## Sauerbruch Hutton Ten Projects:

**Sauerbruch / Hutton. Projekte 1990 - 1996.** Matthias Sauerbruch, Louisa Hutton, 1996-05 **Ecological Urban Architecture** Thomas Schröpfer, 2012-12-13 The goal of advancing eco cities often remains confined to political or technological issues This book establishes a focus on architectural and infrastructural design approaches to sustainable urban development Taking as a basis the critical assessment of the five prototypical eco cities of Vauban Freiburg solarCity Linz Valdespartera Sarriguren Pamplona und Bo01 Malm the book identifies fields in which architectural and urban designers can use their creative skills and methods to achieve sustainable results on the urban scale The themes of Materialize Mobilize Simulate and Transform highlight the shift from the manipulation of quantitative variables to interactive relationships effecting qualitative outcomes in design For example Materialize explores the potential of eco design beyond the traditional palette of materials to show how spatial boundaries can be re imagined as gradients of conditioned versus unconditioned space working with climatic conditions rather than material boundaries to help generate new forms of urban architecture *Thinking Color in Space* Kerstin Schultz, Hedwig Wiedemann-Tokarz, Eva Maria Herrmann, 2018-12-03 The interaction between color and architecture determines our perception of space and defines the tectonic relationships The fascinating spatial potential of color and the multi layered dimensions of interpretation in the experience of color are design and communication means which however are often not fully used color oscillates between autonomy and functional purpose and should be understood as a distinct material that can be used as part of the design The book focuses both on the tangible aspects and design criteria of color and on its indeterminate nature and its experience value Using examples in art and architecture the spatial interdependency of color is illustrated as is its interaction with structure light and geometry

*Projects Review 99/00* Architectural Association (Great Britain). School of Architecture, 2000 Projects Review accompanies the annual AA end of year exhibition and illustrates the best and most interesting student work produced during the academic year Each unit is represented by a summary of its achievements and its own selection of work [Archive](#) Matthias Sauerbruch, Louisa Hutton, 2006 This compendium offers a new insight into the work of Sauerbruch Hutton The development of their architectural thinking can be traced completely from the texts of the architects the considerable number of unimplemented designs and realized or under construction projects such as the GSW headquarters in Berlin the Federal Environment Agency in Dessau or the Museum for the Brandhorst Collection in Munich On one hand the book provides a far reaching overview and on the other hand it makes clear how each project was individually developed out of its structural and social context and how the respective forms emerge from functional technical spatial and sculptural considerations The book reveals how Sauerbruch Hutton understands their work as a process of continuous research In doing so the focus of sustainability repeatedly appears throughout the book as an integral part of their interest In addition the architects have developed their own language which is recognizable by the spatial use of color and material as well as

their organic corporeality      **Obsolescence** Daniel M. Abramson, 2016-02-12 In our architectural pursuits we often seem to be in search of something newer grander or more efficient and this phenomenon is not novel In the spring of 1910 hundreds of workers labored day and night to demolish the Gillender Building in New York once the loftiest office tower in the world in order to make way for a taller skyscraper The New York Times puzzled over those who would sacrifice the thirteen year old structure as ruthlessly as though it were some ancient shack In New York alone the Gillender joined the original Grand Central Terminal the Plaza Hotel the Western Union Building and the Tower Building on the list of just one generation s razed metropolitan monuments In the innovative and wide ranging *Obsolescence* Daniel M Abramson investigates this notion of architectural expendability and the logic by which buildings lose their value and utility The idea that the new necessarily outperforms and makes superfluous the old Abramson argues helps people come to terms with modernity and capitalism s fast paced change *Obsolescence* then gives an unsettling experience purpose and meaning Belief in obsolescence as Abramson shows also profoundly affects architectural design In the 1960s many architects worldwide accepted the inevitability of obsolescence experimenting with flexible modular designs from open plan schools offices labs and museums to vast megastructural frames and indeterminate building complexes Some architects went so far as to embrace obsolescence s liberating promise to cast aside convention and habit envisioning expendable short life buildings that embodied human choice and freedom Others we learn were horrified by the implications of this ephemerality and waste and their resistance eventually set the stage for our turn to sustainability the conservation rather than disposal of resources Abramson s fascinating tour of our idea of obsolescence culminates in an assessment of recent manifestations of sustainability from adaptive reuse and historic preservation to postmodernism and green design which all struggle to comprehend and manage the changes that challenge us on all sides      **Residential Architecture as Infrastructure** Stephen H.
