Agencies,1998 **Managing a Corporate Bond Portfolio** Leland E. Crabbe, Frank J. Fabozzi, 2003-04-07 Praise for Managing a Corporate Bond Portfolio Crabbe and Fabozzi's Managing a Corporate Bond Portfolio is a refreshingly good book on the neglected topic in fixed income portfolio management. If you want to understand the latest thinking in corporate bonds, what drives prices, and why, read this book. You will emerge with knowledge that will help you get an edge in the competitive investing arena. Tim Opler, Director, Financial Strategy Group, CSFB. A practitioner's guide, a creative, comprehensive, and practical book that addresses the myriad of challenges facing managers of corporate bond portfolios. The chapter on liquidity, trading, and trading costs is a must read. Mary Rooney, Head of Credit Strategy, Merrill Lynch. As a Senior Portfolio Manager responsible for managing billions of dollars invested in fixed income products during the mid 1990s, Lee Crabbe was the one Wall Street strategist that I would read every week to help me figure out where value was in the corporate bond market and for insightful and easy-to-understand special reports that educated me and most investors on the risks and opportunities inherent in new structures and subordinated products. Fortunately for me and investors, Lee Crabbe and Frank Fabozzi have written this book, which compiles much of their previous work on corporate bond valuation along with new features that are a must read, especially in light of the volatile times in the corporate bond market over the past few years. For portfolio managers, analysts, traders, and even strategists, if there is one book in your bookshelf that you should have on corporate bond portfolio management, it is this one. William H. Cunningham, Managing Director, Director of Credit Strategy, J.P. Morgan Securities Inc. www.wileyfinance.com

The Mexican Pension Annuity Market Gregorio Impavido, 2007 This paper analyzes the performance and development of the Mexican pension annuity market established as a consequence of the 1997 pension reform The Mexican experience displays interesting characteristics providing lessons for other countries that still need to design the decumulation phase of their newly established second pillars At the same time it raises some technical and policy concerns that need addressing as they could hamper in the future the healthy development of the market The paper concludes that 1 general life insurance companies may better hedge longevity risk than specialized annuity companies 2 competition should be based on prices rather than additional products 3 better disclosure of options under the 1973 and 1997 social security laws should be given to disability and life annuitants and 4 various measures should be taken to improve asset liability management including allowing companies to trade over the counter derivatives and substituting over time the regulatory asset liability management framework with an economic asset liability management framework
