Poston, Michael Micklin, 2006-08-10 This comprehensive handbook provides an overview and update of the issues theories processes and applications of the social science of population studies The volume s 30 chapters cover the full range of conceptual empirical disciplinary and applied approaches to the study of demographic phenomena This book is the first effort to assess the entire field since Hauser and Duncan s 1959 classic The Study of Population The chapter authors are among the leading contributors to demographic scholarship over the past four decades They represent a variety of disciplines and theoretical perspectives as well as interests in both basic and applied research

Exploring Contemporary Migration Paul Boyle, Keith Halfacree, Vaughan Robinson, 2014-06-11 Exploring Contemporary Migration provides the first comprehensive introduction to the various aspects of population migration in both the developed and the developing worlds Some of the most important quantitative and qualitative methods used for the description and analysis of migration are presented in a clearly structured and accessible way The various theoretical approaches used to explain the complex patterns of migration are also summarised These patterns are then explored through the use of specific migration related themes employment stage in the life course quality of life societal engineering violence and persecution and the role of culture Exploring Contemporary Migration is written in a user friendly accessible style appealing to undergraduate students of population geography and social science students taking a population module This text will also be valuable reading to those researchers and academics concerned with gaining a broad understanding of the dynamics and patterns of contemporary population

Natural Hazards and Human-Exacerbated Disasters in Latin America Edgardo Latrubesse, 2009-09-10 The main objective of the book is to offer a vision of the dynamics of the main disasters in South America describing their mechanisms and consequences on South American societies The chapters are written by selected specialists of each country Human induced disasters are also included such as desertification in Patagonia and soil erosion in Brazil The receding of South American glaciers as a response to recent climatic trends and sea level scenarios are discussed The approach is broad in analyzing causes and consequences and includes social and economic costs discussing environmental and planning problems but always describing the geomorphologic geologic involved processes with a good scientific substantiation This is

important to differentiate the book from others of a more social impact that discuss risks and disasters with emphases mainly on economy and simple impacts Actual theme interesting for a variety of professionals Fills in the scarcity of specialized literature in geosciences from South America The first book in the market exclusively devoted to geomorphology of disasters in South America Third World Urbanization J. Abu-Lughod, R. Jr Hay, 2013-07-04 First published in 2006 Despite the growing significance of the Third World and the critical nature of its urbanization there are few synthetic books covering more than one region of the Third World which can be used either by scholars seeking an overview of the process of world urbanization or by students in the growing number of courses now being offered in the field of comparative urbanism The most distressing problem was that the field of urbanization particularly with reference to developing countries seemed to us to have stagnated at theoretically sterile conceptualizations or even worse had deteriorated into fragmented empirical descriptive reports whether observing with sympathy or noting with alarm the rapidly declining condition of individual cities This book attempts to rectify this deficiency International Labour Documentation International Labour Office.
