Sartre's Philosophy Of Social Existence Modern Revivals In Philosophy:

Sartre's Philosophy of Social Existence George J. Stack,1992 Sartre's Philosophy of Social Existence is a critical interpretation of Jean Paul Sartre's phenomenology of social existence and the dynamics of group formation It seeks to trade the foreshadowing of a theory of individual action in the practical field of social existence in *Being and Nothingness* and sees a continuity between this work and Sartre's *Critique of Rational Dialectic* 1960 The movement in Sartre's thought from the abstract freedom of consciousness to concrete freedom and individual praxis is illuminated in relation to his description of a complex social dialectic It is shown that as Sartre develops an account of social group formation he admits determinations and necessities that undermine his attempt to preserve the idea of free individual praxis [Contemporary French Philosophy \(Routledge Revivals\)](#) Colin Smith,2010-10-18 First published in 1964 this is not just a chronicle or encyclopaedia but deals thoroughly in turn with meaning view about reason and views about values particularly moral values The author's knowledge of French literature is extensive and thorough and a feature of the book is his analysis of the philosophical implications of literary works by Sartre Paul Valery Camus and others [Forthcoming Books](#) Rose Arny,1993 **Subject Guide to Books in Print** ,1996 *Martin Buber and His Critics (Routledge Revivals)* Willard Moonan,2016-02-05 First published in 1981 Martin Buber has been acclaimed as one of the major philosophical and religious thinkers of the twentieth century with his influence and achievements spanning numerous fields however in each of these areas his work has also been severely criticised and his influence called into question This volume brings together in a systematic arrangement all the significant material by and about Martin Buber published in English up to the centenary of his birth in 1978 To make the bibliography as useful as possible the critical material was annotated and various indexes were constructed including an extensive subject index to both Buber's works and the criticism [Whitaker's Books in Print](#) ,1998 **The Modern Revival of Gnosticism and Thomas Mann's Doktor Faustus** Kirsten J. Grimstad,2002 This study explores the reappearance of Gnostic themes across the landscape of European literature and thought and in major works by Thomas Mann *Recognition theory and contemporary French moral and political philosophy* Miriam Bankovsky,Alice Le Goff,2024-06-04 The revival of recognition theory has brought new energy to critical theory In general terms recognition theory aims to critically evaluate social structures against a standard of social freedom identified with norms of interaction which are freely recognised by all parties Until now attention has primarily focused on the categories and forms of recognition theory However the influence of contemporary French theory upon the development of theories of recognition has not yet received the consideration it merits This collection outlines the current state of recognition theory studies the impact of French theory and uses French thought to identify aspects of the recognitive process which are often overlooked Exploring French accounts of agonistic identity construction vulnerability power ethical obligation and reflexive theory construction this book supports the intentions of critical theory with heightened attentiveness to oppression in all of its forms

Genre and Void Max Deutscher, 2017-09-29 This book was first published in 2003 Developing a reading of some of Beauvoir's and Sartre's most influential writings in philosophy Max Deutscher explores contemporary philosophy in the light of the phenomenological tradition within which *Being and Nothingness* and *The Second Sex* occurred as striking events operating on the border of the modern and the post modern Deutscher traces the shifts of genre that produce their gendered philosophies and responds in terms of contemporary experience to the mood and the arguments of their works Drawing upon the writings of two contemporary critics in particular Michele Le Duff and Luce Irigaray Deutscher reworks this part of philosophy's history in order to advance thinking in contemporary philosophy generate renewed philosophical reflection on consciousness freedom and one's relation to others and to return a look still cast in our direction from an earlier time

Essays on Logic and Language: Second series Antony Flew, 1993 *Economic Analysis in Historical Perspective* John Creedy, Denis Patrick O'Brien, 1992 This book concentrates on major ideas in economics rather than taking the great men approach to the history of economic thought It approaches the subject from the viewpoint of the modern literature rather than working forwards from the historical material The student should thus be able to more easily relate previous economic writings to the subject matter of an undergraduate course

PHILOSOPHY AND WORLD PROBLEMS - Volume III John McMurtry, 2011-12-11 Philosophy and World Problems theme is a component of Encyclopedia of Social Sciences and Humanities in the global Encyclopedia of Life Support Systems EOLSS which is an integrated compendium of twenty one Encyclopedias The Theme on Philosophy and World Problems deals in three volumes and covers several topics with a myriad of issues of great relevance to our world on Philosophy and World Problems Philosophy resists conclusions because its method across disagreements like modern science to which it gives rise always leaves issues open to counter argument and furtherance of understanding This is how philosophy differs from religious sectarian and other dogmas and closed systems of thinking Yet agreement across the research contributing to this work is implicit or explicit on one meta principle whatever is incoherent with organic social and ecological life requirements through time is false and evil to the extent of its reduction and destruction of life fields and support systems These three volumes are aimed at a wide spectrum of audiences University and College Students Researchers and Educators

Routledge History of Philosophy Volume VIII Richard Kearney, 2003-12-23 Continental philosophy as it has emerged in the twentieth century is less a seamless fabric than a patchwork of diverse strands Phenomenology hermeneutics existentialism structuralism critical theory deconstruction these are some of the salient movements which have developed in continental Europe between 1900 and the 1990s though their influence is by no means confined to geographic location Continental thought has proved highly exportable circulating far beyond the frontiers of Europe to provoke strong responses in the intellectual world at large The fifteen articles in this volume outline and assess some of the issues and experiments of continental philosophy The first five span the twin movements of phenomenology and existentialism running from Husserl and Heidegger to Sartre Merleau Ponty and Levinas

Subsequent essays deal with specific currents of continental thought in such areas as science Marxism linguistics politics aesthetics feminism and hermeneutics A final chapter on postmodernism highlights the manner in which so many concerns of continental thought culminate in a radical anti foundationalism This volume provides a broad scholarly introduction to this period for students of philosophy and related disciplines as well as some original interpretations of these authors It includes a glossary of technical terms and a chronological tube of philosophical scientific and other cultural events

Revival: Servants of Post Industrial Power (1979) Michael Rose, 2017-07-28 This title was first published in 1979 Deftly combining an analysis of socio economic change and social institutions with political commentary intellectual biography and theoretical critique Michael Rose identifies the hidden similarities of the different currents in sociologie du travail and accounts for the popularity of such bold but fragile notions as Mallet's new working class or Touraine's post industrial society Simultaneously the relation between sociologie du travail and the state management and politics is defined and evaluated Finally Rose discusses the work of the new generation of investigators emerging after the crisis point of 1968 His conclusions are relevant not only for the many English speaking social scientists who have been rediscovering the problems of the labour process but for students of industrial relations intellectual history Marxism and modern French society

Jean-Paul Sartre's Anarchist Philosophy William L. Remley, 2018-02-22 The influence of anarchists such as Proudhon and Bakunin is apparent in Jean Paul Sartre's political writings from his early works of the 1920s to Critique of Dialectical Reason his largest political piece Yet scholarly debate overwhelmingly concludes that his political philosophy is a Marxist one In this landmark study William L Remley sheds new light on the crucial role of anarchism in Sartre's writing arguing that it fundamentally underpins the body of his political work Sartre's political philosophy has been infrequently studied and neglected in recent years Introducing newly translated material from his early oeuvre as well as providing a fresh perspective on his colossal Critique of Dialectical Reason this book is a timely re invigoration of this topic It is only in understanding Sartre's anarchism that one can appreciate the full meaning not only of the Critique but of Sartre's entire political philosophy This book sets forth an entirely new approach to Sartre's political philosophy by arguing that it espouses a far more radical anarchist position than has been previously attributed to it In doing so Jean Paul Sartre's Anarchist Philosophy not only fills an important gap in Sartre scholarship but also initiates a much needed revision of twentieth century thought from an anarchist perspective

The Brain of an Army ; The Command of the Sea ; The Brain of the Navy Spenser Wilkinson, 1992 In this single volume reissue are three of Spenser Wilkinson's works Wilkinson was concerned with the practical requirements of modern warfare and believed that organizational changes and strategic guidance had to be implemented from above

Sartre's Life, Times and Vision du Monde William L. McBride, 2013-09-13 William L McBride Professor of Philosophy at Purdue University is co founder of the North American Sartre Society and the first chairperson of its executive board His most recent publications include Social and Political Philosophy and Sartre's Political Theory He was recently named Chevalier dans l'Ordre des

Palme Académiques by the French Government and has served as Chairperson of the Committee on International Cooperation of the American Philosophical Association and as President of the Société Américaine de Philosophie de Langue Française

Critics of Society (Routledge Revivals) Tom B. Bottomore, 2013-05-13 First published in 1967 this essay in the interpretation of radical social thought deals mainly with the radical theorists rather than the doctrines of social and political movements but makes an exception in an important discussion of the new radicalism of the 1960s The author's main concern is to lay bare the connections between intellectual dissent and theories of society and in so doing to explore the neglected subject of the heritage of American radical thinking Readers of this book will not only emerge enlightened by Professor Bottomore's impressive knowledge of American radical thought but with a greatly increased understanding of contemporary American history He ends with the question of whether the new radicalism can find a firmer basis than the student movement or the negro revolt can produce an ideology both responsive to the doubts and complexities of our time and capable of directing action to plausible ends

The Thinking Space Leona Rittner, W. Scott Haine, 2016-03-03 The cafe is not only a place to enjoy a cup of coffee it is also a space distinct from its urban environment in which to reflect and take part in intellectual debate Since the eighteenth century in Europe intellectuals and artists have gathered in cafes to exchange ideas inspirations and information that has driven the cultural agenda for Europe and the world Without the cafe would there have been a Karl Marx or a Jean Paul Sartre The cafe as an institutional site has been the subject of renewed interest amongst scholars in the past decade and its role in the development of art ideas and culture has been explored in some detail However few have investigated the ways in which cafes create a cultural and intellectual space which brings together multiple influences and intellectual practices and shapes the urban settings of which they are a part This volume presents an international group of scholars who consider cafes as sites of intellectual discourse from across Europe during the long modern period Drawing on literary theory history cultural studies and urban studies the contributors explore the ways in which cafes have functioned and evolved at crucial moments in the histories of important cities and countries notably Paris Vienna and Italy Choosing these sites allows readers to understand both the local particularities of each cafe while also seeing the larger cultural connections between these places By revealing how the cafe operated as a unique cultural context within the urban setting this volume demonstrates how space and ideas are connected As our global society becomes more focused on creativity and mobility the intellectual cafes of past generations can also serve as inspiration for contemporary and future knowledge workers who will expand and develop this tradition of using and thinking in space

Vulnerability Henk ten Have, 2016-04-08 Alongside globalization the sense of vulnerability among people and populations has increased We feel vulnerable to disease as new infections spread rapidly across the globe while disasters and climate change make health increasingly precarious Moreover clinical trials of new drugs often exploit vulnerable populations in developing countries that otherwise have no access to healthcare and new genetic technologies make people with disabilities vulnerable to

discrimination Therefore the concept of vulnerability has contributed new ideas to the debates about the ethical dimensions of medicine and healthcare This book explains and elaborates the new concept of vulnerability in today s bioethics Firstly Henk ten Have argues that vulnerability cannot be fully understood within the framework of individual autonomy that dominates mainstream bioethics today it is often not the individual person who is vulnerable rather that his or her vulnerability is created through the social and economic conditions in which he or she lives Contending that the language of vulnerability offers perspectives beyond the traditional autonomy model this book offers a new approach which will enable bioethics to evolve into a global enterprise This groundbreaking book critically analyses the concept of vulnerability as a global phenomenon It will appeal to scholars and students of ethics bioethics globalization healthcare medical science medical research culture law and politics
