**Women in Higher Education, 1850-1970** E. Lisa Panayotidis, Paul Stortz, 2017-09-19

This edited collection illustrates the way in which women s experiences of academe could be both contextually diverse but historically and culturally similar It looks at both the micro individual women and universities and macro level comparative analyses among regions and countries within regional national trans national and international contexts The contributors integrally advance knowledge about the university in history by exploring the intersections of the lived experiences of women students and professors practices of co education and intellectual and academic cultures They also raise important questions about the complementary and multidirectional flow and exchange of academic knowledge and information among gender groups across programmes disciplines and universities Historical inquiry and interpretation serve as efficacious ways with which to understand contemporary events and discourses in higher education and more broadly in community and society This book will provide important historical contexts for current debates about the numerical dominance and significance of women in higher education and the tensions embedded in the gendering of specific academic programs and disciplines and university policies missions and mandates
