01

What is a Portfolio Assessment?

Valeri-Gold et al. (1991/1992) describe it as a formative assessment technique where students transform into "active learners and questioning thinkers" (p. 298). Harlin et al. (1992) view it as a "multidimensional system which provides teachers with a complete picture of a student's abilities and literacy development" (p. 203, cited in Gillespie et al., 1996, p. 482).

Portfolio Assessment Allan A. De Fina, 1992 In this book author Allan A De Fina invites teachers students and parents into the portfolio process which offers many opportunities to assess a student's performance and growth over time You'll read a brief background and a working definition of the process as well as learn how portfolios can be effectively used in any and every classroom You'll find practical suggestions for getting started pointers on how to manage the process and a look at the benefits of portfolio assessment [The Portfolio Approach to Assessment](#) Emily Grady, 1992 The shortcomings of standardized testing as the predominant form of student assessment in the United States are reviewed and the use and potential benefits of portfolio assessment are explored Children's educational experiences and their future job prospects and standards of living are being decided by test scores Moreover these test scores may be unfair or biased against some students Instead of more tests we need a new attitude toward assessment one that encourages a variety of assessments Portfolio assessment through collections of student works can be an encompassing format for this new philosophy Before considering what a portfolio should contain it is important to establish the purpose of the assessment The experiences of Vermont illustrate the development of a portfolio assessment with consistent standards Examples of guidelines for mathematics and language arts portfolios make it clear that it is possible to establish consistent practices It is also necessary to reflect on the portfolio occasionally using self evaluations and direct questions or profiles Educators also find portfolios useful tools for preservice teachers Portfolio assessment can be the framework for a new curricular structure that integrates assessment into the learning loop SLD [Portfolio Assessment for](#)

Early Childhood Education Petr G. Grotewell, Yanus R. Burton, 2008 This book focuses on early childhood education which spans the human life from birth to age 8 Infants and toddlers experience life more holistically than any other age group Social

emotional cognitive language and physical lessons are not learned separately by very young children Adults who are most helpful to young children interact in ways that understand that the child is learning from the whole experience not just that part of the experience to which the adult gives attention Although early childhood education does not have to occur in the absence of the parent or primary caregiver this term is sometimes used to denote education by someone other than these the parent or primary caregiver Both research in the field and early childhood educators view the parents as an integral part of the early childhood education process Early childhood education takes many forms depending on the theoretical and educational beliefs of the educator or parent Other terms that is often used interchangeably with early childhood education are early childhood learning early care and early education Much of the first two years of life are spent in the creation of a child s first sense of self or the building of a first identity Because this is a crucial part of children s makeup how they first see themselves how they think they should function how they expect others to function in relation to them early care must ensure that in addition to carefully selected and trained caregivers links with family home culture and home language are a central part of program policy If care becomes a substitute for rather than a support of family children may develop a less than positive sense of who they are and where they come from because of their child care experience [Encyclopedia of Measurement and Statistics](#) Neil J. Salkind,2006-10-13 The study of measurement and statistics can be less than inviting However in fields as varying as education politics and health care assessment and the use of measurement and statistics have become integral parts of almost every activity undertaken These activities require the organization of ideas the generation of hypotheses the collection of data and the interpretation illustration and analysis of data No matter where educated people look this critical analysis is more important than ever in an age where information and lots of it is readily available The ideas and tools contained in the Encyclopedia of Measurement and Statistics are approachable and can be invaluable for understanding a very technical world and the increasing flow of information Although there are references that cover statistics and assessment in depth none provides as comprehensive a resource in as focused and accessible a manner as the three volumes of this Encyclopedia Through approximately 500 contributions experts provide an overview and an explanation of the major topics in these two areas Key Features Covers every major facet of these two different but highly integrated disciplines from mean mode and median to reliability validity significance correlation and much more all without overwhelming the informed reader Offers cross disciplinary coverage with contributions from and applications to the fields of Psychology Education Sociology Human Development Political Science Business and Management Public Health and others Provides cross reference terms further readings and Web site URLs following most entries as well as an extensive set of appendices and an annotated list of organizations relevant to measurement and statistics Appendices Features Appendix A is a guide to basic statistics for those readers who might like an instructional step by step presentation of basic concepts in statistics and measurement Appendix B is a table of critical values used in hypothesis testing and an important part of any

reference in this area Appendix C represents a collection of some important and useful measurement and statistics Internet sites A primary goal of creating this set of volumes is to open up the broad discipline of measurement and statistics to a wider and more general audience than usual Edited by bestselling author Neil J Salkind this Encyclopedia is specifically designed to appeal to beginning and intermediate level students practitioners researchers and consumers of information It is a welcome addition to any academic library , **Encyclopedia of School Psychology** Steven W. Learning by Effective Utilization of Technologies: Facilitating Intercultural Understanding R. Mizoguchi,P. Dillenbourg,Z. Zhu,2006-11-15 A major theme of this book is the use of computers for supporting collaborative learning This is not surprising since computer supported collaborative learning has become both a widespread educational practice and a main domain of research Moreover collaborative learning has deep roots in Asian educational traditions Given the large number of researchers within this field its scope has become very broad Under this umbrella one finds a variety of more specific topics such as interaction analysis collaboration scripts e g the Jigsaw script communities of practice sociocognitive conflict resolution cognitive apprenticeship various tools for argumentation online discussion or collaborative drawing tools whiteboards collaborative writing and the role of facilitators Most research work on collaborative learning focuses on interactions rather than on the contents of environments which had been the focus in the previous decades of learning technology research However there is no reason to focus on one aspect to the detriment of the other The editors are pleased that the selected papers also cover multiple issues related to the storage representation and retrieval of knowledge ontologies for learning environments and the semantic web knowledge bases and data mining meta data and content management systems and so forth This publication also reveals a growing interest for non verbal educational material namely pictures and video materials which are already central to new popular web based applications This book includes contributions that bridge both research tracks the one focusing on interactions and the other on contents the pedagogical use of digital portfolios both for promoting individual reflections and for scaffolding group interactions
