Excerpt from Great Portraits Children Still practically every great painter has tried his hand at painting children at least once or twice and most of them have produced excellent work only a man may turn out a very respectable portrait of a child and yet not be a true painter of children To do that well there is needed a certain insight into child character Not that a child has a very subtle or complicated character but it is a character all the same and one that can be divined only by sympathy Constable once said that to a man who approached Nature in an arrogant spirit her choicest beauties remained forever veiled One might say this particularly about children We feel instinctively that only those who love children can paint them About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at [www.forgottenbooks.com](http://www.forgottenbooks.com) This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works

Abandoned Children Rachel G. Fuchs, 1984-01-01 In nineteenth century France parents abandoned their children in overwhelming numbers up to 20 percent of live births in the Parisian area The infants were left at state run homes and were then transferred to rural wet nurses and foster parents Their chances of survival were slim but with alterations in state policy economic and medical development and changing attitudes toward children and the family their chances had significantly improved by the end of the century Rachel Fuchs has drawn on newly discovered archival sources and previously untapped documents of the Paris foundling home in order to depict the actual conditions of abandoned children and to reveal the bureaucratic and political response This study traces the evolution of French social policy from early attempts to limit welfare to later efforts to increase social programs and influence family life Abandoned Children illuminates in detail the family life of nineteenth century French poor It shows how French social policy with respect to
