Portland, Image of a City Spencer Gill, 1981 **The Columbia** Samuel Christopher Lancaster, 1926 Images of the American City Anselm L. Strauss, 2017-09-08 Originally published in 1961 Images of the American City examines how Americans dealt with the rapid shock of urbanization as it evolved from an agricultural nation Working from the framework of a social psychologist Anselm L. Strauss offers a deeper look into the sociological psychological and historical perspectives of urban development He describes how the cultural changes of a space ultimately develop urban imagery by looking towards the urbanization of America from peoples views of the cities rather than how the cities are themselves Urban imageries are contrasted with the context of an ideal city and visitors perspectives of cities Strauss takes a step back to ask questions about what Americans think and have thought of their cities How do these cities compare to the image of an ideal city What are the different perspectives between a city dweller and a visitor He contrasts the tension between those within the city and those outside of its urban limits Strauss describes how space and time are major themes in the symbolic urbanization of a city He offers a macroscopic view of the city as a whole and shows how urban imageries evolved from changes in lifestyles He then provides historical breakdowns of different regions of the country and how they were urbanized This book documents and illustrates the change in American symbolization from the growth of American cities to the union of urbanity and rurality

Pratt,Peter Cheng-Chong Wu,2016-07-01 Contemporary urbanisation has two faces global flows of people money and information and that of localised social and economic disparities Recent research has focused on the headlines of

global cities as control centres of the world economy and social and economic shock waves that have raged through cities and regions but less attention has been paid to the secret life of cities and the changing nature of everyday life in the wake of such changes This book challenges current research and policy agendas recommending spatial concentration and relocation as a solution to the problems of environmental sustainability and social dislocation Instead this book highlights the key linkages between social and environmental problems it argues that neither are likely to be resolved with a simple spatial fix The book draws attention to local contexts of contemporary urbanisation emphasising consideration of policy making from the perspective of the household as a key unit of analysis in identifying links between labour and housing markets transport and leisure This book draws upon detailed household interviews about the daily experience of life in a global city It illustrates the dilemmas and solutions that people routinely find in order to go on in their lives It shows that these local fixes that are managed at the level of the household work in spite of and sometimes against existing policies aimed at sustainability It concludes that policy making needs to be radically overhauled in order to address the integrated nature of people s everyday lives
