Surgical Mentor Larry D. Florman, 2010-04-06 Y2K may have been overrated in terms of its immediate disruptive impact on medical and surgical practice but it also may have coincidentally marked an era of unprecedented change especially in the domain of surgical specialty education Whether one chooses to identify this with training in the beginning of the third year of medical school or the completion of the 7th or 8th year of super specialty training many of the same issues and concerns apply The transition from a scientifically oriented student to a real doctor is fraught with hazard and consumes hundreds of hours The transition into becoming a real doctor is fueled in many respects by what most patients expect their doctors to be This marvelous concise book is aimed precisely at helping you smoothly bridge the gap between student and practitioner We have witnessed a decline in surgical career choices but now a reversal of that decline is occurring with a renewed growth of interest in careers in all surgical specialties Studies on workforce or old fashioned manpower as it were continue to show that there is a growing demand for surgical specialty services in America Depending on where you live it may be highly specialty oriented or nearer to old fashioned general surgery
