**The Sugar Season** Douglas Whynott, 2014-03-04 A year in the life of one New England family as they work to preserve an ancient lucrative and threatened agricultural art the sweetest harvest maple syrup. How has one of America's oldest agricultural crafts evolved from a quaint enterprise with sugar parties and the delicacy sugar on snow to a modern industry? At a sugarhouse owned by maple syrup entrepreneur Bruce Bascom 80 000 gallons of sap are processed daily during winter's end. In *The Sugar Season* Douglas Whynott follows Bascom through one tumultuous season taking us deep into the sugarbush where sunlight and sap are intimately related and the sound of the taps gives the woods a rhythm and a ring. Along the way he reveals the inner workings of the multimillion dollar maple sugar industry. Make no mistake it's big business complete with a Maple Hall of Fame a black market a major syrup heist monitored by Homeland Security a Canadian organization called The Federation and a Global Strategic Reserve that's comparable to OPEC fitting since a barrel of maple syrup is worth more than a barrel of oil. Whynott brings us to sugarhouses where we learn the myriad subtle flavors of syrup and how it's assigned a grade. He examines the unusual biology of the maple tree that makes syrup possible and explores the maples and the industry's chances for survival highlighting a hot button issue how global warming is threatening our food supply. Experts predict that by the end of this century maple syrup production in the United States may suffer a drastic decline. As buckets and wooden spouts give way to vacuum pumps and tubing we see that even the best technology can't overcome warm nights in the middle of a season and that only determined men like Bascom can continue to make a sweet life out of rugged land.

**Locative Media** Rowan Wilken, Gerard Goggin, 2014-08-07 Not only is locative media one of the fastest growing areas in digital technology but questions of location and location awareness are increasingly central to our contemporary engagements with online and mobile media and indeed media and culture generally. This volume is a comprehensive account of the various location based technologies services applications and cultures as media with an aim to identify inventory explore and critique their cultural economic political social and policy dimensions internationally. In particular the collection is organized around the perception that the growth of locative media gives rise to a number of crucial questions concerning the areas of culture economy and policy.

Fricker, Jr.,2020-01-31 With COVID 19 sweeping across the globe with near impunity it is thwarting governments and health organizations efforts to contain it Not since the 1918 Spanish Flu have citizens of developed countries experienced such a large scale disease outbreak that is having devastating health and economic impacts One reason such outbreaks are not more common has been the success of the public health community including

epidemiologists and biostatisticians in identifying and then mitigating or eliminating the outbreaks Monitoring the Health of Populations by Tracking Disease Outbreaks Saving Humanity from the Next Plague is the story of the application of statistics for disease detection and tracking The work of public health officials often crucially depends on statistical methods to help discern whether an outbreak may be occurring and if there is sufficient evidence of an outbreak then to locate and track it Statisticians also help collect critical information and they analyze the resulting data to help investigators zero in on a cause for a disease With the recent outbreaks of diseases such as swine and bird flu Ebola and now COVID 19 the role that epidemiologists and biostatisticians play is more important than ever Features Discusses the crucial roles of statistics in early disease detection Outlines the concepts and methods of disease surveillance Covers surveillance techniques for communicable diseases like Zika and chronic diseases such as cancer Gives real world examples of disease investigations including smallpox syphilis anthrax yellow fever and microcephaly and its relationship to the Zika virus Via the process of identifying an outbreak finding its cause and developing a plan to prevent its reoccurrence this book tells the story of how medical and public health professionals use statistics to help mitigate the effects of disease This book will help readers understand how statisticians and epidemiologists help combat the spread of such diseases in order to improve public health across the world Hardwood Record ,1926 **Young People's New Pictorial Library of Poetry and Prose** ,1888
