Kotilaine,2023-08-16 Tracing the development journey of the Arabian Gulf region with a forward looking perspective this book describes how a

combination of good fortune creative experimentation and determination has enabled the region to achieve prosperity Today the Arabian Gulf is well positioned to assume a pivotal role in the new global order Forced to balance an extreme climate and acute resource constraints but also an exceptional location the region's progress and prosperity have historically been precarious and vulnerable to external shocks Efforts to transcend resource dependency have typically involved proactive attempts to enable other economic activities This book argues that while conventional economic diversification is making headway the Gulf region is in fact amidst a far more holistic transformation that positions it for a pivotal role in the emerging multipolar global order It now offers globally competitive regulations and world class infrastructure at the heart of the Old World flanked by two fast growing continents It has become the hub of choice for a growing share of inter continental flows of people trade and capital and has established strong economic ties in all directions This book shows how despite many risks and challenges the region possesses the forward looking vision and necessary resilience that can finally liberate it from its long standing resource curse and a development paradigm that looks likely to provide the foundation for sustained well being in the decades ahead The scope and rigor of the book make it suitable as a reference on the Arabian Gulf and for those interested in global affairs and economic development as well as policymakers and the business community *Routledge Library Editions: Financial Markets* Various, 2021-07-09 The volumes in this set originally published between 1970 and 1996 draw together research by leading academics in the area of economic and financial markets and provide a rigorous examination of related key issues The volumes examine the stock exchange capital cities as financial centres international capital the financial system bond duration security market indices and artificial intelligence applications on Wall Street whilst also exploring the general principles and practices of financial markets in various countries This set will be of particular interest to students of economics and finance respectively **Who's Who in the Arab World 2007-2008** Publitex Publications, 2011-12-22 Who's Who in the Arab World 2007 2008 compiles information on the most notable individuals in the Arab world Additionally the title provides insight into the historical background and the present of this influential and often volatile region Part I sets out precise biographical details on some 6 000 eminent individuals who influence every sphere of public life in politics culture and society Part II surveys the 19 Arab Countries providing detailed information on the geography history constitution economy and culture of the individual countries Part III provides information on the historical background of the Arab world Indexes by country and profession supplement the biographical section A select bibliography of secondary literature on the Middle East is also included United States Foreign Policy and the Middle East/North Africa Sanford R.
