Portrait Of A Poison The 2 4 5 T Story The Politics Of Health:

The Politics of Agent Orange Jock McCulloch, 1984 **The Dirty Dozen** Bruce E. Johansen, 2003-06-30 Forty years after the publication of Rachel Carson's *Silent Spring* this important study examines the history industrial uses and harmful effects of the twelve most commonly used organochloride chemicals All have been fully or partially banned by the Stockholm Protocol an international treaty signed by about 120 countries in December 2000 Among the twelve are the dioxins the active ingredient in Agent Orange and polychlorinated biphenyls PCBs which are toxic in minute quantities Johansen pays special attention to the Inuit of the Arctic where these chemicals have been bio accumulating to dangerous levels moving up the food chain to a degree of toxicity that some Inuit mothers are no longer able to safely breast feed their infants The polar stratospheric ozone has been devastated by emissions of chlorofluorocarbons CFCs and new scientific findings connect global warming near the Earth's surface to significant cooling in the stratosphere This synergy aggravates ozone depletion because the chemical reactions that destroy the ozone become more energetic as temperatures drop Synthetic toxins have taken their toll on minority ethnic groups in the United States and persistent organic pollutants have inflicted physiological damage on humans and other animals Finally Johansen explores the estrogenic effects of such chemicals Sperm counts have declined as much as 50% in 50 years **The Social and Cultural Construction of Risk** B.B. Johnson, V.T. Covello, 2012-12-06 The Social and Cultural Construction of Risk Issues Methods and Case Studies Vincent T Covello and Branden B Johnson Risks to health safety and the environment abound in the world and people cope as best they can But before action can be taken to control reduce or eliminate these risks decisions must be made about which risks are important and which risks can safely be ignored The challenge for decision makers is that consensus on these matters is often lacking Risks believed by some individuals and groups to be tolerable or acceptable such as the risks of nuclear power or industrial pollutants are intolerable and unacceptable to others This book addresses this issue by exploring how particular technological risks come to be selected for societal attention and action Each section of the volume examines from a different perspective how individuals groups communities and societies decide what is risky how risky it is and what should be done The writing of this book was inspired by another book *Risk and Culture An Essay on the Selection of Technological and Environmental Dangers* Published in 1982 and written by two distinguished scholars Mary Douglas a British social anthropologist and Aaron Wildavsky an American political scientist the book received wide critical attention and offered several provocative ideas on the nature of risk selection perception and acceptance **The Dioxin War** Robert Allen, 2004-07-20 Robert Allen exposes the attempts by the chemical industry to cover up the true impact of dioxin on human health **Herbicides, Ecological Effects, 1982-1987** Jayne T.
