Satisficing And Maximizing Moral Theorists On Practical Reason:

Satisficing and Maximizing Michael Byron, 2004-07-19 How do we think about what we plan to do One dominant answer is that we select the best possible option available However a growing number of philosophers would offer a different answer since we are not equipped to maximize we often choose the next best alternative one that is no more than satisfactory This strategy choice is called satisficing a term coined by the economist Herb Simon This new collection of essays explores both these accounts of practical reason *Reasons and Intentions in Law and Practical Agency* George Pavlakos, Veronica Rodriguez-Blanco, 2015-02-05 This collection of new essays explores in depth how and why we act when we follow practical standards particularly in connection with the authority of legal texts and lawmakers The essays focus on the interplay of intentions and practical reasons engaging incisive arguments to demonstrate both the close connection between them and the inadequacy of accounts that downplay this important link Their wide ranging discussion includes topics such as legal interpretation the paradox of intention the relation between moral and legal obligation and legal realism The volume will appeal to scholars and students of legal philosophy moral philosophy law social science cognitive psychology and philosophy of action **Oxford Studies in Normative Ethics, Vol 7** Mark Timmons, 2017 OSNE is an annual forum for new work in normative ethical theory Leading philosophers advance our understanding of a wide range of moral issues and positions from analysis of competing normative theories to questions of how we should act and live well OSNE will be an essential resource for scholars and students working in moral philosophy

Economics and Other Disciplines Ricardo F. Crespo, 2017-05-18 During the second half of the twentieth century economics exported its logic utility maximization to the analysis of several human activities or realities a tendency that has been called economic imperialism This book explores the concept termed by John Davis as reverse imperialism whereby economics has been seen in recent years to have taken in elements from other disciplines Economics and Other Disciplines sheds light on the current state and possible future development of economics by focusing on it from a philosophical perspective broadening the concept of rationality in economic theory The beliefs that prevail in the world today make up a physicalist worldview This book argues that this pervasive view is harmful for economics as a social science Do new economic currents like behavioral economics evolutionary economics neuroeconomics institutional economics happiness economics the capability approach and civil economy escape this widespread mentality What would be an adequate underlying economic ethos Do these approaches fit into this ethos Ricardo F Crespo appraises the contributions from a classical philosophy angle emphasizing their implications regarding practical reason This volume is of great importance to those who are interested in political economy economic theory and philosophy as well as philosophy of social science

The Possibility and Role of Supererogation in Evangelical Ethics B. J. Condrey, 2023-01-10 Supererogation is an awkward term but a useful concept While not a term that we use every day the concept is very familiar to most of us It is an act that is neither obligatory nor forbidden and that possesses moral worth While Roman Catholics and a large number of moral philosophers affirm the possibility and value of such acts Evangelicals from the time of the Reformation have rejected them Yet this is to their detriment Relying on Gregory Mellema's insight that acts of supererogation are possible without compromising the orthodox Evangelical doctrine of justification I argue that there is clear evidence for supererogation in the New Testament and that performing such deeds with a proper motive is essential in an Evangelical account of supererogation It is my hope that Evangelicals will reconsider the possibility of supererogation and embrace the concept as a useful tool in counseling contexts biblical interpretation and homiletics

The Perfect Swarm Len Fisher, 2010-05 One of the greatest discoveries of recent times is that the complex patterns we find in life are often produced when all of the individuals in a group follow the same simple rule This process of self organization reveals itself in the inanimate worlds of crystals and seashells but as Len Fisher shows it is also evident in living organisms from fish to ants to human beings The coordinated movements of fish in shoals for example arise from the simple rule Follow the fish in front Traffic flow arises from simple rules Keep your distance and Keep to the right Now in his new book Fisher shows how we can manage our complex social lives in an ever more chaotic world His investigation encompasses topics ranging from swarm intelligence to the science of parties and the best ways to start a fad Finally Fisher sheds light on the beauty and utility of complexity theory

An entertaining journey into the science of everyday life The Perfect Swarm will delight anyone who wants to understand the complex situations in which we so often find ourselves

The Constitution of Risk Adrian Vermeule, 2014 The Constitution of Risk is the first book to combine constitutional theory with the theory of risk regulation The book argues that constitutional rulemaking is best understood as a means of managing political risks Constitutional law structures and regulates the risks that arise in and from political life such as an executive coup or military putsch political abuse of ideological or ethnic minorities or corrupt self dealing by officials The book claims that the best way to manage political risks is an approach it calls optimizing constitutionalism in contrast to the worst case thinking that underpins precautionary constitutionalism a mainstay of liberal constitutional theory Drawing on a broad range of disciplines such as decision theory game theory welfare economics political science and psychology this book advocates constitutional rulemaking undertaken in a spirit of welfare maximization and offers a corrective to the pervasive and frequently irrational attitude of distrust of official power that is so prominent in American constitutional history and discourse

African Perspectives to the Question of Life's Meaning Aribiah D. Attoe, 2023-10-17 This insightful book is the first edited book volume in the literature to concern itself primarily with the question of life's meaning from the largely under explored African perspective In this collection the authors have undertaken to answer this question and other related questions by showing some of the possible conceptions of life's meaning that can be derived from traditional African perspectives African Perspectives to the Question of Life's Meaning will be a key resource for academics researchers and advanced students of philosophy African studies psychology and religion This book was originally published as a special issue of South African Journal of Philosophy

A Plea for Plausibility John R. Welch, 2023-03-17 This book develops an original theory of decision making based on the concept of plausibility The author advocates plausible reasoning as a general philosophical method and demonstrates how it can be applied to problems in argumentation theory scientific theory choice risk management ethics law economics and epistemology Human decisions are conditioned by formidable uncertainty The standard resource for dealing rationally with uncertainty is the mathematical concept of probability The probability calculus is well known but since the numerical demands for applying it cannot usually be met it is not widely applicable By contrast the concept of plausibility is widely applicable but it is little known This book relies on a generalized concept of plausibility whose strength is its adaptability The adaptability is due to a novel form of decision theory that takes plausibilities as inputs This form of decision theory remains applicable to decisions informed by sharp probabilities and utilities but it can also be applied to decisions that must be made without them It can aid in the rationally critical enterprise of discriminating good arguments from bad and this can foster philosophical progress A Plea for Plausibility will be of interest to scholars and advanced students working in argumentation theory philosophy of science ethics epistemology economics law and risk management

Neither Heroes nor Saints Rebecca Stangl, 2020-09-16 Most of us are far from perfect in virtue But even those who come far closer to perfect virtue than most of us people like Mother

Theresa Martin Luther King Jr or Gandhi nonetheless fall short of possessing it not even moral saints and heroes are perfectly virtuous Faced with this fact moral philosophers can respond in two different ways they might insist that the only real virtue is perfect virtue and the only right actions are perfectly virtuous ones Any failure to meet the exacting standards of perfect virtue will amount to vice and any less than perfectly virtuous actions will be wrong Or if they reject such a rigorist picture they can instead affirm that there are actions that are truly good and right even if they fall short of perfection In this book philosopher Rebecca Stangl urges the attractions of a virtue ethics committed to the second option and in doing so pushes forward two major innovations First she constructs and defends Neo Aristotelian accounts of supererogation and suberogation arguing such accounts are fully consistent with such traditional Aristotelian claims as the doctrine of the mean the necessity of virtue and the role of the phronimos in our moral epistemology And further far from encouraging a kind of complacency she shows the recognition that there can be genuine goodness short of perfection is precisely what opens up theoretical space for appreciating the goodness of striving towards ideal virtue The second major innovation of the book is its argument that self improvement itself can be morally excellent and the disposition to seek and engage in it where appropriate is itself virtuous She terms this a virtue of self cultivation and the book defends and develops a rigorous account of its nature and value

Supererogation David Heyd, 2023-10-24 Supererogation is the category of moral actions which go beyond the call of duty This collection of articles is the first of its kind to cover the broad spectrum of issues related to supererogation It provides an up to date status of the discussion on the main issues alternative analyses and controversies regarding central cases of supererogation The work explores a broad range of philosophical problems and challenges our presuppositions about the basis of ethical theories Beyond the challenges of supererogation to deontological and utilitarian views this book presents the latest developments in the way virtue ethics approaches supererogation It also discusses the issue of whether there is a negative analogue to the supererogatory the suberogatory The Handbook consists also of the first systematic discussion of supererogation from the point of view of five religions as well as a feminist analysis of the concept The book is an essential read for philosophy scholars interested in moral philosophy *Bounded Thinking* Adam Morton, 2012-11-08 Bounded

Thinking offers a new account of the virtues of limitation management intellectual virtues of adapting to the fact that we cannot solve many problems that we can easily describe Adam Morton argues that we do give one another guidance on managing our limitations but that this has to be in terms of virtues and not of rules and in terms of success knowledge and accomplishment rather than rationality He establishes a taxonomy of intellectual virtues which includes paradoxical virtues that sound like vices such as the virtue of ignoring evidence and the virtue of not thinking too hard There are also virtues of not planning ahead in that some forms of such planning require present knowledge of one's future knowledge that is arguably impossible A person's best response to many problems depends not on the most rationally promising solution to solving them but on the most likely route to success given the profile of intellectual virtues that the person has and lacks Morton illustrates his argument with discussions of several paradoxes and conundra He closes the book with a discussion of intelligence and rationality and argues that both have very limited usefulness in the evaluation of who will make progress on which problems *Ethics in the Conflicts of Modernity* Alasdair MacIntyre, 2016-11-14 Alasdair MacIntyre explores some central philosophical political and moral claims of modernity and argues that a proper understanding of human goods requires a rejection of these claims In a wide ranging discussion he considers how normative and evaluative judgments are to be understood how desire and practical reasoning are to be characterized what it is to have adequate self knowledge and what part narrative plays in our understanding of human lives He asks further what it would be to understand the modern condition from a neo Aristotelian or Thomistic perspective and argues that Thomistic Aristotelianism informed by Marx's

insights provides us with resources for constructing a contemporary politics and ethics which both enable and require us to act against modernity from within modernity This rich and important book builds on and advances MacIntyre s thinking in ethics and moral philosophy and will be of great interest to readers in both fields *The Axiology of Theism* Klaas J.

Kraay,2021-10-14 Theism is the view that God exists naturalism is the view that there are no supernatural beings processes mechanisms or forces This Element explores whether things are better worse or neither on theism relative to naturalism It introduces readers to the central philosophical issues that bear on this question and it distinguishes a wide range of ways it can be answered It critically examines four views three of which hold in various ways that things are better on theism than on naturalism and one of which holds just the opposite *The Idea of Creativity* Karen Bardsley,Denis Dutton,Michael Krausz,2009-03-25 Seventeen philosophers scientists and artists consider questions about the intriguing idea of creativity Is creativity essentially mysterious Is creativity essentially inspirational or rationalistic What role does skill play in creativity What are the criteria of creativity Should we assign logical priority to creative persons creative processes or creative products How do forms of creativity relate to different domains of human activity How does creativity relate to self transformation How does our knowledge of the circumstances of creativity effect our appreciation of its products Can a recipient of a creative work also be a creator of it Contributors include Margaret Boden Larry Briskman John M Carvalho David Davies Berys Gaut Rom Harr Carl R Hausman Albert Hofstadter Arthur Koestler Michael Krausz Peter Lamarque Thomas Leddy Paisley Livingston Michael Polany Dean Keith Simonton and Francis Sparshott
