Conference,1997 The Who, What, and Where of America Deirdre A. Gaquin,Mary Meghan Ryan,2018-09-28 The Who

What and Where of America is designed to provide a sampling of key demographic information. It covers the United States every state, each metropolitan statistical area, and all the counties and cities with a population of 20,000 or more. Who, Age, Race, and Ethnicity, and Household Structure. What, Education, Employment, and Income. Where, Migration, Housing, and Transportation. Each part is preceded by highlights and ranking tables that show how areas diverge from the national norm. These research aids are invaluable for understanding data from the ACS and for highlighting what it tells us about who we are, what we do, and where we live. Each topic is divided into four tables revealing the results of the data collected from different types of geographic areas in the United States, generally with populations greater than 20,000: Table A, States; Table B, Counties; Table C, Metropolitan Areas; Table D, Cities. In this edition, you will find social and economic estimates on the ways American communities are changing with regard to the following: Age and race; Health care coverage; Marital history; Education attainment; Income and occupation; Commute time to work; Employment status; Home values and monthly costs; Veteran status; Size of home or rental unit. This title is the latest in the County and City Extra Series of publications from Bernan Press. Other titles include County and City Extra, County and City Extra Special Decennial Census Edition, and Places, Towns, and Townships.

The SAGE Encyclopedia of Filipina/x/o American Studies. Kevin Leo Yabut Nadal, Allyson Tintiangco-Cubales, E.J.R. David. 2022-09-13. Filipino Americans are one of the three largest Asian American groups in the United States and the second largest immigrant population in the country. Yet within the field of Asian American Studies, Filipino American history and culture have received comparatively less attention than have other ethnic groups. Over the past twenty years, however, Filipino American scholars across various disciplines have published numerous books and research articles as a way of addressing their unique concerns and experiences as an ethnic group. The SAGE Encyclopedia of Filipina x o American Studies, the first on the topic of Filipino American Studies, offers a comprehensive survey of an emerging field focusing on the Filipino diaspora in the United States as well as highlighting issues facing immigrant groups in general. It covers a broad range of topics and disciplines, including activism and education, arts and humanities, health, history, and historical figures, immigration, psychology, regional trends, and sociology and social issues.

Boomburbs. Robert E. Lang, Jennifer B. LeFurgy. 2007-10-01. A glance at a list of America's fastest growing cities reveals quite a surprise: most are really overgrown suburbs. Places such as Anaheim, California; Coral Springs, Florida; Naperville, Illinois; North Las Vegas, Nevada; and Plano, Texas, have swelled to big city size with few people really noticing, including many of their ten million residents. These boomburbs are large, rapidly growing, incorporated communities of more than 100,000 residents that are not the biggest city in their region. Here, Robert E. Lang and Jennifer B. LeFurgy explain who lives in them, what they look like, how

they are governed and why their rise calls into question the definition of urban Located in over twenty five major metro areas throughout the United States numerous boomburbs have doubled tripled even quadrupled in size between census reports Some are now more populated than traditional big cities The population of the biggest boomburb Mesa Arizona recently surpassed that of Minneapolis and Miami Typically large and sprawling boomburbs are accidental cities but not because they lack planning Many are made up of master planned communities that have grown into one another Few anticipated becoming big cities and unintentionally arrived at their status Although boomburbs possess elements found in cities such as housing retailing offices and entertainment they lack large downtowns But they can contain high profile industries and entertainment venues the Los Angeles Angels of Anaheim and Arizona Cardinals are among over a dozen major league sports teams who play in the boomburbs Urban in fact but not in feel these drive by cities of highways office parks and shopping malls are much more horizontally built and less pedestrian friendly than most older suburbs And contrary to common perceptions of suburbia they are not rich and elitist Poverty is often seen in boomburb communities of small single family homes neighborhoods that once represented the American dream Boomburbs are a quintessential American landscape embodying much of the nation s complexity expansiveness and ambiguity This fascinating look at the often contradictory world of boomburbs examines why America s suburbs are thriving and how they are shaping the lives of millions of residents
