[50 Things to Think About as an Early Career Researcher](#) Margaret J. Robertson, Donna Starks, Gaelle Horsley, 2025-09-11. This book for Early Career Researchers (ECRs) provides vital insights for jump-starting your research career and guidance on how you can find your own ways of knowing, being, doing, and communicating to progress your career. Charting a course through the first years of a research career while retaining control of your life and your authenticity is more challenging than it has ever been. This book argues that there are multiple ways of being an ECR and that research pathways are uniquely individual. It shows how to prepare yourself for your research journey and contains useful hints about preparing manuscripts, writing research grants, developing supervision skills, and forging a successful research career. Offering solutions to common challenges, it provides insights into preparing CVs, preparing for interviews, and other opportunities for you and your career. Providing practical advice based on extensive experience, this book is essential reading for those completing or who have recently completed PhDs as well as those in the early stages of their career in higher education.

Social Implications of Research in Higher Education Mdikana, Andile Alfred, 2025-05-29. Traditional research assumes a singular, almost absolutist approach to knowledge. In contrast, critical theory challenges the positivist outlook on scientific research and assumes a more socio-cultural outlook on the social world. In specific terms, critical research examines the nature of power dynamics influencing the social world. More broadly, this has

implications for understanding inequality and disparity across cleavages of race gender ethnicity sexual orientation and economic class among other differences in identity Furthermore rather than simply acknowledging the subjective nature of the social world critical research calls for fundamentally transforming perceptions and attitudes in a manner that views marginalized populations more equitably Social Implications of Research in Higher Education examines the social implications of research confounded by culturally reinforced presumptions such as stereotypes and other biases that privilege those in power It analyzes research aimed at benefiting marginalized or oppressed populations who lack the same opportunities and benefits that are otherwise granted to those in mainstream society Covering topics such as service learning university community engagement and research translation this book is an excellent resource for social justice advocates sociologists researchers professionals scholars academicians and more

Ethical Practice in Psychology Alfred Allan, Anthony Love, 2010-01-26 Close up insights on how experts in the field are re interpreting ethical principles to create workable policies for today and tomorrow from the creators of the 2007 APS Code of Ethics First cooperative project between Wiley Blackwell and the APS Offers a close up view of how enduring ethical principles are reinvented to ensure lasting relevance in times of modernisation and professional change Will be an accredited option for APS Professional Development the book will be built into PD workshops and also available for PD credits outside that context Essential reading for those involved in healthcare ethics internationally

Cultural Methods in Psychology Kate C. McLean, 2021-08-27 This volume describes a broad array of culturally sensitive research methods in psychology addressing diverse issues such as implicit bias identity development trauma and racism Each chapter provides instructive value for those who want to effectively employ these methods as well as deep reflection on the meaning of various methods for understanding complex psychological phenomena The methods discussed include various interview methodologies digital tools use of media representations exposure to positive exemplars survey and experience sampling and participatory action research These topics and methods are arranged across three sections methods that are meant to describe culture and cultural phenomena methodologies designed to

facilitate awareness of structural bias and inequity and a section on broad overarching issues such as the colonial harm inflicted by scientific research diversity in open science and intersectionality **The Psychologically Literate Citizen**

Dana Dunn, 2013-01-01 The concepts of psychological literacy and the psychologically literate citizen promise to invigorate a new global approach to psychology education. They pose a basic question: What attributes and capabilities should undergraduate psychology majors acquire? Many psychological organizations have defined psychological literacy by guidelines and lists of student learning outcomes, but although psychology educators across the globe have been working towards helping students to acquire these attributes over the past 50 years, educators have only recently explicitly delineated attributes and learning outcomes and sought to develop appropriate learning, teaching, and assessment strategies, including whole program approaches. The contributors to this volume argue that psychological literacy is the most important outcome of an undergraduate psychology education and that psychologically literate citizens use their knowledge of psychology to problem solve in ethical and socially responsible ways that directly benefit their communities. In this book, a rich variety of international perspectives contribute to the development of the two key concepts of psychological literacy and the psychologically literate citizen. Authors provide practical guidance for classroom psychology educators as well as curriculum developers and reviewers. Ultimately, they make the case for a paradigm shift in psychology education.
