**The Range of Interpretation** Wolfgang Iser, 2000 The author formulates an anatomy of interpretation through which we can understand the many different forms that the act of interpretation takes For Iser there are several different genres of interpretation all of which are acts of translation designed to transpose something into something else Obvious examples involve canonical texts and here Iser explores for example the Rabbinical exegesis of the Torah and Dr Johnson's reading of Shakespeare But what happens when the matter that one seeks to interpret consists not of a text but of a welter of fragments as in the story of history or is something hidden as in the practice of psychoanalysis or is as complex as a culture or a system He concludes that if interpretation is a form of translation then it is performative and will always depend on what it seeks to translate rather than on some absolute concept of truth Midwest The Cambridge bibliography of English literature. 3.
