*At the Limits of Presentation* Martta Heikkilä, 2008 This study explores the significance of art in Jean-Luc Nancy's philosophy. The main object of the work is to discuss the notion of art and its contribution to some of Nancy's central ontological ideas. Art's importance is considered in its own right, the main questions being whether art does have ontological significance and if so how one should describe this with respect to the theme of presentation. According to the work's central argument with his thinking on art, Nancy attempts to give one viewpoint to what is called the metaphysics of presence and to its deconstruction. On which grounds may one say that art is not reducible to philosophy? These topics are examined by highlighting the differentiation between the notions of presentation and representation with regard to the influence of Martin Heidegger and Jacques Derrida on Nancy's thought

**Objectivity** Günter Figal, 2010-09-29 Günter Figal has long been recognized as one of the most insightful interpreters working in the tradition of philosophical hermeneutics and its leading themes concerned with ancient Greek thought, art, language, and history. With this book, Figal presses this tradition of philosophical hermeneutics in new directions. In his effort to forge philosophical hermeneutics into a hermeneutical philosophy, Figal develops an original critique of the objectification of the world that emerges in modernity as the first stage in his systematic treatment of the elements of experience hermeneutically understood. Breaking through the prejudices of modernity but not sacrificing the importance and challenge of the objective world that confronts us and is in need of interpretation, Figal reorients how it is that philosophy should take up some of its most longstanding and stubborn questions. World, object, space, language, freedom, time, and life are refreshed as philosophical notions here since they are each regarded as elements of human life engaged in the task assigned to each of us: the task of understanding ourselves and our world

The Image of the Actor Shearer West, 1991-03-15 The mistake of interpreting 18th-century theatrical portraits too literally has been made since the 19th century when a different set of artistic codes prevailed. The image of the 18th-century actor, which we can obtain from prints, paintings, and pamphlets of the time, is not a collection of visual truths but a construction based on critical canons, aesthetic prejudices, and commercial motivations prevalent during the period. Through an analysis of the importance of theatre among all the pleasures and pastimes enjoyed by 18th-century Londoners, the author presents a detailed picture of the cultural climate inhabited by the actor and his audience. The overwhelming fascination they had with the actor provides the background to an analysis of the function of the theatrical portrait, the burgeoning economy of the engraver and the illustrator. Concepts of classicism and realism are explored in terms of how Garrick and Kemble will have been viewed in

their work The author also draws an interesting analogy between the aesthetics of action and sculptural representation through the work of Siddons and goes on to consider the representation of the comic actor and how it was informed by art and art theory

**Portraiture** Shearer West,2004-04-08 This fascinating new book explores the world of portraiture from a number of vantage points and asks key questions about its nature How has portraiture changed over the centuries How have portraits represented their subjects and how have they been interpreted Issues of identity modernity and gender are considered within a cultural and historical context Shearer West uncovers much intriguing detail about a genre that has often been seen as purely representational featuring examples from African tribes to Renaissance princes and from stars such as David and Victoria Beckham to ordinary people In the process she shows us how to communicate with the past in an exciting new way
