This revised and updated sixth edition of Reference and Information Services continues the book's rich tradition covering all phases of reference and information services with less emphasis on print and more emphasis on strategies and scenarios. Reference and Information Services is the go-to textbook for MSLIS and i School courses on reference services and related topics. It is also a helpful handbook for practitioners. Authors include LIS faculty and professionals who have relevant degrees in their areas and who have published extensively on their topics. The first half of the book provides an overview of reference services and techniques for service provision including the reference interview, ethics instruction, reader's advisory, and services to diverse populations including children. This part of the book establishes a foundation of knowledge on reference service and frames each topic with ethical and social justice perspectives. The second part of the book offers an overview of the information life cycle and dissemination of information followed by an in-depth examination of information sources by type including dictionaries, encyclopedias, indexes, and abstracts as well as by broad subject areas including government statistics and data, health, and legal information. This second section introduces the tools and resources that reference professionals use to provide the services described in the first half of the text.

The Book of Acts in its First Century Setting, Volume 2 David W. Gill,Conrad Gempf,2000-11-24. The results of our rapidly expanded historical and archaeological knowledge have here been brought to bear on the Book of Acts to stunning effect. Outstanding as Jackson and Lake was in its day, this volume on the Graeco-Roman setting of Acts holds out the promise of equaling if not surpassing that great achievement. Paul Barnett, Bishop of North Sydney, Australia. This well-written volume offers a remarkable up-to-date collection of relevant new data to assist in scenario formation for a considerate reading of the Book of Acts. The largely Australian and British team of authors must be congratulated for preparing this very useful data set. There are authoritative descriptions of travel, food supply, domestic and political religion of urban elites, and of the Eastern Mediterranean provinces and their leadership. Such information about the realm of the Graeco-Roman world will enable the interpreter of Acts to bring these data to bear in the process of interpretation. Of great use to ancient historians, classicists, and biblical scholars, yet written and presented in such a way that it will be fascinating to intelligent nonprofessionals as well. Bruce J. Malina, Creighton University.
