvement of Africans' well-being generally.

Population Growth and Sustainable Development in Africa, 1992 **Special Issue on Population, Growth and Sustainable Development in Africa**, 1992 **Sustainable Development and Human Security in Africa** Louis A. Picard, Terry F. Buss, Taylor B. Seybolt, Macrina C. Lelei, 2015-04-22 Many new development initiatives have been introduced in Africa over the past few decades Each of these has been heralded as marking a new era in the continent's development However many of these initiatives have failed to produce sustained results due to numerous challenges including most importantly the lack of good governance The Africa P *Climate Change and Africa* Pak Sum Low, 2006-11-02 At the beginning of the twenty first century no environmental issue is of such truly global magnitude as the issue of climate change The poorer developing countries are the least equipped to adapt to the potential effects of climate change although most of them have played an insignificant role in causing it African countries are amongst the poorest of the developing countries This book presents the issues of most relevance to Africa such as past and present climate desertification biomass burning and its implications for atmospheric chemistry and climate energy generation sea level rise ENSO induced drought and flood adaptation disaster risk reduction the UNFCCC and Kyoto Protocol especially the Clean Development Mechanism capacity building and sustainable development It provides a comprehensive and up to date review of these and many other issues with chapters by the leading experts from a range of disciplines Climate Change and Africa will prove to be an invaluable reference for all researchers and policy makers with an interest in climate change and Africa **Post-Independence Development in Africa** David Mhlanga, Emmanuel Ndhlovu, 2023-07-11 The book Post Independence Development in Africa Decolonisation and Transformation Prospects revisits the development debates and development realities in Africa This is achieved by offering theoretical comments about post independence development in Africa and by providing historical details pertaining to the development approaches adopted in Africa immediately after independence in the 1960s and mid 70s Sitting at the intersection of two sets of scholarly literature namely literature on development and literature on development discourses and practices in Africa the book comprises a mixture of detailed sector specific accounts of the status of development on the continent The chapters in the book also contribute to clarifying how the two strands of literature intersect using several case studies across Africa The Demographic Transition and Development in Africa Charles Teller, Assefa Hailemariam, 2011-03-04 The heated Malthusian Boserupian debates still rage over consequences of high population growth rapid urbanization dense rural populations and young age structures in the face of drought poverty food insecurity environmental degradation climate change instability and the global economic crisis However while facile generalizations about the lack of demographic change and lack of progress in meeting the MDGs in sub Saharan Africa are commonplace they are often misleading and belie the socio cultural change that is occurring among a vanguard of more educated youth Even within Ethiopia the second largest country at the Crossroads of Africa and the Middle East different

narratives emerge from analysis of longitudinal micro level analysis as to how demographic change and responses are occurring some more rapidly than others The book compares Ethiopia with other Africa countries and demonstrates the uniqueness of an African type demographic transition a combination of poverty related negative factors unemployment disease food insecurity along with positive education health and higher age of marriage trends that are pushing this ruggedly rural and land locked population to accelerate the demographic transition and stay on track to meet most of the MDGs This book takes great care with the challenges of inadequate data and weak analytical capacity to research this incipient transition trying to unravel some of the complexities in this vulnerable Horn of Africa country A slowly declining population growth rates with rapidly declining child mortality very high chronic under nutrition already low urban fertility but still very high rural fertility and high population resource pressure along with rapidly growing small urban places Megacities and Rapid Urbanization: Breakthroughs in Research and Practice Management Association, Information Resources, 2019-07-05 As the global population continues to increase it has become necessary to find ways to handle this increase through various policy tools that address population growth and urbanization problems The urbanization process has both potential issues and opportunities that need to be exploited to move societies forward Megacities and Rapid Urbanization Breakthroughs in Research and Practice examines trends challenges issues and strategies related to population growth and rapid urbanization and its impact on urban environments The book also explores the use of different governance approaches in addressing challenges and different tools and systems of appropriate allocation to address issues This publication is an ideal reference source for academicians students practitioners professionals managers urban planners and government officials Area Studies (Regional Sustainable Development Review): Africa - Volume I Emmanuel Kwesi Boon, 2009-12-29 Area Studies Regional Sustainable Development Review Africa is a component of Encyclopedia of Area Studies Regional Sustainable Development Reviews in the global Encyclopedia of Life Support Systems EOLSS which is an integrated compendium of twenty one Encyclopedias The Theme on Area Studies Regional Sustainable Development Review Africa discusses matters of great relevance to our world in general and to the African Continent in particular as it deals with topics such as International Cooperation for Sustainable Development in Africa Food Security in Africa Challenges and Prospects Combating Poverty in Africa Demographic Dynamics and Sustainability in Africa Protection and Promotion of Human Health in Africa Strategies for Promoting Human Development in Africa Integrating Environment into Decision Making in Africa The Planning and Management of Land Resources in Africa Combating Desertification and Drought in Africa Conservation of Biological Diversity in Africa Ecotoxicology of Stable Pollutants in African Marine Ecosystems Safe and Environmentally Sound Management of Radioactive Waste Strengthening Business and Industry for Sustainable Development in Africa Concepts and Trends in Environmental Education for Sustainable Development International Institutional Arrangements International Legal Instruments and Mechanisms Agreements Forestry Principles Focus on the Congo Basin Rainforests The Rio
