Matrana, 2009-01-01 The great majority of the South's plantation homes have been destroyed over time and many have long been forgotten In *Lost Plantations of the South* Marc R Matrana weaves together photographs diaries and letters architectural renderings and other rare documents to tell the story of sixty of these vanquished estates and the people who once called them home From plantations that were destroyed by natural disaster such as Alabama's Forks of Cypress to those that were intentionally demolished such as Seven Oaks in Louisiana and Mount Brilliant in Kentucky Matrana resurrects these lost mansions Including plantations throughout the South as well as border states Matrana carefully tracks the histories of each from the earliest days of construction to the often contentious struggles to preserve these irreplaceable historic treasures *Lost Plantations of the South* explores the root causes of demise and provides understanding and insight on how lessons learned

in these sad losses can help prevent future preservation crises Capturing the voices of masters and mistresses alongside those of slaves and featuring more than one hundred elegant archival illustrations this book explores the powerful and complex histories of these cardinal homes across the South A New Plantation World Daniel Vivian,2018-03 Examines the creation of sporting plantations in the South Carolina lowcountry during the first four decades of the twentieth century

**Remaking Wormsloe Plantation** Drew A. Swanson,2012-04 Why do we preserve certain landscapes while developing others without restraint Drew A Swanson s in depth look at Wormsloe plantation located on the salt marshes outside of Savannah Georgia explores that question while revealing the broad historical forces that have shaped the lowcountry South Wormsloe is one of the most historic and ecologically significant stretches of the Georgia coast It has remained in the hands of one family from 1736 when Georgia s Trustees granted it to Noble Jones through the 1970s when much of Wormsloe was ceded to Georgia for the creation of a state historic site It has served as a guard post against aggression from Spanish Florida a node in an emerging cotton economy connected to far flung places like Lancashire and India a retreat for pleasure and leisure and a carefully maintained historic site and green space Like many lowcountry places Wormsloe is inextricably tied to regional national and global environments and is the product of transatlantic exchanges Swanson argues that while visitors to Wormsloe value what they perceive to be an authentic undisturbed place this landscape is actually the product of aggressive management over generations He also finds that Wormsloe is an ideal place to get at hidden stories such as African American environmental and agricultural knowledge conceptions of health and disease the relationship between manual labor and views of nature and the ties between historic preservation and natural resource conservation Remaking Wormsloe Plantation connects this distinct Georgia place to the broader world adding depth and nuance to the understanding of our own conceptions of nature and history *On the Rim of the Caribbean* Paul M. Pressly,2013-03-01

How did colonial Georgia an economic backwater in its early days make its way into the burgeoning Caribbean and Atlantic economies where trade spilled over national boundaries merchants operated in multiple markets and the transport of enslaved Africans bound together four continents In *On the Rim of the Caribbean* Paul M Pressly interprets Georgia s place in the Atlantic world in light of recent work in transnational and economic history He considers how a tiny elite of newly arrived merchants adapting to local culture but loyal to a larger vision of the British empire led the colony into overseas trade From this perspective Pressly examines the ways in which Georgia came to share many of the characteristics of the sugar islands how Savannah developed as a Caribbean town the dynamics of an emerging slave market and the role of merchant planters as leaders in forging a highly adaptive economic culture open to innovation The colony s rapid growth holds a larger story how a frontier where Carolinians played so large a role earned its own distinctive character Georgia s slowness in responding to the revolutionary movement Pressly maintains had a larger context During the colonial era the lowcountry remained oriented to the West Indies and Atlantic and failed to develop close ties to the North American

mainland as had South Carolina He suggests that the American Revolution initiated the process of bringing the lowcountry into the orbit of the mainland a process that would extend well beyond the Revolution **Rice Gold** James Bagwell,2002-06 Drawing from a wealth of information particularly from primary sources such as diaries letters plantation records etc the author has recreated the story of James Hamilton Couper and his times into an exciting interesting and readable account The work begins with an introductory chapter The Georgia Coast a land of sluggish rivers murkey blackwater swamps and studded with a string of islands is the home of a special breed of people The are as wild reckless exciting beautiful and contradictory as the land itself Bagwell examines the Couper heritage from kings war and intrigue in Scotland to their firm establishment on the Georgia Coast As colonial times move into antebellum the Coupers progress especially with James Hamilton Couper of Hopeton Plantation On his grand tour of Europe many on that continent commented on the abilities and potential of this young man Couper made quite a name for himself in the area of politics plantation management scientific agriculture archaeology and architectural design In the sinking of the Pulaski he was hailed the hero of the occasion The publication of this volume will be a valuable addition to the history and culture of the South especially Georgia and its coast
