China's Political-Military Evolution Monte R. Bullard, 2019-03-08 In recent years the People's Liberation Army PLA has relinquished much of its political power to China's civilian leadership and has turned to the task of professionalizing the military. The transition of the PLA into a relatively apolitical force in Chinese society has occurred alongside great progress toward military modernization with the foundation now laid for the PLA to become one of the world's most powerful military forces. Dr. Bullard traces the PLA's extremely important and almost revolutionary transition, examines the structural changes associated with it, and assesses current military policies and trends. He discusses in detail the political commissar system, the key institution for all political-military relationships in the Chinese military system. **Civil-military Relations In**

Communist Systems Dale R. Herspring, 2019-04-11 This book represents the first attempt to deal with the problem of how to conceptualize the civil-military relations of communist systems within a common intellectual framework. The opening chapters present three major constructs originally designed for analyzing civil-military relations in the USSR: the interest group approach, the institutional congruence approach, and the participatory model. In subsequent chapters, the utility of these approaches is tested against a wide variety of communist systems, including those of Cuba, the USSR, China, Romania, Hungary, the GDR, and Poland. In probing these issues for the first time, the authors shed considerable light on the transnational differences and similarities among communist systems and the dynamics of civil-military relations in all communist systems.

Studies in Communist Affairs United States. Department of the Air Force, 1976 **The Man on Horseback** Samuel Edward Finer, 2002-08-01 The role of the military in a society raises a number of issues. How much separation should there be between a civil government and its army? Should the military be totally subordinate to the polity? Or should the armed forces be allowed autonomy in order to provide national security? Recently, the dangers of military dictatorships, as have existed in countries like Panama, Chile, and Argentina, have become evident. However, developing countries often lack the administrative ability and societal unity to keep the state functioning in an orderly and economically feasible manner without military intervention. Societies, of course, have dealt with the realities of these problems throughout their histories, and the action they have taken at any particular point in time has depended on numerous factors. In the first world of democratic countries, the civil-military relationship has been thoroughly integrated, and indeed, by most modern standards, this is seen as essential. However, several influential Western thinkers have developed theories arguing for the separation of the military from any political or social role. Samuel Huntington emphasized that professionalism would presuppose that the military should intervene as little as possible in the political sphere. Samuel E. Finer, in contrast, emphasizes that a government can be efficient enough, in any way, to keep the civil-military relationship in check, ensuring that the need for intervention by the armed forces in society would be minimal. At the time of the book's original publication, perhaps as a consequence of a post-World War II Cold War atmosphere, this was by no means a universally accepted position. Some considered the military to be a legitimate threat to a free society. Today's post-Cold War environment is an appropriate time to reconsider Finer's classic

argument The Man on Horseback continues to be an important contribution to the study of the military's role in the realm of politics and will be of interest to students of political science government and the military **A Background Reading List on Psychological Operations with Special Emphasis on Communist China** United States.
