Population Redistribution Economic 2v:

Population Change and the Economy: Social Science Theories and Models Andrew M. Isserman, 2012-12-06

Population change and population forecasts are receiving considerable attention from governmental planners and policy makers as well as from the private sector. Old patterns of population redistribution, industrial location, labor force participation, household formation, and fertility are changing. The resulting uncertainty has increased interest in forecasting because mere extrapolations of past trends are proving inadequate. In the United States of America, population forecasts received even more attention after federal agencies began distributing funds for capital infrastructure to state and local governments on the basis of projected future populations. If the national government had based those funding decisions on locally prepared projections, the optimism of local officials would have resulted in billions of dollars worth of excess capacity in sewage treatment plants alone. Cabinet level inquiries concluded that the U.S. Department of Commerce should 1. assume the responsibility for developing a single set of projections for use whenever future population was a consideration in federal spending decisions and 2. develop methods which incorporate both economic and demographic factors causing population change. Neither the projections prepared by economists at the Bureau of Economic Analysis nor those prepared by demographers at the Bureau of the Census were considered satisfactory because neither method adequately recognized the intertwined nature of demographic and economic change. Against this background, the American Statistical Association (ASA) and the U.S.

Migration and Economic Growth Brinley Thomas, 1973-05-03. Emigration, immigration, economic aspects. Great Britain: USA. **A Bibliography of Historical Economics to 1980** Deirdre N. McCloskey, George K. Hersch, Jr., 1990. Historians and economists will find here what their fields have in common: the movement since the 1950s known variously as cliometrics, economic history, or historical economics. A leading figure in the movement, Donald McCloskey, has compiled with the help of George Hersch and a panel of distinguished advisors a highly comprehensive bibliography of historical economics covering the period up until 1980. The book will be useful to all economic historians as well as quantitative historians, applied economists, historical demographers, business historians, national income accountants, and social historians. Economic Development, the Family, and Income Distribution Simon Kuznets, 2002-09-12. This is a collection of essays by Simon Kuznets, winner of the 1971 Nobel Memorial Prize in Economic Sciences, published posthumously. It represents the primary concerns of his research at a late phase of his career as well as themes from his earlier work. The first four chapters deal with modern economic growth. Chapters five to seven introduce the main theme of the remainder of the volume: interrelations between demographic change and income inequality. Chapters eight to ten draw on a wider set of data to make comparisons of income inequality among societies at widely different levels of development. Chapter eleven returns to data for the United States to develop more fully the

importance of differing childbearing patterns for income inequality In the introduction Professor Richard Easterlin discusses the relationship of the essays to the balance of Kuznets's writings In the afterword Professor Robert Fogel discusses the methodologies favoured by Kuznets
